DARK IMPERIUM

A thousand wars await

“In the grim darkness of the far future, there is only war.”

— Warhammer 40,000

Above the hive, the stars disappear behind the smoke of another burning district. Below, a million workers report for their shifts. The guns on the walls have not stopped firing in six days. The morning broadcast calls this a victory.

Across the Imperium, lives are spent to hold worlds whose names their defenders can barely pronounce. A transport arrives carrying fresh soldiers and leaves with sealed casualty ledgers. In the chapel beside the embarkation gate, someone has scratched a name into the stone beneath every candle.

Now the Great Rift scars the heavens. Beyond it, messages fail and relief fleets become rumours. A governor may rule for years without learning whether the authority that appointed them still exists. A distress call may arrive long after everyone who sent it is dead.

Your warband works where the grand proclamations end: in a flooded transit tunnel, aboard a silent freighter, outside a door that should never have been opened. You have your weapons, your orders and the people beside you. None of them is entirely reliable.

You may never save a world. You can still bring someone home. Decide whose name you will remember, what you will refuse to become, and what you are willing to risk when the next order comes.

ABOUT THE GALAXY SPREAD

An illustrative, unofficial post-Rift atlas. World positions and storm shapes are approximate; the chart shows selected landmarks, not territorial control or navigable routes. The five segmenta are administrative regions, not five separate empires.

Lore references: Warhammer 40,000 — The Setting (warhammer40000.com/the-setting); Warhammer Community — The lore of Armageddon (3 June 2026); Lexicanum — Galaxy (8th Edition), for comparative geography. Checked October 2026.

SECTION 01

Dark Imperium

The dock bells have been sounding for an hour. Beyond the glass, a warship waits among the gantries, its armoured flanks disappearing into shadow. Below it, a clerk counts the people crossing the embarkation bridge. He has been given a quota, not their names.

Somewhere inside that ship is an order bearing your destination. There may be a village to defend, a missing patrol to find, or a sealed door that must never open. The galaxy will scarcely notice whether you return. The people beside you will.

1 Dark Imperium

Dark Imperium is a grimdark d20 warband roleplaying game built on a familiar 5e-style rules chassis and adapted for firefights, armour, suppression, dangerous psychic power, factional authority and the brutal scale of the 41st Millennium.

This Player's Handbook contains the rules a player needs to create, advance and run a character. Enemy construction, encounter budgets, campaign fronts, patron procedures and other behind-the-screen systems belong in the Game Master's Guide or Bestiary.

This is an unofficial fan-made conversion for private tabletop play. It is not affiliated with or endorsed by Games Workshop, Wizards of the Coast, or their licensors.

1.1 Design Goals

- Brutal but heroic.
- Tactical without becoming simulation-heavy.
- Grimdark without making player choices meaningless.
- Built around ranged combat, cover, faith, corruption and dangerous psychic power.
- Playable with mixed warbands of soldiers, zealots, psykers, abhumans, enforcers, scum and Mechanicus operatives.
- Fast enough to run at a normal tabletop while still making equipment and battlefield position matter.

1.2 Core System

Dark Imperium uses a familiar d20 rules chassis for ability checks, attack rolls, saving throws, Armour Class, initiative, actions and reactions. The Player's Handbook defines the player-facing procedures most often needed during play, including range, cover, suppression, opportunity attacks, grappling, rests and conditions. When an edge case is not covered here, the GM makes a ruling using the closest existing procedure, with additional campaign and encounter guidance in the Game Master's Guide.

1.3 Character Tiers

Tier	Levels	Typical Scope
Tier 1	1-4	Districts, facilities, local threats and small warband operations.
Tier 2	5-10	Planetary operations, elite enemies and major institutional conflict.
Tier 3	11-16	System or subsector crises, powerful relics and strategic enemies.
Tier 4	17-20	Sector-changing operations, armies, catastrophic Warp threats and legendary characters.

1.4 Proficiency Bonus

Levels	Proficiency Bonus
1-4	+2
5-8	+3
9-12	+4
13-16	+5
17-20	+6

1.5 Rules Priority

1. Use the most recent Player's Handbook for player-facing character rules.
2. Use a dedicated Bestiary stat block over an older conversion or improvised profile.
3. A specific feature overrides a general rule when the two conflict.
4. When two equally specific rules conflict, use the newer version and record the issue for the next revision.
5. When no rule applies, the GM makes a ruling using the closest existing procedure and play continues.

SECTION 02

Character Creation

The clerk asks for your name twice. The first time, he cannot hear it over the engines. The second, he is checking it against a list of the missing. You watch his finger stop on a line and wonder which answer would have been safer.

Behind you, the next recruit shifts beneath a borrowed coat. Ahead, a door opens onto the mustering deck. Whatever brought you here has left its marks: a regimental habit, an old debt, a prayer learned at home. Soon, strangers will depend on what you have carried with you.

2 Character Creation

Create a character in the following order. Most campaigns begin at level 3, but the rules support levels 1-20.

1. Choose Species.

2. Choose Origin.

3. Generate ability scores.

4. Choose Class.

5. Choose one Universal Trait.

6. Record proficiencies, saving throws and class features.

7. Choose starting equipment.

8. Calculate Armour Class, hit points, attack modifiers and save DCs.

9. Name the character, define their warband role and establish why they are working with the group.

2.1 Ability Scores

Use the ability-score method chosen for the campaign. The default method is the standard array: 15, 14, 13, 12, 10, 8, assigned before species bonuses. Point buy or rolled scores may be used with GM approval.

2.2 Hit Points

At level 1, gain the maximum value of your class Hit Die + your Constitution modifier. At later levels, either roll the Hit Die or use the fixed value: d6 = 4, d8 = 5, d10 = 6, d12 = 7, then add your Constitution modifier. Species and class features may alter your maximum hit points.

2.3 Species and Class Restrictions

Species	Available Classes	Notes
Human	Veteran, Zealot, Psyker, Arbites Enforcer, Hive Scum	Most flexible Imperial species.
Ogryn	Ogryn Skullbreaker	Class-locked; variety comes from Ogryn roles and talents.
Ratling	Ratling Sharpshooter, Veteran, Hive Scum	Sniper, scout, thief, cook and rogue-style specialist.
Skitarii	Skitarii Veteran	Mechanicus-only; no psychic access.
Squat / Kin	Kin Armsman, Hernkyn Prospector	Tough, technically capable specialist; rare in Imperial warbands.
Aeldari / Eldar	Aeldari Outcast, Aeldari Warlock	Xenos option for unusual campaigns; should require a strong narrative reason.

2.3.1 Class at a Glance

Class	Role	Hit Die	Primary Abilities	Complexity
Veteran	Ranged combat/leadership	d10	Dexterity, Wisdom	Low
Zealot	Melee striker/support	d10	Strength or Dexterity; Wisdom or Charisma	Medium
Psyker	Psychic control/support	d6	Intelligence or Wisdom	High
Ogryn Skullbreaker	Tank/bruiser	d12	Strength, Constitution	Low
Arbites Enforcer	Control/frontline	d10	Strength or Dexterity; Wisdom	Medium
Hive Scum	Skirmisher/rogue	d8	Dexterity, Charisma	Medium
Ratling Sharpshooter	Sniper/scout	d8	Dexterity, Wisdom	Medium
Skitarii Veteran	Ranged specialist/controller	d10	Dexterity, Intelligence	Medium
Kin Armsman	Frontline/support	d10	Constitution; Dexterity or Wisdom	Medium
Hernkyn Prospector	Scout / ranged support	d8	Dexterity; Wisdom or Intelligence	Medium
Aeldari Outcast	Mobile striker/scout	d8	Dexterity, Wisdom	Medium
Aeldari Warlock	Psychic support/control	d6	Wisdom or Intelligence; Dexterity	High

Optional campaign restriction: in a strictly Imperial campaign, Squats/Kin may appear as sanctioned allies while Aeldari are normally NPCs or exceptional guest characters.

2.4 Hard Restrictions

2.4.1 Ogryns

Ogryns may only take the Ogryn Skullbreaker class.

They cannot be Veterans, Zealots, Psykers, Arbites, Hive Scum, Skitarii, or Ratling Sharpshooters. Ogryn

variety comes from Ogryn subclasses, not from normal class choice.

2.4.2 Skitarii

Skitarii cannot be Psykers. They may only take the Skitarii Veteran class.

Skitarii are cybernetically altered, doctrinally conditioned, and tied to the Machine Cult. Their identity

should stay separate from psychic characters, faith-driven zealots, underhive scum, and normal

Imperial soldiers.

2.4.3 Psykers

Psykers are Human-only in the core player rules.

No Ogryn Psykers, Ratling Psykers, or Skitarii Psykers are available to player characters. Rare

exceptions may exist as NPCs, mutants, villains, or campaign-specific threats.

2.4.4 Ratlings

Ratlings are not just small humans. They are best suited to sniping, scouting, stealth, infiltration,

smuggling, spotting targets, and surviving through luck and cowardice.

Ratlings may be Ratling Sharpshooters, Veterans, or Hive Scum. They cannot normally be Psykers,

Arbites, Skitarii, Ogryns, or standard Zealots.

A rare Ratling Zealot can exist with GM approval, but should use modified ranged faith features rather

than heavy melee features.

2.4.5 Squats / Kin

Squats, also called Kin in many modern Imperial records, are not simply short humans. They are dense,

hardy, void-adapted, stubborn, and culturally bound to clan, hold, oath, guild, and ancestor-core

traditions.

Squats/Kin may be Kin Armsmen or Hernkyn Prospectors. They cannot be Psykers, Zealots, Arbites,

Skitarii, Ogryns, Ratling Sharpshooters, or Aeldari classes.

A Squat/Kin character in an Imperial warband should have a clear reason for cooperation: a trade

contract, mercenary oath, salvage claim, ancient grudge, debt, diplomatic mission, or shared enemy.

2.4.6 Aeldari / Eldar

Aeldari are xenos and should not be treated as normal Imperial citizens. They are included for

campaigns where the GM wants uneasy alliances, temporary warband cooperation, corsair contact,

ranger intervention, or a story built around a greater threat.

Aeldari may be Aeldari Outcasts or Aeldari Warlocks. They cannot take Imperial classes, Ogryn classes,

Ratling classes, Squat/Kin classes, or Skitarii classes.

An Aeldari Warlock should normally be a former Seer who has walked the Path of the Warrior. A lone

Warlock travelling with an Imperial warband needs a strong narrative hook, such as a Farseer

command, a hidden webway objective, a daemon threat, or a necessary but temporary alliance.

2.5 Skills and Ability Checks

When a task has an uncertain outcome, roll d20 + the relevant ability modifier. If you are proficient in the skill or tool that applies, also add your proficiency bonus. A saving throw uses the same structure, adding proficiency only when your class or another rule grants proficiency in that saving throw.

Advantage and disadvantage: roll two d20s and use the higher result for advantage or the lower result for disadvantage. Multiple sources of the same type do not stack; if you have both advantage and disadvantage, they cancel, and you roll one d20.

Skill	Ability	Typical Use
Acrobatics	Dexterity	Balance, controlled movement and physical agility.
Athletics	Strength	Climbing, jumping, grappling, shoving, swimming and forcing obstacles.
Investigation	Intelligence	Searching scenes, analysing evidence and piecing clues together.
Medicine	Wisdom	Stabilisation, diagnosis, field treatment and medicae equipment.
Perception	Wisdom	Spotting threats, movement, hidden objects and ambushes.
Stealth	Dexterity	Moving quietly, hiding, infiltration and avoiding observation.
Survival	Wisdom	Tracking, navigation, shelter, supplies and hostile environments.
Technology	Intelligence	Cogitators, auspexes, locks, machinery and technical analysis.

Other skills use the same procedure. Deception, Intimidation and Persuasion normally use Charisma; Insight uses Wisdom; History and Religion use Intelligence; Sleight of Hand uses Dexterity. The GM may pair a skill with a different ability when the approach changes, such as Strength (Intimidation) for a physical display of force.

SECTION 03

Species

The meeting takes place beyond the station patrols. An Ogryn stoops beneath the lintel while a Ratling searches the corners. The hooded Skitarii turns towards a sound nobody else can hear. Across the chest, a Kin envoy waits for the human to finish speaking. The Aeldari has offered neither a name nor a promise.

Their patron has arranged one journey together. That is all. Each brings a different measure of danger, loyalty and obligation; each has reasons to leave. For now, the same enemy waits beyond the next airlock.

SPECIES LORE

Human and Ogryn

3.1 Human

Humanity lives beneath the weight of an empire too vast for any one person to comprehend. A hive labourer, a shipborn deckhand and a shrine pilgrim may share devotion to the Emperor while knowing almost nothing of one another's lives. Their customs, accents and fears are shaped by the place that raised them.

Imperial institutions demand obedience and service, but a person's loyalties can be much smaller and more stubborn: the family left in a hab-block, the friend who shared a ration, the squad whose names are scratched inside a helmet. Such attachments can sustain someone whom the authorities regard as replaceable.

In a warband, a human might be a career soldier, a survivor of the streets, a believer or a reluctant specialist. Decide what your character misses about home, and which lesson from that life they still trust. A familiar habit can reveal more than a long account of past victories.

3.2 Ogryn Abhuman

Ogryns are immense abhumans whose strength and endurance make them valuable to Imperial armies and heavy industry. Their equipment must withstand bodies and hands far larger than those of ordinary humans. On the battlefield they may carry brutal weapons, shield their comrades, or force a passage through a position others cannot breach.

The Imperium often judges an Ogryn by how much they can carry or destroy. A warband has time to learn the person behind that judgement: a carefully remembered promise, pride in a trusted duty, or the quiet certainty that a smaller companion must be kept safe. Loyalty can be deeply personal even when the order that first inspired it was simple.

Give your Ogryn something they take seriously beyond fighting. They may keep an exact count of their companions, preserve a gift from an old commander, or insist that nobody is left behind. Their way of understanding a problem can be direct without making their feelings shallow.

SPECIES LORE

Ratling and Skitarii

3.3 Ratling Abhuman

Ratlings are small, hardy abhumans whose sharp senses and marksmanship have earned them a place in Imperial armies. Their stature makes many human spaces awkward, but offers advantages wherever concealment matters. A ruined building that exposes an ordinary soldier may hold a dozen comfortable hiding places for a Ratling.

Life among taller comrades can involve affection, prejudice and the constant expectation of mischief. A particular Ratling might cultivate that reputation, resent it, or use it to divert attention from something more important. Food, favours and useful information can sustain relationships that rank alone cannot secure.

Consider who first trusted your character with a difficult job. They may take pride in feeding a squad, finding an overlooked route, or making a seemingly impossible shot. Give them a private ambition as well as a useful trick; being underestimated is an experience, not a complete personality.

3.4 Skitarii Augmented Human

Skitarii are the augmented soldiery of the Adeptus Mechanicus. Beneath robes and armour, flesh is joined to machinery in service to the Machine God. Their altered senses and disciplined routines reflect a life shaped by forge worlds, sacred maintenance and commands carried through systems others cannot perceive.

The extent of augmentation and personal independence varies. A warrior may remember an earlier name, regard a replacement limb as a blessing, or understand duty through streams of information that arrive without a spoken word. A damaged component can be both a practical burden and a source of religious unease.

Away from a larger force, a Skitarius must negotiate unfamiliar people and incomplete instructions. Decide which ritual still anchors your character when communications fail. In this handbook, Skitarii occupy a species entry for character creation, but they remain augmented humans rather than a separate biological species.

SPECIES LORE

Kin and Aeldari

3.5 Squat / Kin

The Kin build their lives around kindred, work and inherited obligation. The Leagues of Votann guard immense stores of ancestral knowledge within their revered Ancestor Cores. Survival in hostile environments encourages careful preparation, reliable craftsmanship and a long memory for debts owed or harms done.

The name Squat is also associated with communities such as Necromunda's Ironhead prospectors. Those mining clans have their own history and local traditions; a character need not be a recent arrival from a League. Decide whether home means a distant Hold, an industrial settlement or the cramped working decks of an expedition vessel.

A Kin traveller may carry a contract, a family tool or a promise whose importance outsiders struggle to understand. Their place in a warband can grow through dependable work and reciprocal trust. Ask what they hope to bring home: wealth, knowledge, an honoured name, or someone who should never have been lost.

3.6 Aeldari / Eldar

The Aeldari inherit the memory of an empire destroyed by its own excess. For those of the craftworlds, disciplined Paths offer a way to contain the intensity of thought and emotion that helped bring about the Fall. Spirit stones and the preservation of the dead are bound to survival as well as tradition.

An Outcast has stepped beyond that ordered life, though distance does not erase the pull of home. A Warlock brings a different history: the experience of a former warrior joined to the psychic disciplines of a seer. Neither role makes every decision certain, nor every relationship with another species impossible.

To human companions, an Aeldari's priorities may seem remote. Make those priorities concrete: a threatened spirit stone, a warning only partly understood, a debt to someone long dead. Decide what would persuade your character to explain themselves rather than simply expect obedience. Trust gained across that distance should matter.

3 Species

Species have distinct identities, with species-specific armour modification rules in Chapter 9 providing additional mechanical distinction.

Species defines a character's physical baseline, cultural assumptions, and class access. Each species is written in the same format for ease of use at the table.

Darkvision. Within the range listed in your species traits, you treat dim light as bright light and darkness as dim light. In darkness, you see only shades of grey. Darkvision does not let you see through smoke, solid objects, or psychic darkness unless its rules explicitly state otherwise.

If you gain darkvision from more than one source, use the longest range; the ranges do not add together. Humans, Ogryn and Skitarii have no default species darkvision and must obtain it through equipment or augmetics, such as the Optical Implant.

3.1 Human

Humans are the baseline of the Imperium: adaptable, ambitious, fragile, and dangerously determined.

Ability Scores: +2 to one ability score and +1 to another.

Size: Medium.

Speed: 30 ft.

Available Classes: Veteran, Zealot, Psyker, Arbites Enforcer, Hive Scum.

3.1.1 Human Traits

Imperial Adaptability: Gain proficiency in one skill of your choice.

Broad Training: Gain one additional weapon, tool, or language proficiency.

Faith, Fear, or Discipline: Once per long rest, when you fail a saving throw, you may reroll it. You must use the new result.

3.2 Ogryn Abhuman

Ogryns are massive abhumans used by the Imperium as shock troops, bodyguards, line-breakers, and living siege weapons. They are loyal and terrifyingly durable, but they are not subtle and struggle with equipment designed for normal human frames.

Ability Scores: +2 Strength, +1 Constitution.

Size: Medium, but you count as one size larger for carrying, lifting, pushing, dragging, grappling, and shoving.

Speed: 30 ft.

Available Classes: Ogryn Skullbreaker only.

3.2.1 Ogryn Traits

Massive Build: Your maximum hit points increase by 3 per character level. You also count as one size larger for carrying, lifting, pushing, dragging, grappling, and shoving.

Thick Skull: You have advantage on saving throws against being frightened.

Brute Strength: Your unarmed strikes deal 1d6 + your Strength modifier bludgeoning damage.

Too Big for Standard Kit: You cannot use most standard armour, delicate weapons, compact firearms, or subtle tools unless they have been modified for Ogryn use.

Simple Solutions: You are not automatically stupid, but you struggle with delicate logic, subtle interfaces, encrypted systems, and advanced technology. You have disadvantage on Intelligence checks involving advanced technology, forbidden lore, cogitators, security systems, encrypted data, or complex machinery unless you are proficient in a relevant skill or tool. However, once per short rest, when a problem could plausibly be solved through brute force, intimidation, endurance, or direct action, you may add your proficiency bonus to the check even if you would not normally be proficient.

3.3 Ratling Abhuman

Ratlings are small abhumans known for stealth, marksmanship, scavenging, cooking, black-market dealings, and improbable survival.

Ability Scores: +2 Dexterity, +1 Wisdom.

Size: Small.

Speed: 25 ft.

Available Classes: Ratling Sharpshooter, Veteran, Hive Scum.

3.3.1 Ratling Traits

Darkvision: You have darkvision to a range of 60 ft (see the rules at the start of this chapter).

Small Target: When you have light cover, you may treat it as heavy cover.

Sniper's Eye: You ignore disadvantage from attacking at long range with weapons that have the Accurate property.

Naturally Sneaky: You gain proficiency in Stealth.

Lucky Shot: Once per short rest, when you miss with a ranged weapon attack, you may reroll the attack.

Bad in a Straight Fight: You have disadvantage on Strength checks made to shove or grapple creatures larger than you.

3.4 Skitarii Augmented Human

Skitarii are cybernetically enhanced soldiers of the Adeptus Mechanicus. They are machine-disciplined, sensor-linked, and doctrinally conditioned beyond normal human limits.

Ability Scores: +2 Dexterity or Intelligence, +1 Constitution.

Size: Medium.

Speed: 30 ft.

Available Classes: Skitarii Veteran.

3.4.1 Skitarii Traits

Augmetic Body: You have resistance to poison damage and advantage on saving throws against

disease.

Machine Discipline: You have advantage on saving throws against being charmed.

Noospheric Focus: Gain proficiency in Investigation, Perception, or Technology.

Integrated Auspex: Once per short rest, as a bonus action, choose one creature within 60 ft that you

can see. Your next attack against that creature before the end of your turn gains +1d4 to hit.

Cybernetic Maintenance: During a short rest, if you or an ally has tinker's tools or Mechanicus tools,

you may regain additional hit points equal to your proficiency bonus.

No Psychic Potential: You cannot choose the Psyker class or any trait that grants psychic powers.

3.5 Squat / Kin

Squats, often known as Kin in modern Imperial records, are hardy void-adapted abhumans associated

with holds, guilds, oath-bands, mining fleets, mercenary contracts, and ancient grudges. They are

shorter than humans but dense, resilient, technically minded, and extremely difficult to intimidate.

Ability Scores: +2 Constitution, +1 Intelligence or Wisdom.

Size: Medium, but your height is usually between 4 and 5 ft.

Speed: 25 ft.

Available Classes: Kin Armsman, Hernkyn Prospector.

3.5.1 Squat / Kin Traits

Darkvision: You have darkvision to a range of 60 ft (see the rules at the start of this chapter).

Dense Build: You have advantage on saving throws against being shoved, knocked prone, or moved

against your will.

Void-Hardened: You have advantage on saving throws against exhaustion caused by poor atmosphere,

bad rations, forced marches, cramped voidship conditions, mining hazards, or environmental hardship.

Guild-Craft: Gain proficiency in Technology, Investigation, or one artisan/tool proficiency related to

engineering, mining, weapons, armour, or voidcraft.

Grudge Memory: Once per long rest, when a creature damages you or an ally within 30 ft, mark that

creature as the subject of a grudge. The first time you hit that creature before the end of the encounter,

add your proficiency bonus to the damage.

Stubborn Kin: You have advantage on saving throws against being frightened.

3.6 Aeldari / Eldar

Aeldari are ancient xenos whose reflexes, senses, and psychic presence far exceed human norms. Player

Aeldari should represent rare outcasts, rangers, corsair-adjacent wanderers, or warlocks operating

under a specific hidden purpose.

Ability Scores: +2 Dexterity, +1 Intelligence or Wisdom.

Size: Medium.

Speed: 35 ft.

Available Classes: Aeldari Outcast, Aeldari Warlock.

3.6.1 Aeldari Traits

Darkvision: You have darkvision to a range of 90 ft (see the rules at the start of this chapter).

Inhuman Grace: Gain proficiency in Acrobatics or Stealth.

Keen Senses: Gain proficiency in Perception. If you already have Perception proficiency, add +1 to

Perception checks instead.

Battle Trance: You may move through the space of allied creatures without treating it as difficult

terrain. Once per short rest, when you move at least 10 ft before making a weapon attack, add +1d4 to

the attack roll.

Ancient Mind: You have advantage on saving throws against being charmed or frightened by non-psychic effects.

Xenos Distrust: You have disadvantage on Persuasion checks with most Imperial authorities unless

disguised, vouched for, or operating under an established truce.

SECTION 04

Origins

The transport clerk calls your birthplace a recruitment category. To you it is the smell of hot metal, the sound of a prayer before dawn, or the vibration of engines beneath a childhood bunk. A name on a form cannot contain those things.

When the mission becomes unfamiliar, old habits return. You count exits, offer the greeting of a distant shrine, or search for a horizon that the hive never had. Home can prepare you for danger and leave you blind to it. You will discover which lessons travel well.

4 Origins

Origins are narrative-and-proficiency packages. Their function is explicitly separate from the universal Trait choice made during character creation.

Origins represent upbringing, culture and previous life before becoming part of the warband.

Origin	Human	Ogryn	Ratling	Skitarii	Squat/Kin	Aeldari
Hiveborn	Yes	Rare	Yes	No	Rare	No
Shrine Worlder	Yes	No	Rare	No	No	No
Penal Worlder	Yes	Yes	Yes	No	Rare	No
Voidborn	Yes	Rare	Yes	No	Yes	Rare
Forge World	Yes	No	No	Yes	Rare	No
Schola Progenium	Yes	No	No	No	No	No
Militarum Regiment	Yes	Yes	Yes	Limited	Rare	No
Underhive	Yes	No	Yes	No	Rare	No
Craftworld / Outcast	No	No	No	No	No	Yes
Mining Hold / Guild	No	No	No	No	Yes	No

4.1 Hiveborn

Raised in the brutal density of a hive city.

Allowed Species: Human, Ratling, rare Ogryn.

Skill Proficiency: Choose one from Deception, Insight, Intimidation, Sleight of Hand, or Stealth.

Crowd Rat: You ignore difficult terrain caused by crowds, rubble, cramped spaces, pipes, gantries, and dense urban clutter.

Seen Worse: You have advantage on saving throws against fear caused by gore, violence, intimidation, or battlefield horror.

4.2 Shrine Worlder

Raised in devotion, ritual, sacrifice, and Imperial worship.

Allowed Species: Human, rare Ratling.

Skill Proficiency: Religion and either Persuasion or Intimidation.

Litany of Resolve: Once per long rest, you can give yourself or one ally within 30 ft. advantage on a Wisdom saving throw.

Sacred Hatred: Once per turn, when you damage a heretic, daemon, mutant, witch, traitor, or xenos with a weapon attack or class feature, you deal an additional 1d4 + 1 radiant damage.

This damage represents zeal, ritual fury, and trained hatred rather than true divine magic.

4.3 Penal Worlder

A convict, survivor, conscript, or former prisoner.

Allowed Species: Human, Ogryn, Ratling.

Skill Proficiency: Survival and one of Athletics, Deception, or Intimidation.

Hard Time: You have advantage on saving throws against exhaustion caused by forced marches, starvation, poor conditions, or sleep deprivation.

Dirty Survival: Once per long rest, when you are reduced to 0 hit points but not killed outright, you may drop to 1 hit point instead.

4.4 Voidborn

Born aboard a voidship, orbital station, warship, pilgrim vessel, or ancient wreck.

Allowed Species: Human, Ratling, rare Ogryn.

Skill Proficiency: Choose one from Acrobatics, Perception, Investigation, or Technology.

Void Legs: You have advantage on checks and saving throws to avoid being knocked prone or moved against your will.

Shipwise: You are proficient with basic voidship procedures, airlocks, auspex consoles, pressure doors, and shipboard emergency systems.

4.5 Forge World

Raised among manufactorums, machine temples, data-vaults, and sacred industry.

Allowed Species: Human, Skitarii.

Skill Proficiency: Investigation and Technology.

Machine Rites: You can perform basic maintenance on weapons, armour, augmetics, cogitators, and power systems.

Logic Before Fear: Once per long rest, you may gain advantage on a saving throw against fear, panic, or psychic manipulation.

4.6 Schola Progenium

Raised in harsh Imperial institutions to become a soldier, judge, officer, priest, or specialist.

Allowed Species: Human.

Skill Proficiency: Choose one from History or Religion, and one from Intimidation or Persuasion.

Drilled Obedience: You have advantage on saving throws against fear while following a direct order, holding formation, or protecting an Imperial objective.

Imperial Education: You can identify major Imperial organisations, ranks, symbols, rites, and procedures.

4.7 Militarum Regiment

Formerly attached to an Imperial Guard force, auxiliary formation, or battlefield logistics unit.

Allowed Species: Human, Ogryn, Ratling, limited Skitarii.

Skill Proficiency: Choose one from Athletics or Survival, and gain Perception.

Squad Drill: Before initiative is rolled, choose one ally within 5 ft of you who can see or hear you. You

and that chosen ally each gain +1 to initiative for that combat. You must choose the ally before anyone

rolls initiative. If no ally is within 5 ft when initiative is called, this feature provides no benefit.

Field Discipline: Once per short rest, you may reroll a failed saving throw against Suppression.

4.8 Underhive

Raised below the proper world, among gangs, sump-rats, chem dens, scavvers, and forgotten habs.

Allowed Species: Human, Ratling.

Skill Proficiency: Choose two from Deception, Intimidation, Sleight of Hand, Stealth, and Survival.

Black-Market Instinct: You know how to locate illegal goods, smugglers, fences, and information

brokers in hive settlements.

Never Fight Fair: Once per short rest, when you hit a creature that has not acted yet in combat, deal

additional damage equal to your proficiency bonus.

4.9 Craftworld / Outcast

Raised among Aeldari ways, then sent away, exiled, self-exiled, ranger-bound, corsair-adjacent, or

drawn into a dangerous path beyond normal craftworld protection.

Allowed Species: Aeldari.

Skill Proficiency: Choose two from Acrobatics, Insight, Perception, Stealth, Survival, and Technology.

Path Discipline: Once per long rest, when you fail a Wisdom or Intelligence saving throw, you may

reroll it. You must use the new result.

Alien Poise: You have advantage on checks to move silently through ruins, forests, webway structures,

wraithbone architecture, or abandoned alien sites.

4.10 Mining Hold / Guild

Raised in a Squat/Kin hold, mining fleet, oath-band, salvage guild, prospecting clan, or void-industrial

enclave.

Allowed Species: Squat/Kin.

Skill Proficiency: Choose two from Athletics, Investigation, Survival, Technology, and Persuasion.

Oath and Ledger: You can usually identify the likely value, industrial purpose, or salvage use of

machinery, ore, weapons, armour, and voidship components.

Hold-Fast: Once per short rest, when you fail a saving throw against being frightened, knocked prone,

moved, or suppressed, you may reroll it. You must use the new result.

SECTION 05

Universal Traits

The first night aboard, nobody sleeps easily. One traveller checks the door seal twice. Another carefully folds a patched blanket. A metal hand clicks against the mess table, keeping time with a tune its owner seems not to notice.

Before anyone has earned a reputation, these small habits are what the others learn. Fear, patience and stubbornness take different shapes in different bodies. When the lights fail, the person who remembers your name may matter more than the one wearing the finest uniform.

5 Universal Traits

Each character chooses one Dark Imperium Trait at character creation. Traits replace imported fantasy background features and provide one compact defining edge.

Trait	Effect
Faithful	Once per long rest, when you fail a Wisdom or Charisma saving throw, reroll it. You must use the new result.
Jaded	Advantage on saving throws against fear caused by gore, death, torture, corruption or battlefield horror.
Twitchy	Gain +2 to initiative.
Unnaturally Lucky	Once per long rest, reroll any d20 roll. You must use the new result.
Augmetic Scarred	Gain one minor augmetic upgrade. You suffer disadvantage on Persuasion checks with groups that distrust obvious cybernetics.
Chem-Hardened	Advantage on saving throws against poison, disease and combat drugs.
Devoted Servant	Once per long rest, when you fail a death saving throw, treat it as a success instead.
Touched by the Warp	Human only. Know one Minor Universal Psychic Power. Using it increases Warp Pressure by 1 and risks Perils. Skitarii cannot take this trait.
Hive Survivor	Gain proficiency in Survival or Stealth. Advantage on checks to find shelter, water, food or safe routes in hive, ruin, sump or industrial terrain.
Munitorum Drilled	Gain proficiency with one basic firearm. Once per short rest, reload a basic weapon without spending an action.
Iron Nerves	Once per short rest, when you would become Suppressed, ignore the condition until the start of your next turn.
Faith in Steel	While wearing armour, once per long rest, reduce incoming damage by your proficiency bonus.
Dirty Pragmatist	Gain proficiency in Deception or Sleight of Hand. Once per short rest, draw, conceal, palm or plant a small item without requiring an action.
Vox Familiar	Allies within 120 ft with vox access can understand your short coded messages even in combat noise.
Grudge-Bearer	Choose heretics, mutants, daemons, xenos, gangers or traitor soldiers. Once per long rest, when you hit that category, add 1d6 damage.
Hard to Kill	Maximum HP increases by 2; advantage on death saves while an ally is within 5 ft.
Knife in the Boot	You count as having a concealed knife or improvised shiv unless fully searched. Gain proficiency with knives.
Field Chirurgeon	Gain proficiency in Medicine. Once per short rest, stabilise a creature as a bonus action rather than an action.
Black-Market Eye	Gain proficiency in Investigation or Insight. Advantage on checks to assess the value, legality or likely source of weapons, relics, chems and contraband.
Litany-Marked	Once per long rest, as a bonus action, you and one ally within 30 ft gain advantage on saves against fear until the start of your next turn.

SECTION 06

Combat Rules

The street goes quiet a moment before the firing starts. A window flashes. Stone chips sting your cheek, and the doorway that looked close a second ago now seems impossibly far away. Someone shouts a direction; someone else is already moving.

Training gives the next few seconds a shape. Find shelter. Watch the approach. Keep speaking so the others know you are there. Victory may eventually acquire a grand description. Here, beneath the noise, it begins with a few frightened people doing necessary things together.

6 Combat Rules

“Find cover before you find courage. The enemy will give you time for neither.” — Veteran’s field advice

Combat uses the familiar d20 round structure, but Dark Imperium assumes firearms, cover, suppression and objective play are common rather than exceptional.

6.1 Turns and Actions

On your turn, you may move up to your Speed and take one action. A feature may also grant a bonus action. You have one reaction between the start of your turn and the start of your next turn.

Common Action	Use
Attack	Make weapon attacks allowed by your class features and equipment.
Dash	Move up to your Speed again.
Disengage	Your movement does not provoke opportunity attacks this turn.
Dodge	Until your next turn, attacks you can see have disadvantage against you, and you have advantage on Dexterity saves.
Help	Give an adjacent or plausibly assisted ally advantage on one appropriate check or attack.
Hide	Attempt to become hidden when terrain, darkness or concealment allows it.
Ready	Choose a perceivable trigger and an action or movement to resolve with your reaction.
Reload	Reload a weapon when its Reload property requires it.
Use Mission Gear	Operate a med-pack, auspex, demolition tool or other item whose rule requires an action.

6.2 Cover

Cover	Effect
Light Cover	+2 AC against attacks that pass through the cover.
Heavy Cover	+5 AC against attacks that pass through the cover.
Full Cover	Cannot be directly targeted through the obstruction.

Examples: crates, railings and pipework are usually Light Cover; barricades, firing ports and armoured machinery are usually Heavy Cover; sealed walls and complete corners provide Full Cover. The GM decides whether a line of fire crosses the cover.

6.3 Suppression

Some weapons and class features can Suppress a target. When a creature is required to make a Suppression save, use the attacker's weapon save DC: 8 + proficiency bonus + the ability modifier used for the attack. A creature that fails is Suppressed until the start of the source's next turn unless a rule gives a different duration.

- Disadvantage on ranged weapon attacks.
- Cannot willingly move closer to the source of Suppression.
- Cannot take reactions.

A creature behind Full Cover from the source automatically ends Suppression if the source can no longer threaten its position, at the GM's discretion.

6.4 Reload

A weapon with Reload X can normally make X attacks before it must be reloaded. Reloading uses an action unless a class feature, trait or item says otherwise. Reload X represents the current magazine, cylinder, charge pack or power cell, not the character's total ammunition. In standard play, ordinary spare ammunition is abstracted, and a character is assumed to carry enough routine reloads for the mission unless the GM says scarcity matters. Ammo Packs in Chapter 17 are used when ammunition is limited, an emergency resupply is needed, or specialist ammunition must be restored. Survival-focused campaigns may instead use Supply States from the GM Guide.

6.5 Close-Quarters Shooting

Making a ranged weapon attack while a hostile creature is within 5 ft normally imposes disadvantage. A weapon with the Close-Quarters property ignores this disadvantage. Pistols may be drawn and fired in melee unless another rule prevents it.

6.6 Critical Hits

On a natural 20 with an attack roll, roll the attack's damage dice twice and add modifiers once. Properties such as Brutal or Chain may add further dice. Effects that trigger on a critical hit resolve after confirming the hit.

6.7 Dropping to 0 Hit Points

At 0 hit points, you fall unconscious unless a feature says otherwise. At the start of each of your turns, make a death saving throw. On 10 or higher, gain one success; on 9 or lower, gain one failure. Three successes stabilise you. Three failures kill you. A natural 20 restores 1 hit point; a natural 1 causes two failures. Taking damage at 0 HP causes one failure, or two if the damage came from a critical hit.

6.8 Stabilising and Recovery

A creature within reach can use an action and succeed on a DC 10 Medicine check to stabilise a dying creature. Field dressings, med-packs and class features may improve this. Ordinary hit-point recovery follows the normal rest rules; lasting injuries, surgery and limb replacement use Chapter 19.

6.9 Ranged Attacks and Range

A weapon range written as two numbers, such as 80/240 ft, lists its normal range first and maximum range second. Attacks made at or within normal range are resolved normally. Attacks beyond normal range and up to maximum range are made with disadvantage. A target beyond maximum range cannot be attacked with that weapon. Area weapons that list a cone, line or radius use that listed area instead of normal range bands unless their profile says otherwise.

6.10 Opportunity Attacks

When a hostile creature you can see leaves your melee reach using its own movement, you may use your reaction to make one melee weapon attack against it immediately before it leaves your reach. A creature that takes the Disengage action does not provoke opportunity attacks for the rest of that turn. Forced movement, teleportation and movement that does not use the creature's own Speed do not normally provoke opportunity attacks. Ranged weapons cannot normally make opportunity attacks unless a feature specifically allows it.

6.11 Grappling and Shoving

If you can make more than one attack with the Attack action, a grapple or shove may replace one of those attacks. You must have at least one free hand to grapple a creature.

Maneuver	Procedure
Grapple	Choose a creature within your reach that is no more than one size larger than you. Make a Strength (Athletics) check contested by the target's Strength (Athletics) or Dexterity (Acrobatics). On a success, the target is grappled.
Escape	A grappled creature may use its action to repeat the contest. On a success, the grapple ends. The grapple also ends if the grappler is incapacitated or the creatures are moved beyond the grappler's reach.
Move a Grappled Target	When you move, you may drag or carry a grappled target, but your Speed is halved unless the target is at least two sizes smaller than you.
Shove	Choose a creature within your reach that is no more than one size larger than you. Make the same contested check as a grapple. On a success, either push the target 5 ft or knock it Prone.

6.12 Two-Weapon Fighting

When you take the Attack action and attack with a one-handed Light melee weapon, you may use a bonus action to make one attack with a different one-handed Light melee weapon in your other hand. Do not add your ability modifier to the bonus attack's damage unless that modifier is negative or a feature says otherwise. Drawing or stowing both weapons follows the normal item-interaction limits unless a feature says otherwise.

Light pistols may be carried in either hand, but dual-wielding pistols does not by itself grant an additional attack. A feature that grants a bonus-action pistol attack, such as a Gunslinger or Talent feature, may use either ready pistol. Reload each firearm separately. Carrying a pistol and a blade likewise grants no extra attack unless a feature provides one.

6.13 Rest and Recovery

Rest	Duration	Effect
Short Rest	At least 1 hour	A period of relative safety with no strenuous activity. You may spend Hit Dice; for each die spent, roll it and regain HP equal to the result + your Constitution modifier. Recover features that say they return on a short rest. Warp Pressure is reduced to 0 as described in Chapter 15.
Long Rest	At least 8 hours	At least 6 hours should be sleep or an equivalent species-appropriate rest unless the GM rules otherwise. Restore all lost HP, recover long-rest features and regain spent Hit Dice up to half your total Hit Dice, minimum one. Warp Pressure is reduced to 0. A character can normally benefit from only one long rest in 24 hours.

Rest does not remove Corruption, lasting injuries, lost equipment or narrative consequences unless a specific rule says otherwise.

6.14 Conditions and Battlefield States

The following definitions apply when a rule gives a creature one of these conditions or states. If a feature gives a more specific duration or effect, the specific feature wins.

Condition / State	Effect
Blinded	You cannot see and automatically fail checks that require sight. Your attacks have disadvantage; attacks against you have advantage.
Bloodied	You are Bloodied while at or below half your maximum HP. Bloodied is a state, not a condition, and has no effect by itself unless a rule refers to it.
Charmed	You cannot attack or deliberately harm the creature that charmed you. That creature has advantage on social checks made against you.
Frightened	While you can see the source of your fear, you have disadvantage on ability checks and attack rolls and cannot willingly move closer to it. A "fear save" is a save made to avoid or end this condition.
Grappled	Your Speed becomes 0 and cannot benefit from bonuses to Speed. The condition ends if the grappler is incapacitated or you are moved beyond its reach.
Hidden	You are unseen and unheard by a creature that has not located you. Attacks against a creature you are hidden from normally have advantage. Making an attack normally reveals your position after the attack resolves unless a feature says otherwise.
Incapacitated	You cannot take actions, bonus actions or reactions.
Invisible	You cannot be seen without a special sense or effect. Your attacks normally have advantage, and attacks against you normally have disadvantage. You can still be detected by sound, tracks or other evidence.
Poisoned	You have disadvantage on attack rolls and ability checks.

Condition / State	Effect
Prone	Your only movement option is to crawl unless you spend half your Speed to stand. Your attacks have disadvantage. Attacks against you have advantage from within 5 ft and disadvantage from farther away.
Restrained	Your Speed becomes 0. Your attacks have disadvantage, attacks against you have advantage, and you have disadvantage on Dexterity saving throws.
Stunned	You are Incapacitated, cannot move and can speak only falteringly. You automatically fail Strength and Dexterity saving throws, and attacks against you have advantage.
Suppressed	Disadvantage on ranged weapon attacks; cannot willingly move closer to the source of Suppression; cannot take reactions. Full Cover may end Suppression as described in 6.3.
Surprised	If the GM determines you were unaware of danger when combat began, you are Surprised until the end of your first turn. While Surprised, you cannot move or take actions or bonus actions, and you cannot take reactions until that turn ends.
Unconscious	You are Incapacitated, cannot move or speak, are unaware of your surroundings, drop held items and fall Prone. You automatically fail Strength and Dexterity saves. Attacks against you have advantage, and a hit from within 5 ft is a critical hit.

Exhaustion

Some hazards, drugs and environmental effects cause levels of Exhaustion. Effects are cumulative. Removing one level removes only that level and any higher-level effects that no longer apply.

Level	Effect
1	Disadvantage on ability checks.
2	Speed halved.
3	Disadvantage on attack rolls and saving throws.
4	Maximum HP halved.
5	Speed becomes 0.
6	Death.

Unless a rule says otherwise, finishing a long rest while you have access to food, water, and a safe place to recover removes one level of Exhaustion.

SECTION 07

Weapon Properties

The armourer turns the weapon beneath a hanging lamp. A worn catch, a cracked seal and a poorly seated pack receive the same patient attention. Its last owner scratched a mark into the casing. Nobody explains what it meant.

Every tool asks something of the hand that carries it. Some reward patience; others demand room, preparation or a companion watching your back. Learn those demands before the alarm sounds. A weapon's reputation offers little comfort when you have mistaken its purpose.

7 Weapon Properties

Weapon save DC = 8 + proficiency bonus + the ability modifier used for that weapon. Where a property calls for a saving throw and does not name another DC, use the weapon save DC.

Property	Effect
Accurate	If you do not move this turn, gain +1 to hit with this weapon.
Armour-Breaking	Ignores half cover from armour plating or vehicle plating at GM discretion.
Beam	Choose a line 5 ft wide up to normal range. Creatures in the line make a Dexterity save, taking weapon damage on a failure or half on a success. Cannot be used for opportunity attacks.
Blast	Explosive or impact burst. Nearby creatures or objects may also be affected, usually with a Dexterity save for half damage.
Brutal	On a critical hit, roll one extra weapon damage die.
Burst	Take -2 to hit. On a hit, add one extra weapon damage die. Uses extra ammunition.
Chain	On a critical hit, roll one extra weapon damage die.
Close-Quarters	Does not suffer disadvantage when fired within 5 ft of an enemy.
Emplaced	Normally vehicle-, tripod- or brace-mounted. Normal infantry cannot move and fire it unless a feature, rig or GM-approved setup allows it.
Entangling	A creature hit must make a Dexterity save or have its speed reduced by 10 ft until the end of its next turn.
Finesse	Use Strength or Dexterity for attack and damage rolls.
Focus	Can be used as a psychic focus for powers or class features that require one.
Heavy	Requires Strength 15 or relevant training. Moving before firing may impose disadvantage.
Industrial	Also functions as a tool; advantage on appropriate cutting, breaching, mining, dismantling or salvage checks outside combat.
Light	Can be dual-wielded if appropriate.
Mechanicus	Requires Mechanicus training, augmetic interface or GM approval to use without penalty.
Monomolecular	On a critical hit, add one extra damage die. The GM may allow it to ignore improvised armour on lightly armoured targets.
Ogryn	Can only be used by Ogryns or specially modified users.
Overheat	On a natural 1, the wielder takes damage, and the weapon cannot be fired again until the end of their next turn.
Power Field	Counts as powered for overcoming resistance.
Psyker	Requires psychic training or a class feature that allows psyker weapons.
Reload X	Must reload after X shots or uses.
Shield	Can be used with shield features and may provide defensive benefits listed in its equipment entry.
Shock	Target must make a Constitution save or lose reactions until its next turn.
Silent	Does not automatically reveal the attacker's exact position when fired from hiding.
Spray	Uses an area saving throw instead of a normal attack roll.
Spirit Weapon	A Psyker may use their psychic ability modifier instead of Strength or Dexterity for attack and damage rolls.
Suppression	Can force Suppression saves.
Thrown	Can be thrown using its listed range or a GM-approved improvised range.
Twin-Linked	When you miss, once per turn you may reroll one damage die from the next successful hit scored with it before the end of your next turn.
Versatile X	Can be wielded in one or two hands; use the listed versatile die when wielded in two hands.

SECTION 08

Weapons

Cold air spills from the vault. Behind the grille, rows of worn weapons wait beneath numbered hooks. The quartermaster lifts one down, checks the action and sets it between you. It is heavier than you expected.

Others carried it before you. Their hands polished the grip; their repairs remain under the paint. For now, its history becomes part of your responsibility. Beyond the armoury door, the people beside you are deciding how much trust to place in the person carrying it.

8 Weapons

“The quartermaster records the weapon’s serial number. You may give it a name once you bring it back.” — Armoury instruction

Every weapon now lists a typical Availability grade. This is the default acquisition difficulty through an appropriate source, not a universal price or legality rating. See Chapter 18 for Requisition, provenance, modifications, salvage and replacement.

The weapon profiles below form the player armoury. Availability is handled separately in Chapter 18, so a weapon's combat profile does not need to change when its legal or logistical status changes.

Species-specific weapons normally require the appropriate training, body plan, interface or narrative access.

Equipment access
Every listed weapon has an Availability grade and a defined provenance route. Starting-equipment names match the profiles in this chapter, including dedicated Mechanicus weapons for Skitarii, the Ogryn Club, and listed Kin rifles for Hernkyn. Starting equipment is issued by the character's background or faction and does not require a Requisition test at character creation.

8.1 Imperial Ranged Weapons

Weapon	Damage	Range	Properties	Availability
Stub Pistol	1d6 piercing	40/120	Light, Reload 6	Issued
Laspistol	1d6 radiant	50/150	Light, Reload 12	Issued
Autopistol	1d6 piercing	40/120	Light, Burst, Reload 12	Issued
Hand Cannon	1d8 piercing	30/90	Reload 6	Controlled
Bolt Pistol	1d10 piercing	40/120	Brutal, Reload 8	Scarce
Plasma Pistol	2d8 radiant/fire	30/90	Overheat, Reload 4	Rare
Melta Pistol	2d10 fire	15/45	Armour-Breaking, Reload 2	Rare
Stub Rifle	1d8 piercing	70/210	Reload 10	Issued
Lascarbine	1d8 radiant	60/180	Reload 24	Issued
Lasgun	1d8 radiant	80/240	Reload 30	Issued
Hot-Shot Lasgun	1d10 radiant	70/210	Armour-Breaking, Reload 18	Scarce
Autogun	1d8 piercing	60/180	Burst, Suppression, Reload 30	Issued
Shotgun	1d10 piercing	30/90	Close-Quarters, Reload 8	Issued
Combat Shotgun	1d10 piercing	40/120	Close-Quarters, Suppression, Reload 8	Controlled
Long-Las	1d10 radiant	150/600	Accurate, Reload 10	Controlled
Needle Rifle	1d8 poison/piercing	80/240	Accurate, Silent, Reload 6	Scarce
Bolter	1d10 piercing + 1d4 thunder	80/240	Burst, Brutal, Reload 12	Scarce
Combi-Bolter	1d10 piercing + 1d4 thunder	60/180	Burst, Brutal, Twin-Linked, Reload 16	Rare
Flamer	3d6 fire	15-ft cone	Spray, Reload 4	Controlled
Plasma Gun	2d10 radiant/fire	80/240	Overheat, Reload 6	Rare
Meltagun	3d10 fire	30/90	Armour-Breaking, Reload 4	Rare
Grenade Launcher	By grenade	80/240	Heavy, Reload 1	Controlled
Heavy Stubber	1d12 piercing	120/360	Heavy, Burst, Suppression, Emplaced, Reload 40	Controlled
Heavy Bolter	1d12 piercing + 1d6 thunder	100/300	Heavy, Burst, Brutal, Suppression, Reload 30	Scarce
Multi-Laser	2d8 radiant	120/360	Heavy, Burst, Emplaced, Reload 40	Scarce

8.2 Imperial Melee Weapons

Weapon	Damage	Properties	Availability
Knife	1d4 piercing	Finesse, Light, Thrown	Issued
Combat Blade	1d6 piercing	Finesse, Light	Issued
Trench Club	1d6 bludgeoning	Light	Issued
Maul	1d8 bludgeoning	Versatile 1d10	Issued
Shock Maul	1d8 bludgeoning	Shock	Controlled
Chain Knife	1d6 slashing	Light, Chain	Controlled
Chainsword	1d8 slashing	Chain	Controlled
Heavy Chainsword	1d10 slashing	Heavy, Chain	Scarce
Power Sword	1d8 slashing	Finesse, Power Field	Rare
Power Axe	1d10 slashing	Power Field, Heavy	Rare
Power Maul	1d10 bludgeoning	Power Field, Shock	Rare
Thunder Hammer	2d6 bludgeoning	Heavy, Power Field, Shock	Exceptional
Force Sword	1d8 slashing	Psyker, Power Field	Rare
Force Staff	1d6 bludgeoning	Psyker, Focus	Rare
Omnissian Axe	1d10 slashing	Mechanicus, Power Field, Heavy	Rare
Relic Blade	1d10 slashing	Power Field, Brutal, Heavy	Exceptional
Heavy Axe	1d10 slashing	Heavy	Controlled

8.3 Ogryn Weapons

Weapon	Damage	Range	Properties	Availability
Ripper Gun	1d12 piercing	40/120	Ogryn, Burst, Suppression, Reload 20	Controlled
Kickback Shotgun	2d8 piercing	25/75	Ogryn, Close-Quarters, Brutal, Reload 4	Scarce
Grenadier Gauntlet	2d6 force/fire	40/120	Ogryn, Blast, Reload 1	Scarce
Twin-Linked Heavy Stubber	2d10 piercing	100/300	Ogryn, Heavy, Burst, Suppression, Reload 40	Scarce
Ogryn Club	1d12 bludgeoning	Melee	Ogryn, Heavy	Issued
Big Friendly Rock	1d10 bludgeoning	30/90	Ogryn, Thrown. Uses Strength. Large or smaller target hit: Strength save or be pushed 5 ft. Carry 2; replenish from suitable debris or after a short rest.	Improvised
Brute Shield Bash	1d8 bludgeoning	Melee	Ogryn, Shield	Controlled
Power Maul, Ogryn Pattern	2d6 bludgeoning	Melee	Ogryn, Power Field, Shock	Rare
Industrial Cutter	2d6 slashing	Melee	Ogryn, Heavy, Chain	Controlled
Slab Hammer	2d8 bludgeoning	Melee	Ogryn, Heavy, Brutal	Controlled

8.4 Squat / Kin Weapons

Weapon	Damage	Range	Properties	Availability
Autoch-Pattern Pistol	1d8 piercing	40/120	Light, Reload 8	Issued
Bolt Revolver	1d8 piercing + 1d4 thunder	40/120	Brutal, Reload 6	Controlled
Ion Pistol	1d8 radiant	40/120	Armour-Breaking, Reload 6	Scarce
Autoch-Pattern Bolter	1d10 piercing + 1d4 thunder	70/210	Brutal, Reload 12	Controlled
Ion Blaster	1d10 radiant	70/210	Armour-Breaking, Reload 12	Scarce
Magna-Rail Rifle	2d10 force	120/360	Accurate, Heavy, Armour-Breaking, Reload 2	Rare
Plasma Beamer	2d8 radiant/fire	60/180	Beam, Overheat, Reload 6	Rare
EtaCarn Mining Tool	1d10 slashing/fire	Melee	Heavy, Industrial, Armour-Breaking	Issued
Concussion Hammer	1d10 bludgeoning	Melee	Shock, Heavy	Controlled
Kin Power Axe	1d10 slashing	Melee	Power Field, Heavy	Rare
Plasma Axe	1d10 slashing/radiant	Melee	Power Field, Armour-Breaking	Rare
Concussion Gauntlet	1d8 bludgeoning	Melee	Shock, Light	Scarce

8.5 Aeldari Weapons

Weapon	Damage	Range	Properties	Availability
Shuriken Pistol	1d6 slashing	50/150	Light, Monomolecular, Reload 12	Issued
Shuriken Catapult	1d8 slashing	60/180	Burst, Monomolecular, Reload 24	Issued
Ranger Long Rifle	1d10 piercing	160/640	Accurate, Silent, Reload 6	Controlled
Aeldari Lasblaster	1d8 radiant	90/270	Burst, Reload 30	Controlled
Fusion Gun	3d10 fire	30/90	Armour-Breaking, Reload 4	Rare
Death Spinner	2d6 slashing	40/120	Entangling, Reload 8	Rare
Witchblade	1d8 slashing/psychic	Melee	Finesse, Psyker, Spirit Weapon	Rare
Singing Spear	1d8 piercing/psychic	30/90	Thrown, Psyker, Spirit Weapon	Rare
Aeldari Power Sword	1d8 slashing	Melee	Finesse, Power Field	Rare
Monomolecular Blade	1d6 slashing	Melee	Finesse, Light, Monomolecular	Issued
Corsair Sabre	1d6 slashing	Melee	Finesse, Light, Monomolecular	Controlled
Star Glaive	1d10 slashing	Melee	Finesse, Power Field, Heavy	Rare
Ghostsword	1d8 slashing/psychic	Melee	Finesse, Spirit Weapon, Power Field	Exceptional
Biting Blade	1d10 slashing	Melee	Heavy, Chain, Monomolecular	Rare
Executioner Blade	2d6 slashing	Melee	Heavy, Power Field	Exceptional

8.6 Mechanicus Weapons

Weapon	Damage	Range	Properties	Availability
Galvanic Rifle	1d10 piercing/radiant	100/300	Accurate, Mechanicus, Reload 12	Controlled
Radium Carbine	1d8 piercing/radiation	60/180	Burst, Mechanicus, Reload 24	Controlled
Arc Pistol	1d8 lightning	40/120	Shock, Mechanicus, Reload 6	Scarce
Arc Rifle	1d10 lightning	70/210	Shock, Mechanicus, Reload 10	Scarce
Taser Goad	1d8 lightning	Melee	Shock, Mechanicus	Controlled

SECTION 09

Armour

The breastplate has been repaired in three different colours. A strap refuses to sit flat until the attendant pulls it through a familiar notch. They press two fingers beneath the collar, check your breathing and tell you to move.

Protection carries a cost in weight, heat and the space needed to turn. It also carries the memory of hands that fitted it before yours. In the darkness of a breached corridor, you may have time to be grateful for one careful adjustment.

9 Armour

“Every dent is an argument you survived. Inspect the straps before making another.” — Barracks saying

Armour is split into general armour and species-pattern armour. Availability gives the usual difficulty of obtaining the item through an appropriate source. Species armour also requires the correct body plan, cultural access or technical support.

9.1 General and Imperial Armour

Armour	AC	Notes	Availability
Heavy Clothing	11 + Dex modifier	Civilian gear, robes, gang leathers.	Issued
Armoured Bodyglove	11 + Dex modifier	May be worn under coats or robes; concealable.	Controlled
Flak Vest	12 + Dex modifier	Light military protection; torso-focused.	Issued
Flak Armour	12 + Dex modifier	Standard military protection.	Issued
Flak Greatcoat	13 + Dex modifier, max +2	Bulky guard coat or reinforced trench gear.	Issued
Mesh Armour	13 + Dex modifier	Flexible advanced armour.	Controlled
Scout Carapace	14 + Dex modifier, max +3	Lighter carapace plates for scouts and infiltrators.	Controlled
Carapace Armour	15 + Dex modifier, max +2	Heavy tactical armour.	Controlled
Riot Armour	16 + Dex modifier, max +2	Arbites-style protection.	Controlled
Void Suit, Armoured	13 + Dex modifier	Sealed suit; advantage against vacuum exposure, gas and airborne toxins.	Controlled
Hazard Plate	14 + Dex modifier, max +1	Industrial protection; resistance to environmental fire or acid at GM discretion.	Controlled
Powered Carapace	17, max Dex +1	Rare; power-cell maintenance. Strength checks to carry, lift or shove gain +1d4.	Rare
Shield	+2 AC	Requires one hand.	Issued
Refractor Field	Special	Reaction: reduce damage by 1d10 + level once per short rest.	Rare
Conversion Field	Special	Reaction: reduce radiant, fire, force or thunder damage by 2d8 once per short rest; maximum roll emits bright light until your next turn.	Exceptional

9.2 Ogryn Armour

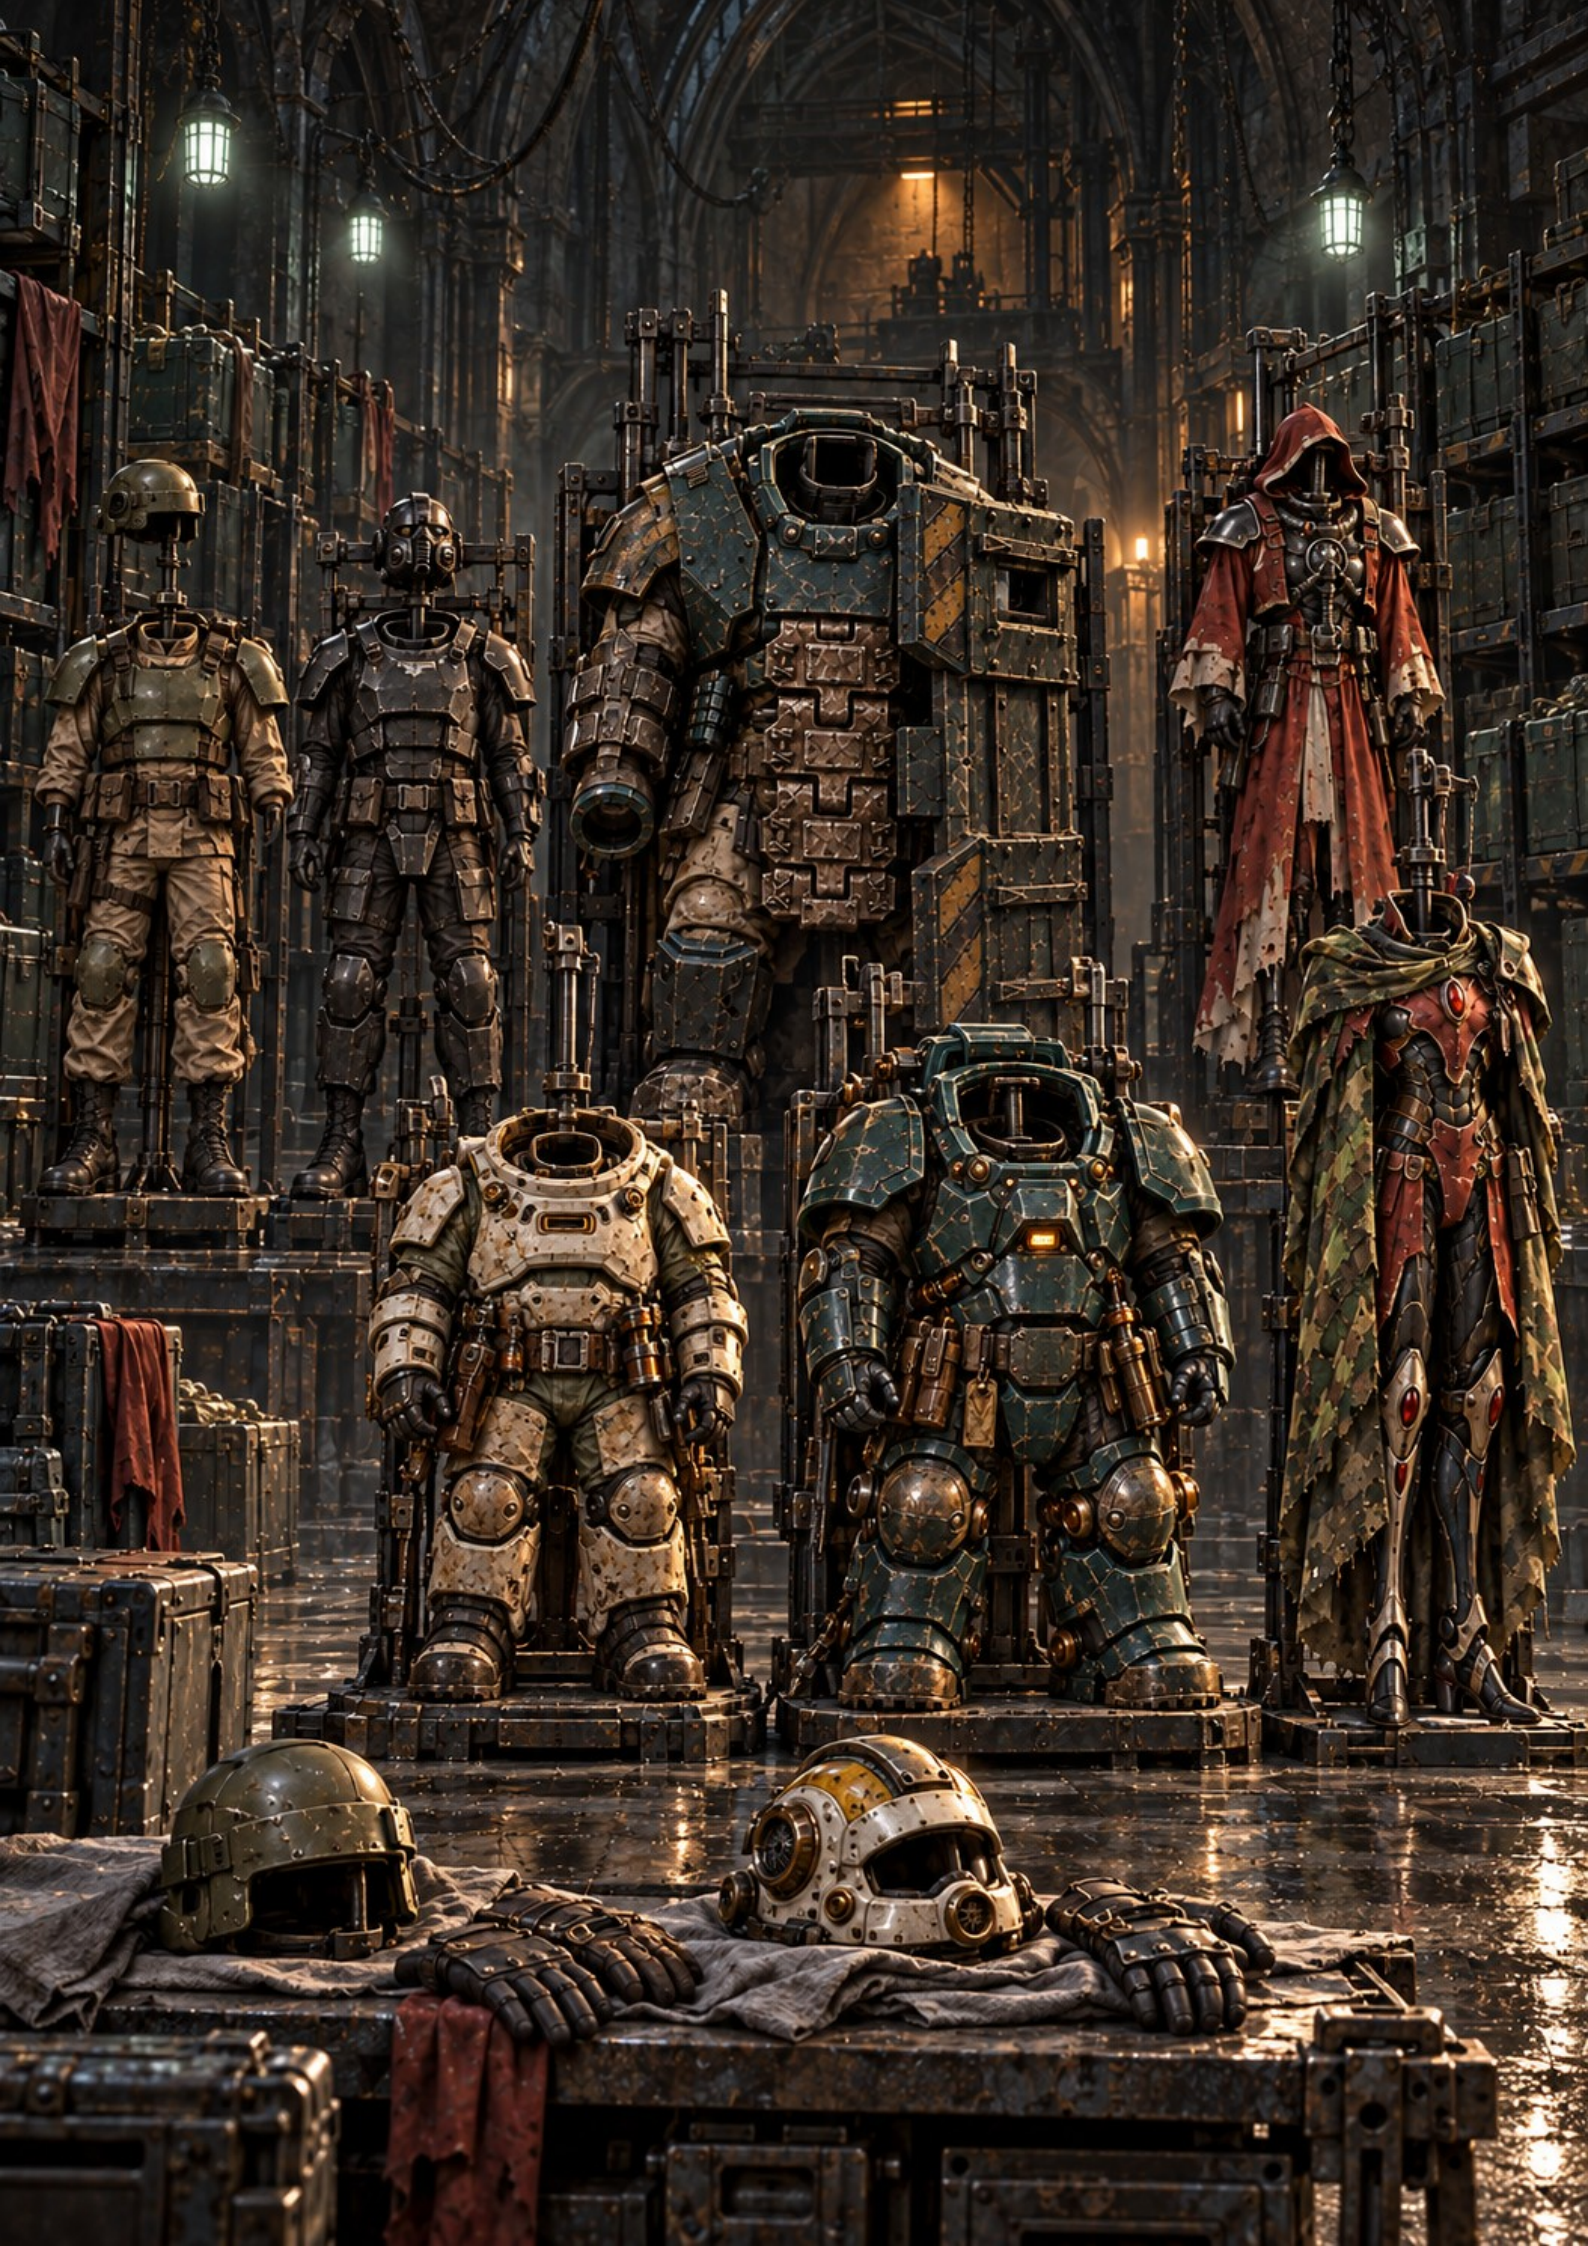
Armour	AC	Notes	Availability
Ogryn Leathers	12	Heavy straps, plates and reinforced hide.	Issued
Ogryn Flak Plate	14	Crude abhuman flak armour; does not limit Dexterity.	Controlled
Ogryn Plate	16	Standard modified abhuman armour.	Controlled
Bullgryn Plate	17	Speed reduced by 5 ft unless Strength is 18 or higher.	Scarce
Slab Shield	+2 AC	Ogryn only; speed reduced by 5 ft while carried.	Controlled
Brute Shield Harness	+2 AC	Leaves both hands partly usable; disadvantage on Stealth and delicate tool use.	Controlled

9.3 Squat / Kin Armour

Armour	AC	Notes	Availability
Kin Void Suit	13 + Dex modifier, max +2	Sealed suit; advantage against vacuum, gas and airborne toxins.	Controlled
Kin Mesh	14 + Dex modifier, max +2	Dense compact armour weave.	Controlled
Hearthkyn Plate	15 + Dex modifier, max +2	Advantage against being shoved while braced.	Controlled
Exo-Frame Plate	17, max Dex +1	Strength checks for lifting, carrying or breaching gain +1d4; speed -5 ft unless Strength 15+.	Rare
Prospector Rig	14 + Dex modifier, max +2	Climbing anchors, void seals and harness points; advantage on climbing, anchoring or forced-movement checks in low gravity.	Controlled

9.4 Aeldari Armour

Armour	AC	Notes	Availability
Aeldari Mesh	12 + Dex modifier	Light xenos mesh; no Stealth disadvantage.	Controlled
Ranger Weave	13 + Dex modifier	Advantage on Stealth in ruins, wilderness, ash wastes or shadowed terrain.	Controlled
Rune Armour	13 + Dex modifier	Once per short rest, reduce psychic, force or radiant damage by 1d8 + Wisdom modifier.	Rare
Aspect-Pattern Armour	15 + Dex modifier, max +3	Rare and path-bound; usually GM approval.	Rare
Holo-Field Cloak	Special	Once per short rest, impose disadvantage on one ranged attack against you if you moved at least 10 ft since the start of your last turn.	Rare



9.5 Armour Modifications

Armour modifications improve an existing suit rather than creating a second stacking layer of Armour Class. A normal suit has one modification slot. Powered Carapace, Exo-Frame Plate and similarly advanced armour may have two. An item cannot take the same modification twice unless a rule specifically allows it.

Modification	Typical Availability	Effect
Reinforced Plates	Controlled	Once per short rest, reduce damage from one non-critical weapon hit by your proficiency bonus.
Sealed System	Controlled	Advantage on saves against gas, smoke and airborne toxins; a suitable sealed suit also protects against brief vacuum exposure.
Camo Weave	Scarce	Advantage on one Stealth check per short rest when you have cover or concealment.
Shock Insulation	Scarce	Resistance to the first instance of lightning or electrical damage you take after each short rest.
Mag Boots / Anchor Rig	Controlled	Advantage on checks and saves against forced movement in low gravity, high winds or unstable surfaces.
Medicae Harness	Scarce	Once per short rest, use a Med-Stim on yourself as a bonus action.
Servo Assist	Rare	Add +1d4 to one Strength check per short rest involving lifting, forcing or breaching.
Hexagrammic Lining	Rare	Advantage on the first saving throw against a psychic or daemonic effect after each long rest.

Species-pattern armour may use culturally appropriate versions of these upgrades. Aeldari, Kin, Mechanicus and Ogryn modifications can have different names without changing the underlying rule unless a dedicated item says otherwise.

9.6 Ogryn Armour Modifications

Ogryn armour upgrades are built around mass, recoil control and acting as mobile cover. They are not simply human upgrades enlarged with more rivets.

Modification	Availability	Effect
Reinforced Harness	Controlled	Ogryn armour only. Once per short rest, reduce damage from one non-critical bludgeoning, piercing, or slashing hit by 1d6 + your Constitution modifier.
Slab-Lock Bracing	Controlled	Slab Shield only. If your Strength is 18 or higher, the shield no longer reduces your speed. While braced, you have advantage on saves against being moved.
Recoil Yoke	Scarce	When using an Ogryn or Heavy ranged weapon, ignore the first movement-based penalty from the Heavy property each turn.
Blast Baffles	Scarce	Gain advantage on Dexterity saves against Blast and Spray effects while wearing Ogryn Plate or Bullgryn Plate.

9.7 Skitarii Armour Modifications

Skitarii modifications are integrated into cybernetic interfaces and sacred warplate. Installation normally requires Mechanicus access.

Modification	Availability	Effect
Ablative Ceramite	Scarce	Once per short rest, when a weapon attack scores a critical hit against you, treat it as a normal hit instead. Other critical effects still apply if the attack explicitly says they cannot be negated.
Rad-Seal Shrouds	Controlled	Advantage on saves against radiation and contaminated atmospheres. The first time you take radiation damage after a short rest, reduce it by your proficiency bonus.
Servo-Bracing	Scarce	When firing a Heavy or Mechanicus weapon, you may count as stationary if you moved no more than 10 ft this turn.
Noospheric Armour Link	Rare	Once per short rest, after you or an ally within 30 ft rolls a ranged attack, add +1d4 to the roll before the result is declared. Requires a functioning auspex or noospheric link.

9.8 Kin Armour Modifications

Kin armour emphasises void survival, redundant engineering and the refusal to be moved from ground already claimed.

Modification	Availability	Effect
Void-Seal Redundancy	Controlled	A sealed Kin suit remains functional after one breach each mission; the breach is sealed automatically at the end of the current turn unless the armour is Ruined.
Grav-Anchor Spurs	Controlled	When you move no more than half your speed, add +1d4 to saves against being shoved, knocked prone, or moved against your will.
Ancestor-Wrought Plating	Rare	Once per short rest, reduce the extra damage dice of a critical hit against you by one die, minimum the weapon's normal damage.
Exo-Servo Overdrive	Rare	Exo-Frame Plate only. Ignore its speed penalty and gain advantage on one Strength check per short rest involving breaching, lifting, or carrying.

9.9 Aeldari Armour Modifications

Aeldari armour upgrades use responsive psycho-reactive materials rather than brute reinforcement. They favour motion, deception and psychic protection.

Modification	Availability	Effect
Holo-Weave Matrix	Rare	Once per short rest, after moving at least 10 ft, impose disadvantage on the next ranged attack made against you before your next turn.
Spirit-Stone Lattice	Rare	Once per short rest, add +1d4 to a saving throw against a psychic or daemonic effect after seeing the roll but before the result is declared.
Adaptive Weave	Scarce	You do not suffer Stealth disadvantage from the armour, and you ignore difficult terrain caused by rubble, foliage, loose debris, or similar ground during the first 10 ft you move each turn.
Ghostplate Flexors	Rare	Aspect-Pattern Armour or Rune Armour only. Once per short rest, when an attack misses you, move 5 ft without provoking opportunity attacks.

SECTION 10

Grenades

The munitions case opens with a reluctant hiss. Each charge rests in its own recess, separated from its neighbours by worn packing. The handler counts them aloud and waits until you repeat the number.

Small objects can change a room beyond recognition. Before the breach, the squad rehearses who will move, who will wait and which opening must remain clear. Nobody treats the case casually. Once it closes, the handler checks the catches again.

10 Grenades

Grenade save DC = 8 + proficiency bonus + Dexterity modifier unless a feature states otherwise.

10.1 Throwing Grenades

Unless a grenade profile says otherwise, throwing a grenade uses an action and has a range of 30/90 ft. Choose a point or target within range. Drawing the grenade is part of the action if you have a free hand; a Grenade Bandolier or specific feature may improve access.

Area grenades thrown to a point within 30 ft require no attack roll. If the chosen point is beyond 30 ft and within 90 ft, make a DC 10 Dexterity check. On a success, the grenade lands at the chosen point. On a failure, it lands 10 ft short along the line of the throw. Creatures in the grenade's area then make the listed saving throw. A single-target grenade such as a Krak Grenade uses a ranged weapon attack at 30/90 ft instead.

A grenade is expended once thrown or used, whether or not it hits. Unless a feature says otherwise, you may throw only one grenade with an action.

Grenade	Effect	Availability
Frag Grenade	15-ft radius; Dexterity save; 3d6 piercing damage.	Controlled
Frag Bomb	Ogryn only. 20-ft radius; Dexterity save; 4d6 piercing damage and knocked prone on a failure; half damage and not knocked prone on a success.	Controlled
Krak Grenade	Single-target ranged attack; 3d10 force/fire damage.	Controlled
Smoke Grenade	20-ft radius heavily obscured area for 1 minute.	Controlled
Stun Grenade	10-ft radius; Constitution save or stunned until the end of the next turn.	Controlled
Firebomb	10-ft radius; Dexterity save; 2d6 fire damage and burning ground.	Controlled
Rad Grenade	10-ft radius; Constitution save or poisoned for 1 minute.	Scarce

SECTION 11

Classes

At the sealed door, each traveller notices something different. The soldier studies the firing angles. The scout listens to the ventilation. A gloved hand pauses over a ward, while the largest member of the group considers the hinges.

They have arrived with skills learned in places the others may never see. The mission will ask for more than any one of them can provide. Before the door opens, there is just enough time to decide who goes first—and to trust that somebody will follow.

11.1 / CLASS LORE

Veteran

Veterans carry a regiment's habits long after its colours have vanished from sight. They check the exits, recognise an empty charge pack by its weight, and notice when a companion has stopped answering. The Imperial Guard draws soldiers from worlds with very different traditions; survival adds lessons no drill ground can supply. In a small warband, that experience becomes a responsibility: someone has to judge when to advance, when to hold, and when the mission is no longer worth another life.

Shock Trooper

The first through a breach or across an exposed street, a Shock Trooper relies on practised movement and the fire of the people beside them. Courage may be little more than doing the next necessary thing while fear insists otherwise.

Marksman

A Marksman learns to wait inside discomfort. A shifting silhouette, a glimpse of equipment or one careless movement can settle a long vigil. Away from the firing position, that patience may become watchfulness, reserve, or a reluctance to waste anything.

Sergeant

A Sergeant knows which voice will steady a wavering line. Authority may come from rank, experience, or simply being the person who remained. The hardest orders are often the quiet ones, given when there is nobody left to promise a clean victory.

11 Classes

The class framework supports twelve distinct classes. Reward-tier wargear complements class progression and the core combat rules.

This Player's Handbook supports levels 1-20. Class tables show the full progression, so each

class is easier to read at the table.

Unless a feature says otherwise, a class gains an Ability Score Improvement or Talent at levels 4, 8, 12, 16,

and 19.

11.1 Veteran

Professional soldier, marksman, squad leader, or hardened guardsman.

Allowed Species: Human, Ratling.

Hit Die: d10.

Primary Abilities: Dexterity, Wisdom.

Saving Throws: Dexterity, Wisdom.

Armour: Light, medium, flak, carapace.

Weapons: Simple weapons, martial melee weapons, pistols, basic firearms, grenades.

20	Lord Castellan's Moment

11.1.1 Guardsman Training

Gain proficiency in two skills from Athletics, Insight, Intimidation, Medicine, Perception, Stealth, and Survival. You also gain proficiency with one specialist weapon group: sniper weapons, plasma weapons, melta weapons, or heavy weapons.

11.1.2 Tactical Aim

As a bonus action, choose one creature you can see within weapon range. Until the end of your turn,

your next ranged weapon attack against that creature deals bonus damage equal to your proficiency

bonus.

11.1.3 Suppressing Fire

When using a weapon with Burst or Suppression, you may force one target you attacked this turn to

make a Wisdom saving throw. On a failure, it becomes Suppressed.

11.1.4 Regimental Doctrine

Doctrine	Benefit
Shock Trooper	Once per turn, when you hit with a lasgun, autogun, shotgun, or bolter, deal +1d6 damage.
Marksman	If you did not move this turn, your first ranged attack gains +2 to hit.
Sergeant	Allies within 30 ft who can hear you gain +1 to initiative and fear saves.

11.1.5 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.1.6 Fire Team Veteran

When you hit a creature with a ranged weapon attack, one ally within 30 ft who can see or hear you

gains +1 to their next attack roll against that creature before the start of your next turn. Uses:

proficiency bonus per long rest.

11.1.7 Doctrine Feature

Doctrine	Feature
Shock Trooper	Once per short rest, reroll one damage die for a lasgun, autogun, shotgun, or bolter.
Marksman	Accurate weapons gain +1 damage when you did not move.
Sergeant	When an ally within 30 ft fails a fear or Suppression save, use your reaction to let them reroll it.

11.1.9 Hold the Line

While you are in cover, allies within 5 ft of you also gain advantage on saving throws against

Suppression.

11.1.10 Killing Zone

Once per short rest, choose a 20-ft area you can see. Until the start of your next turn, the first time each

hostile creature enters that area or leaves cover inside it, you may make one ranged weapon attack

against it as a reaction. You still only have one reaction.

11.1.11 Veteran’s Accuracy

Once per turn, when you hit with a ranged weapon attack, add +1d6 damage if you had cover, did not

move, or were benefiting from an ally’s mark or order.

11.1.13 Battlefield Instinct

You cannot be surprised while conscious. When initiative is rolled, you may move up to 10 ft before the

first turn begins, provided this movement ends in cover or closer to an ally.

11.1.14 Improved Doctrine

Doctrine	Improved Feature
Shock Trooper	Your Shock Trooper bonus becomes +1d8.
Marksman	Your first ranged attack each turn ignores light cover.
Sergeant	Allies benefiting from your Sergeant doctrine add +1d4 to their first failed fear or Suppression save each combat.

11.1.15 Kill Confirmed

Once per short rest, when you hit a creature with a ranged weapon attack, turn the hit into a critical hit. If the target is already bloodied, Suppressed, prone, or exposed out of cover, add an extra 2d6 damage after resolving the critical hit.

11.1.17 Veteran’s Command

When you use Tactical Aim, choose one ally within 30 ft who can see or hear you. That ally may

add your proficiency bonus to their next weapon damage roll against the same target before the

start of your next turn.

11.1.18 Dug-In Kill Team

While you are in cover, allies within 10 ft of you gain +1 AC against ranged attacks and +1 to

saving throws against Suppression. This bonus ends for an ally if they move more than half

their speed away from cover.

11.1.20 Lord Castellan’s Moment

Once per long rest, for 1 minute, you may use Tactical Aim at the start of each of your turns without spending a bonus action. Once per round when you hit the aimed target, choose one ally within 30 ft who can see or hear you. That ally may reload one weapon without using an action, move 10 ft without provoking opportunity attacks, or add +1d6 damage to its next hit against that target before your next turn.

11.2 / CLASS LORE

Zealot

Faith can give a frightened person a language for courage. Across the Imperium, preachers, pilgrims and penitents carry beliefs learned in crowded shrines and inherited through generations. A Zealot takes those convictions into danger, drawing strength from ritual, sacrifice or the certainty that a duty remains unfinished. In a warband, fervour can inspire others, but it also tests how much room the believer leaves for doubt. Decide whom your character's faith obliges them to protect, and what act of mercy they would defend even before a harsher authority.

Preacher

Words become an anchor amid panic. A Preacher may know a congregation by name, carry a battered devotional book, or speak most persuasively when admitting that they are afraid too.

Flagellant

Penance gives suffering a purpose, at least in the penitent’s own eyes. Consider the promise behind that severity, and whether a companion might teach them to value survival as well as sacrifice.

Purifier

The Purifier confronts threats with cleansing flame and fierce resolve. Their certainty is most interesting when the people needing rescue are close to the danger they have sworn to destroy.

11.2 Zealot

Fanatic, martyr, firebrand, preacher, and close-combat executioner.

Allowed Species: Human.

Hit Die: d10.

Primary Abilities: Strength or Dexterity, Charisma or Wisdom.

Saving Throws: Strength, Charisma.

Armour: Light, medium, flak, carapace.

Weapons: Simple weapons, martial melee weapons, pistols, flamers, and chain weapons.

Level	Features
1	Fury of Faith, Martyr's Endurance, Martyr's Mercy
2	Charge of Conviction
3	Sacred Path
4	Ability Score Improvement / Talent
5	Extra Attack
6	Blood and Benediction
7	Sacred Path Feature
8	Ability Score Improvement / Talent
9	Refuse the Dark
10	Sainted Fury
11	Martyr's Renewal
12	Ability Score Improvement / Talent
13	Unbroken Creed
14	Sacred Path Feature
15	Living Saint's Shadow
16	Ability Score Improvement / Talent
17	Martyrdom Unending
18	Sacred Path Ascendant
19	Ability Score Improvement / Talent
20	Living Icon of Wrath

11.2.1 Fury of Faith

Once per turn, when you hit with a melee weapon attack, you may deal extra radiant or fire damage

equal to your proficiency bonus.

11.2.2 Martyr's Endurance

When you are below half your maximum hit points, you gain +1 AC and advantage on saving throws

against being frightened.

11.2.3 Martyr's Mercy

As an action, touch yourself or one willing creature. The target regains hit points equal to 1d6 + your

Wisdom or Charisma modifier. Uses: proficiency bonus per long rest.

11.2.4 Charge of Conviction

As a bonus action, move up to your speed toward a hostile creature you can see. If you end this

movement within melee range, your next melee attack this turn deals +1d6 damage. Uses: proficiency

bonus per long rest.

11.2.5 Sacred Path

Path	Benefit
Preacher	Allies within 30 ft gain advantage on fear saves while you are conscious.
Flagellant	Once per round, when you take damage, your next melee attack deals +1d6 bonus damage.
Purifier	You gain proficiency with flamers. Once per turn, fire damage you deal ignores resistance.

11.2.6 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.2.7 Blood and Benediction

When you damage a hostile creature with Fury of Faith, choose one ally within 30 ft who can hear you.

That ally regains hit points equal to your proficiency bonus. You can trigger this healing once per round.

11.2.8 Sacred Path Feature

Sacred Path	Feature
Preacher	When you use Martyr's Mercy, the target also gains advantage on its next saving throw against fear.
Flagellant	When you take damage, gain temporary HP equal to your proficiency bonus.
Purifier	Your flamer and firebomb damage increases by +1 per damage die against daemons, heretics, mutants, and corrupted creatures.

11.2.9 Refuse the Dark

Once per long rest, when you or an ally within 30 ft would drop to 0 hit points, you may use your

reaction to let the target drop to 1 hit point instead.

11.2.10 Sainted Fury

As a bonus action once per long rest, enter a sainted fury for 1 minute. Your Fury of Faith damage becomes 1d8 + your proficiency bonus. During this time, you have advantage on saving throws against fear and corruption effects.

11.2.11 Martyr's Renewal

When you use Martyr's Mercy, roll 2d6 instead of 1d6. If the target is below half hit points, add your

proficiency bonus to the healing.

11.2.13 Unbroken Creed

You are immune to the frightened condition while below half your maximum hit points. Allies within 10

ft of you have advantage on saves against fear while you are conscious.

11.2.14 Sacred Path Feature

Sacred Path	Feature
Preacher	Once per long rest, as an action, up to three allies within 30 ft regain hit points equal to 2d6 + your Wisdom or Charisma modifier.
Flagellant	Once per turn, when you are below half hit points, your melee attacks deal +1d8 radiant or fire damage.
Purifier	Your fire damage ignores resistance, and daemons/corrupted creatures cannot regain hit points until the start of your next turn after taking your fire damage.

11.2.15 Living Saint’s Shadow

Once per long rest, when you are reduced to 0 hit points but not killed outright, or when you fail a death saving throw, you instead stand with 1 hit point, end the prone condition on yourself, and emit a 30-ft aura until the end of your next turn. Allies in the aura gain advantage on attack rolls and saving throws against fear.

11.2.17 Martyrdom Unending

When you are below half your maximum hit points, your Martyr’s Mercy restores an additional 1d6 hit points. You also have advantage on saving throws against psychic intimidation and corruption effects; you remain immune to the frightened condition while Unbroken Creed applies.

11.2.18 Sacred Path Ascendant

Your Sacred Path reaches its heroic form.

Sacred Path	Ascendant Feature
Preacher	Allies within 30 ft also gain +1d4 to fear saves.
Flagellant	The first time each round you take damage, gain temporary HP equal to twice your proficiency bonus.
Purifier	When you deal fire damage, one affected creature cannot benefit from cover against your next attack before your next turn.

11.2.20 Living Icon of Wrath

Once per long rest, for 1 minute, your Fury of Faith applies to every melee hit rather than once

per turn. If you would drop to 0 hit points during this minute, you may immediately use

Martyr’s Mercy on yourself before falling unconscious.

11.3 / CLASS LORE

Psyker

A human psyker draws upon a realm in which thought and emotion have terrible power. The Imperium needs such gifts while fearing what may follow them into reality. Training, sanctioning and constant scrutiny shape many survivors; others live with concealment and the knowledge that discovery could end everything. Within a warband, trust is earned through restraint as much as spectacle. The disciplines below describe this conversion's character roles. The Blank / Null-Bound option is an exceptional accommodation: a true blank suppresses the Warp and is not an ordinary spellcasting psyker.

Biomancer

The workings of living flesh become a focus of attention. Healing and alteration carry intimate responsibilities when another person must place their body in your hands.

Telekine

Pressure and motion answer the will. A Telekine may practise with small, precise movements to retain control when fear demands something far more violent.

Diviner

Glimpses of possible futures rarely arrive with complete explanations. Decide how your seer copes when a warning helps one companion but frightens another.

Pyromancer

Fire is both familiar and unforgiving. Ritual restraint, measured breathing or a remembered disaster can give this dangerous discipline a personal history.

Malefic-Touched

Contact with darker powers leaves questions that companions may fear to ask. This path concerns perilous proximity to the daemonic, never an assurance of mastery.

Blank / Null-Bound

An absence in the Warp can unsettle those nearby. Consider the loneliness of that effect, and the companions who have learned to remain beside you.

11.3 Psyker

A sanctioned psychic operative walking the knife-edge between weapon and catastrophe.

Allowed Species: Human only.

Hit Die: d6.

Primary Abilities: Intelligence or Wisdom.

Saving Throws: Intelligence, Wisdom.

Armour: Light armour.

Weapons: Simple weapons, pistols, and force weapons.

Special: Uses Psychic Powers and Perils of the Warp.

11.3.1 Psychic Discipline

Blank / Null-Bound is a GM-permission discipline. It represents a sanctioned blank, null-scarred operative, or anti-psyker weapon rather than a conventional Warp-channelling psyker.

Blank / Null-Bound characters may learn Universal and Null powers, cannot learn Malefic

powers, and should be rare in the same way as Aeldari player characters.

When a Psyker chooses a Psychic Discipline, that choice determines which non-universal powers they

can learn. A Psyker may always learn Universal powers. They may only learn discipline-locked powers

from their chosen discipline unless the GM grants an exception through a relic, corruption event,

mentor, sanctioning scar, or major campaign reward.

Discipline	Allowed Power Tags	Theme
Biomancer	Universal, Biomancy	Healing, endurance, flesh control, toxins, and forced growth.
Telekine	Universal, Telekinesis	Force shields, kinetic movement, crushing pressure, battlefield control.
Diviner	Universal, Divination	Foresight, danger sense, accuracy, fate manipulation, and reading echoes.
Pyromancer	Universal, Pyromancy	Fire, soul-burning, area denial, purging flame.
Malefic-Touched	Universal, Malefic	High-risk damage, fear, possession pressure, daemonic resonance. Using Malefic powers should attract harsher narrative consequences.
Blank / Null-Bound	Universal, Null	Anti-psychic pressure, witch-hunting, null aura, Warp denial. This rare path should require GM approval because true blanks are not normal psykers.

11.3.2 Psychic Ward

When you or an ally within 30 ft takes damage, you may use your reaction to reduce the damage by 1d8

+ your psychic ability modifier. Using this feature increases your Warp Pressure by 1.

11.3.3 Discipline Feature

Discipline	Feature
Biomancer	When you heal a creature, it gains temporary hit points equal to your proficiency bonus.
Telekine	When you cast a force power, you may push the target 10 ft on a failed save.
Diviner	Once per short rest, add or subtract 1d4 from a d20 roll made by a creature you can see.
Pyromancer	Fire powers deal +1 damage per damage die.
Malefic-Touched	When you trigger Perils, your next psychic power deals +1d8 damage.

Discipline	Feature
Blank / Null-Bound	You have advantage on saving throws against psychic powers and Perils effects. When a creature you can see within 30 ft gains Warp Pressure, you may use your reaction to reduce psychic damage dealt to one ally by your proficiency bonus.

11.3.5 Empowered Manifestation

At level 5, once per short rest, you may cast a psychic power as Empowered without increasing its warp pressure cost.

11.3.6 Disciplined Channel

Once per short rest, after using a power from your chosen discipline, reduce the Warp Pressure gained

by that power by 1, minimum 1.

11.3.7 Discipline Feature

Discipline	Feature
Biomancer	Your healing powers also end one minor bleeding or poison effect.
Telekine	Your forced movement increases by 5 ft.
Diviner	When you use a reaction power, you may move 5 ft without provoking opportunity attacks.
Pyromancer	Creatures damaged by your Pyromancy powers cannot benefit from invisibility until your next turn.
Malefic-Touched	When you frighten a creature with a Malefic power, you gain temporary HP equal to your proficiency bonus.
Blank / Null-Bound	When you reduce psychic damage or resist a psychic effect, one hostile psyker or daemon within 30 ft has disadvantage on its next Wisdom or Charisma saving throw before the end of your next turn.

11.3.9 Warp Anchor

When Perils triggers, roll twice on the Perils severity roll and use the lower result. Once you use this

feature, you cannot use it again until a long rest.

11.3.10 Mastered Manifestation

Once per short rest, you may use one Standard power from your chosen discipline as if Empowered without paying the additional Empowered Warp Pressure cost. Mastered Manifestation and Empowered Manifestation cannot both reduce the cost of the same power.

11.3.11 Major Power Access

You may learn Major Psychic Powers from your chosen discipline. You may know only one Major Power

at level 11 unless a class feature, relic, mentor, or campaign reward grants another.

11.3.13 Sanctioned Focus

When you Vent as an action, reduce Warp Pressure by 1d6 + proficiency bonus on a successful save

instead of 1d4 + proficiency bonus. On a failure, you still reduce Warp Pressure by 1.

11.3.14 Discipline Feature

Discipline	Feature
Biomancer	Once per long rest, when a creature you can touch drops to 0 hit points, it drops to 1 hit point instead.
Telekine	Once per short rest, when you use Psychic Ward, you may also push the attacker 10 ft.
Diviner	Once per long rest, replace a d20 roll made by a creature you can see with a 10 before modifiers.
Pyromancer	Once per short rest, your Pyromancy power ignores fire resistance.
Malefic-Touched	Once per long rest, after triggering Perils, you may choose to gain 1 Corruption to treat the Perils result as Warp Static.
Blank / Null-Bound	Once per long rest, when a creature within 60 ft triggers Perils, you may force it to reroll the Perils severity roll and use the lower result if it is an ally, or the higher result if it is hostile.

11.3.15 Alpha-Level Risk

Once per long rest, you may cast one Major Power as Empowered without the additional Empowered

Warp Pressure cost. After resolving the power, roll for Perils twice if Perils triggers and use the higher

severity result. This feature should feel powerful, frightening, and narratively dangerous.

11.3.17 Soul-Bound Discipline

Choose one power from your chosen discipline. Once per short rest, you may use that power

without increasing Warp Pressure by 1, minimum total cost 1. Blank / Null-Bound characters

may instead choose one Null power.

11.3.18 Warp-Crowned Focus

When you trigger Perils, you may choose to gain 1 Corruption to reduce the severity roll by 1d6

after seeing the result. Malefic-Touched Psykers cannot use this to reduce Catastrophic Perils

below Reality Tear.

11.3.20 Sanctioned Apex

Once per long rest, when you cast a Major Power, you may apply two different Empowered

options to it. Increase Warp Pressure only once for Empowering, but if Perils triggers, add +2 to

the severity roll.

11.4 / CLASS LORE

Ogryn Skullbreaker

An Ogryn's arrival changes the shape of a fight. Doorways become obstacles, ordinary weapons become fragile, and comrades discover what it means to shelter behind someone who refuses to move. Imperial forces prize that strength, often without troubling to learn the individual carrying it. A Skullbreaker can bring loyalty, humour and a clear sense of responsibility to a warband. Their equipment should feel built for enormous hands and punishing use. Give your character a duty they understand completely, and someone whose trust matters more than an impressive rank.

Bulwark

The shield is a promise made visible. A Bulwark measures success by the people still standing behind them when the incoming fire finally stops.

Gun Lugger

Heavy weapons demand confidence, endurance and attention to the ammunition. The Gun Lugger may know their cumbersome gun as intimately as another soldier knows a treasured knife.

Bone ’ead

A cranial implant can help an Ogryn shoulder greater tactical responsibility. Orders now arrive with difficult choices, especially when protecting friends means interpreting what a commander intended.

Brute

A Brute meets resistance at close quarters. Their great strength may be frightening in battle and carefully restrained around the small, fragile things they value.

11.4 Ogryn Skullbreaker

A walking wall of muscle, loyalty, and violence.

Allowed Species: Ogryn only.

Hit Die: d12.

Primary Abilities: Strength, Constitution.

Saving Throws: Strength, Constitution.

Armour: Modified heavy armour, Ogryn armour, Ogryn plate.

Weapons: Ogryn weapons, simple melee weapons, heavy blunt weapons, ripper guns.

Level	Features
1	Big Lad, Loyal Protector
2	Brutal Impact
3	Ogryn Role
4	Ability Score Improvement / Talent
5	Extra Attack
6	Too Stubborn to Drop
7	Role Feature
8	Ability Score Improvement / Talent
9	Living Barricade
10	Thunderous Violence
11	Bigger and Meaner
12	Ability Score Improvement / Talent
13	Can't Keep Him Down
14	Role Feature
15	Walking Fortress
16	Ability Score Improvement / Talent
17	Mountain of Muscle
18	Role Feature
19	Ability Score Improvement / Talent
20	Unkillable Big Lad

11.4.1 Big Lad

You count as one size larger for grappling, shoving, carrying, lifting, dragging, and breaking objects. You

gain proficiency in Athletics. Due to your enormous bulk and slow reactions in cramped spaces, your

Dexterity score is reduced by 2, to a minimum of 6. This penalty is applied after the species ability score

increases. You cannot benefit from armour, stealth gear, or weapons that require a normal human

frame unless they are modified for Ogryn use.

11.4.2 Loyal Protector

When an ally within 5 ft is targeted by an attack, and you can see the attacker, you may use your reaction before the attack roll is resolved to impose disadvantage on that roll. If the attack still hits, you may choose to take half of the damage dealt to the ally; that transferred damage cannot be reduced again by Loyal Protector.

11.4.3 Brutal Impact

Once per turn, when you hit with a melee weapon, force the target to make a Strength saving throw. DC

= 8 + proficiency bonus + Strength modifier. On a failure, the target is pushed 10 ft.

11.4.4 Ogryn Role

Role	Benefit
Bulwark	While using a shield, allies behind you gain light cover.
Gun Lugger	You can use heavy weapons without the normal movement penalty.
Bone 'ead	You gain proficiency in Wisdom saves and one additional skill.
Brute	Once per turn, when you hit with a melee weapon, deal +1d6 damage.

11.4.5 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.4.6 Too Stubborn to Drop

Once per long rest, when you are reduced to 0 hit points but not killed outright, you drop to 1 hit point

instead.

11.4.7 Role Feature

Ogryn Role	Feature
Bulwark	While using a shield, you also gain advantage on saves against being shoved.
Gun Lugger	Your first ranged Ogryn weapon attack each turn deals +1d6 damage.
Bone 'ead	Once per short rest, when you or an ally within 10 ft fails a Wisdom or Intelligence saving throw against fear, psychic manipulation, confusion, or Suppression, you may use your reaction to let that creature reroll the save.
Brute	Your Brute damage becomes +1d8.

11.4.9 Living Barricade

While you are not incapacitated, allies within 5 ft behind you count as having light cover. If you are

using a slab shield, they count as having heavy cover instead.

11.4.10 Thunderous Violence

Once per short rest, when you hit with a melee weapon or Ogryn weapon, deal an additional 2d8 damage

and force the target to make a Strength saving throw. On a failure, it is knocked prone.

11.4.11 Bigger and Meaner

Your melee weapon attacks and Ogryn weapon attacks score a critical hit on a roll of 19-20 against

creatures smaller than you.

11.4.13 Can’t Keep Him Down

When you spend Hit Dice during a short rest, treat any roll of 1 or 2 as a 3. If you begin your turn below

half hit points, you may end one frightened or suppressed condition affecting you.

11.4.14 Role Feature

Ogryn Role	Feature
Bulwark	Allies benefiting from cover provided by your slab shield have advantage on Dexterity saving throws against Blast and Spray effects, and ignore the first 5 ft of forced movement they would suffer each round.
Gun Lugger	You ignore disadvantage from firing Heavy or Ogryn weapons after moving.
Bone ’ead	Once per long rest, treat a failed Wisdom or Intelligence saving throw as a success.
Brute	Once per turn, when you push or knock a creature prone, deal bludgeoning damage equal to your Strength modifier.

11.4.15 Walking Fortress

Once per long rest, for 1 minute, gain resistance to bludgeoning, piercing, and slashing damage from non-powered weapons. During this time, your speed cannot be reduced unless you are incapacitated.

11.4.17 Mountain of Muscle

Your maximum hit points increase by an additional 10, and you have advantage on Strength

saves against being restrained, knocked prone, moved, or swallowed.

11.4.18 Role Feature

Ogryn Role	Feature
Bulwark	While using a slab shield, adjacent allies also gain resistance to damage from opportunity attacks.
Gun Lugger	Once per turn, your heavy ranged weapon hit deals +1d8 damage.
Bone ’ead	Allies within 10 ft gain +1 to Wisdom saves while you are conscious.
Brute	Your melee critical hits knock targets prone if they fail a Strength save.

11.4.20 Unkillable Big Lad

Once per long rest, for 1 minute, you gain temporary HP equal to twice your level. While these

temporary hit points remain, you cannot be frightened or suppressed, and you count as full

cover for one Small or Medium ally directly behind you.

11.5 / CLASS LORE

Arbites Enforcer

The Adeptus Arbites uphold Imperial law and the authority of the wider Imperium. Their work differs from the ordinary policing carried out by local planetary enforcers, though both can become entangled in the same unrest. An Arbites character brings institutional purpose, training and the expectation that orders will be obeyed. Detached from a precinct, that authority meets practical limits. Decide whether your character trusts procedure because it protects the truth, because it protects the Imperium, or because without it they would have to face uncertainty alone.

Riot Shield

Holding a line means reading a crowd as well as bracing against it. This specialist is accustomed to pressure, confined approaches and the responsibility of covering nearby officers.

Executioner

The sentence has been passed, and someone must enforce it. Consider what your character needs to know before acting, and whose signature they would no longer accept without question.

Investigator

A damaged record or inconsistent account can matter more than a confession. Patience, memory and attention to ordinary details follow the Investigator far beyond the crime scene.

11.5 Arbites Enforcer

Judge, riot officer, executioner, investigator, and breacher.

Allowed Species: Human only.

Hit Die: d10.

Primary Abilities: Strength or Dexterity, Wisdom.

Saving Throws: Strength, Wisdom.

Armour: Light, medium, flak, carapace, riot armour.

Weapons: Pistols, shotguns, shock weapons, mauls, shields, grenades.

Level	Features
1	Enforcer Training, Authority
2	Breach and Clear
3	Enforcement Doctrine
4	Ability Score Improvement / Talent
5	Extra Attack
6	Lockdown Order

14	Doctrine Feature
15	Sentence Executed
16	Ability Score Improvement / Talent
17	Absolute Jurisdiction
18	Doctrine Feature
19	Ability Score Improvement / Talent
20	Final Sentence

11.5.1 Enforcer Training

Gain proficiency in two skills from Athletics, Insight, Intimidation, Investigation, Perception, and

Persuasion.

11.5.2 Authority

As an action, command one creature within 30 ft that can hear you. It must make a Wisdom saving

throw. DC = 8 + proficiency bonus + Wisdom modifier. On a failure, choose one: the target is frightened

until the end of your next turn; the target drops prone; or the target drops one held item. Uses:

proficiency bonus per long rest.

11.5.3 Breach and Clear

During the first round of combat, you gain +10 ft movement and advantage on your first attack against a

creature that has not acted yet.

11.5.4 Enforcement Doctrine

Doctrine	Benefit
Riot Shield	While using a shield, you gain +1 AC and advantage against being shoved.
Executioner	Your attacks against frightened, prone, or restrained creatures deal +1d6 damage.
Investigator	Gain expertise in Investigation or Insight. As a bonus action, study one creature, device, or scene you can see within 60 ft; until the end of your next turn, it counts as studied for your Investigator features. Uses: proficiency bonus per long rest.

11.5.5 Extra Attack

At level 5, you can attack twice when you take the Attack action. You may replace one of those attacks with Authority; doing so still expends a use of Authority as normal.

11.5.6 Lockdown Order

As an action, choose a 15-ft area you can see within 60 ft. Hostile creatures in that area must make a

Wisdom save against your Authority DC. On a failure, they cannot take reactions and their speed is

halved until the start of your next turn.

11.5.7 Doctrine Feature

Enforcement Doctrine	Feature
Riot Shield	When you take the Dodge action with a shield, one adjacent ally also gains +2 AC.
Executioner	Your Executioner damage becomes +1d8.
Investigator	When you hit a creature you have studied or identified, add your Wisdom modifier to the damage once per turn.

11.5.9 No Escape

When a creature you can see within 30 ft moves away from you or an ally, you may use your reaction to

force it to make a Wisdom save. On a failure, its movement ends.

11.5.10 Judgement Protocol

Once per short rest, when you hit a creature that is frightened, prone, restrained, stunned, or

Suppressed, the attack becomes a critical hit.

11.5.11 Riot Control

When you force a creature to make a save against Authority, Lockdown Order, or No Escape, you may

also choose one ally within 30 ft. That ally may move 5 ft without provoking opportunity attacks.

11.5.13 Legal Terror

Creatures that fail a saving throw against your Authority are also Suppressed until the start of your next

turn.

11.5.14 Doctrine Feature

Enforcement Doctrine	Feature
Riot Shield	While using a shield, you gain resistance to damage from opportunity attacks.
Executioner	Once per turn, when you reduce a hostile creature to 0 hit points, another hostile creature within 30 ft must make a Wisdom save or become frightened until your next turn.
Investigator	Once per short rest, ask the GM one tactical question about a creature, device, crime scene, or battlefield; the GM answers truthfully but briefly.

11.5.15 Sentence Executed

Once per long rest, declare sentence on one creature you can see within 60 ft. For 1 minute, your first hit

each turn against that creature deals +1d10 damage. If it drops to 0 hit points during this minute, regain

one use of Authority.

11.5.17 Absolute Jurisdiction

When a creature fails a save against Authority, Lockdown Order, or No Escape, it also has disadvantage on the next attack roll it makes before the end of its next turn.

11.5.18 Doctrine Feature

Enforcement Doctrine	Feature
Riot Shield	While using a shield, you and one adjacent ally gain +1 to Dexterity saves.
Executioner	Judgement Protocol deals an extra +2d6 damage.
Investigator	When you ask a tactical question, you may also learn one useful weakness, route, or leverage point.

11.5.20 Final Sentence

Once per long rest, when you declare Sentence Executed, all allies within 30 ft who can hear you gain advantage on their first attack against the sentenced creature. For the duration of Sentence Executed, the first time each round an ally hits that creature, the hit deals +1d6 damage. If the creature is reduced to 0 hit points, all hostile creatures within 30 ft must make a Wisdom save against your Authority DC or become frightened until the end of your next turn.

11.6 / CLASS LORE

Hive Scum

Below a hive's official maps, survival depends on relationships that administrators rarely acknowledge. Gangers, scavengers, smugglers and displaced workers build lives among polluted waterways and failing machinery. Clothing and weapons may proclaim a gang tradition or conceal a history best left alone. Hive Scum carry that practical knowledge into a warband: which bargain has a hidden price, which doorway is watched, and who will remember a favour. Their cynicism need not erase loyalty. Decide who once shared food with your character when there was not enough to share.

Gunslinger

Reputation can arrive before the first shot. A Gunslinger may cultivate swagger to prevent a fight, or discover that a famous name keeps attracting challengers.

Knife Rat

Close spaces reward speed and familiarity. The Knife Rat knows ladders, service gaps and escape routes that people accustomed to formal streets overlook.

Chem-User

Combat chems promise strength or clarity at a price. Consider who controls the supply, what rituals surround their use, and which risks your character refuses to pass to others.

Sump Ghost

Moving unseen through neglected places takes patience and local knowledge. A Sump Ghost may leave few traces while remembering every person who vanished along the same routes.

11.6 Hive Scum

Gang fighter, smuggler, knife-rat, scavver, bounty runner, or underhive survivor.

Allowed Species: Human, Ratling.

Hit Die: d8.

Primary Abilities: Dexterity, Charisma.

Saving Throws: Dexterity, Charisma.

Armour: Light armour, flak armour.

Weapons: Pistols, basic firearms, knives, improvised weapons, and grenades.

Level	Features
1	Dirty Fighter, Streetwise
2	Cunning Action
3	Gang Style
4	Ability Score Improvement / Talent
5	Backstabber +3d6
6	Low Cunning
7	Gang Style Feature
8	Ability Score Improvement / Talent
9	Vanish into Trouble
10	Knife-Edge Survivor
11	Backstabber +4d6
12	Ability Score Improvement / Talent
13	Underhive Reputation
14	Gang Style Feature
15	Backstabber +5d6
16	Ability Score Improvement / Talent
17	No Honour, No Problem
18	Backstabber +6d6
19	Ability Score Improvement / Talent
20	King of the Underhive

11.6.1 Dirty Fighter

Once per turn, when you hit a creature that is distracted, flanked, prone, restrained, or within 5 ft of one

of your allies, deal +1d6 damage.

11.6.2 Streetwise

Gain proficiency in two skills from Deception, Insight, Intimidation, Sleight of Hand, Stealth, and

Survival. You also know how to find black-market contacts in urban settlements.

11.6.3 Cunning Action

You may Dash, Disengage, or Hide as a bonus action.

11.6.4 Gang Style

Style	Benefit
Gunslinger	Once per turn, you can reload a pistol without using an action.
Knife Rat	Your melee attacks with light weapons score a critical hit on 19-20.
Chem-User	Once per long rest, inject combat chems as a bonus action. Gain +10 ft speed and advantage on Strength and Dexterity checks for 1 minute. Afterwards, make a Constitution saving throw or gain one level of exhaustion.
Sump Ghost	You gain expertise in Stealth when in urban ruins, sewers, vents, tunnels, or industrial terrain.

11.6.5 Backstabber

At level 5, your Dirty Fighter damage increases to +3d6. It increases again to +4d6 at level 11, +5d6 at level 15, and +6d6 at level 18.

11.6.6 Low Cunning

When you take the Hide, Dash, or Disengage action, you may also draw or stow one weapon, open an

unlocked door, kick over cover, or interact with a small object.

11.6.7 Gang Style Feature

Gang Style	Feature
Gunslinger	Once per short rest, make one pistol attack as a bonus action after taking the Attack action.
Knife Rat	Your light melee attacks deal +1 damage.
Chem-User	You gain advantage on saving throws against poison and combat drugs.
Sump Ghost	You may hide when lightly obscured by smoke, steam, crowds, or machinery.

11.6.9 Vanish into Trouble

Once per short rest, when you take damage, you may use your reaction to halve the damage and move

up to 10 ft without provoking opportunity attacks.

11.6.10 Knife-Edge Survivor

Once per long rest, when you fail a Dexterity or Charisma saving throw, you may treat the roll as a

success instead.

11.6.13 Underhive Reputation

Choose a reputation: feared, connected, slippery, or useful. Once per session, you can leverage that

reputation to gain a minor favour, a rumour, a hiding place, illegal ammunition, a guide, or a black-market introduction, subject to GM approval.

11.6.14 Gang Style Feature

Gang Style	Feature
Gunslinger	Your first pistol hit each turn deals +1d6 damage if the target is within 30 ft.
Knife Rat	When you score a critical hit with a light melee weapon, the target cannot take reactions until its next turn.
Chem-User	Once per long rest, ignore the exhaustion risk from your combat chems.

Gang Style	Feature
Sump Ghost	Once per short rest, become hidden from one creature even if it can see you, provided there is cover, smoke, steam, machinery, darkness, or a crowd within 10 ft.

11.6.17 No Honour, No Problem

Once per short rest, when you miss with an attack that would qualify for Dirty Fighter, you may

turn the miss into a hit. The hit deals no Dirty Fighter bonus damage.

11.6.18 Backstabber +6d6

Your Dirty Fighter damage increases to +6d6.

11.6.20 King of the Underhive

Once per long rest, for 1 minute, you may take two bonus actions on each of your turns. Each bonus action must be used for Cunning Action, a Gang Style feature, reloading, drawing a weapon, interacting with the battlefield, or making one attack with a pistol or light melee weapon. You can make only one such bonus-action attack per turn, and Dirty Fighter still triggers only once per turn unless another feature explicitly says otherwise.

11.7 / CLASS LORE

Ratling Sharpshooter

A Ratling marksman learns to make a small position sufficient: enough shelter, a steady rest and an escape that larger pursuers cannot easily follow. Long periods of observation reveal habits as well as targets. The same eye that notices movement on a distant gantry may notice a companion quietly giving away their last ration. Within a warband, a Sharpshooter can provide warning, precision and unexpected practical comforts. Decide what they do during a long wait, and what finally makes them abandon an excellent firing position.

Long-Las Sniper

A carefully maintained rifle and a patient eye are professional tools. The sniper learns weather, distance and the weight of committing to a single shot.

Underhive Rat

Crowded machinery and broken hab-blocks are familiar ground. This survivor treats narrow gaps and overlooked ledges as part of a private map.

Spotter

Observation becomes a shared advantage when it reaches the right person in time. A Spotter learns companions' habits, signalling clearly while keeping the team concealed.

Black-Market Gremlin

A useful object often travels through several hands before reaching its owner. This specialist remembers those hands, the favours exchanged and the danger of promising too much.

11.7 Ratling Sharpshooter

A tiny marksman, scout, thief, spotter, and survivor who wins fights through positioning and precision.

Allowed Species: Ratling only.

Hit Die: d8.

Primary Abilities: Dexterity, Wisdom.

Saving Throws: Dexterity, Wisdom.

Armour: Light armour, flak armour.

Weapons: Pistols, knives, shotguns, lasguns, long-las, sniper weapons.

Tools: Cook's utensils or thieves' tools.

Level	Features
1	Small Target, Deadeye
2	Scamper
3	Ratling Trick
4	Ability Score Improvement / Talent
5	Killshot
6	Cameleoline Habits
7	Ratling Trick Feature
8	Ability Score Improvement / Talent
9	Impossible Angle
10	Perfect Shot
11	Deadeye +3d6
12	Ability Score Improvement / Talent
13	Gone Before the Shot
14	Ratling Trick Feature
15	Ghost Marksman
16	Ability Score Improvement / Talent
17	Deadeye +4d6
18	Ratling Trick Feature
19	Ability Score Improvement / Talent
20	Impossible Little Legend

11.7.1 Small Target

When you are behind light cover, you treat it as heavy cover. When you are prone, ranged attacks

against you suffer an additional -2 penalty.

11.7.2 Deadeye

Once per turn, when you hit with a ranged weapon attack and had advantage on the attack roll, you deal

an extra +1d6 damage. This increases to +2d6 at level 5 and +3d6 at level 11.

11.7.3 Scamper

You may Dash, Disengage, or Hide as a bonus action. Moving through the space of a Medium or larger

ally does not count as difficult terrain for you.

11.7.4 Ratling Trick

Trick	Benefit
Long-Las Sniper	If you do not move this turn, your first ranged attack gains +2 to hit.
Underhive Rat	Gain expertise in Stealth or Sleight of Hand. You have advantage on checks to hide in urban ruins, crowds, vents, pipes, and debris.
Spotter	As a bonus action, mark one enemy you can see within 120 ft. The next ally to attack that target gains +1d4 to hit. This benefit affects allies only and does not apply to your own attack unless a later feature says otherwise.
Black-Market Gremlin	You can usually acquire illegal ammo, fake papers, ration packs, or minor contraband in settlements. You gain proficiency with thieves' tools.

11.7.5 Killshot

At level 5, once per short rest, when you hit a creature with a ranged weapon attack using an Accurate

weapon, you may turn the hit into a critical hit. Your Deadeye damage also increases to +2d6.

11.7.6 Cameleoline Habits

If you have cover or concealment, you may attempt to hide even when lightly observed, provided you do

not move more than half your speed this turn.

11.7.7 Ratling Trick Feature

Ratling Trick	Feature
Long-Las Sniper	Your first Accurate weapon hit each combat adds +1d6 damage.
Underhive Rat	Climbing, crawling, squeezing, and moving through tight spaces costs you no extra movement.
Spotter	Your mark also adds +1 damage.
Black-Market Gremlin	Once per session, produce one plausible piece of minor contraband or ammunition.

11.7.9 Impossible Angle

Once per short rest, ignore light and heavy cover on one ranged weapon attack.

11.7.10 Perfect Shot

When you use Killshot, add your Wisdom modifier to the damage roll, and the target cannot take

reactions until the end of its next turn.

11.7.13 Gone Before the Shot

After you hit or miss with a ranged attack from cover, you may move 5 ft without provoking opportunity

attacks.

11.7.14 Ratling Trick Feature

Ratling Trick	Feature
Long-Las Sniper	When you use Killshot, the attack ignores light and heavy cover and ignores resistance from non-powered armour.

Ratling Trick	Feature
Underhive Rat	Once per short rest, when an attack misses you while you are in cover, you may Hide as a reaction.
Spotter	Your marked target grants +1d4 to the next two allied attacks instead of one.
Black-Market Gremlin	When you spend downtime in a settlement, reduce the cost or difficulty of acquiring illegal ammunition or forged papers.

11.7.15 Ghost Marksman

Once per long rest, for 1 minute, you remain hidden after making a ranged attack if you are in heavy

cover or heavily obscured. The attack still reveals the direction of the shot, but not your exact position.

11.7.17 Deadeye +4d6

Your Deadeye damage increases to +4d6.

11.7.18 Ratling Trick Feature

Ratling Trick	Feature
Long-Las Sniper	Your first Accurate weapon hit each round ignores heavy cover.
Underhive Rat	When you Hide as a reaction, you may also move 5 ft.
Spotter	Your mark grants +1d4 to the next three allied attacks instead of two.
Black-Market Gremlin	Once per session, produce one rare ammunition, forged credential, or compact tool with GM approval.

11.7.20 Impossible Little Legend

Once per long rest, for 1 minute, you cannot be targeted by opportunity attacks, and the first

ranged attack you make each turn from cover has advantage. If that attack hits, you may

immediately Hide without using an action.

11.8 / CLASS LORE

Skitarii Veteran

Experience does not disappear merely because a warrior records it differently. A Skitarii Veteran carries campaigns in damaged plating, revised routines and sensor memories that return with unsettling precision. Service to the Omnissiah binds maintenance to devotion; a moment spent tending a weapon may be both practical necessity and prayer. Outside a cohort, incomplete data and unfamiliar allies demand judgement. These protocols adapt recognisable Mechanicus battlefield traditions into the handbook's roles; their personal interpretation may reflect a forge world's orders or the habits of a long-isolated survivor.

Ranger

A hooded hunter accustomed to endurance and deliberate fire. The galvanic rifle is cared for with the patient attention given to a trusted instrument.

Vanguard

Hazardous service separates the Vanguard from ordinary company. Protective armour and radium weaponry can turn even quiet proximity into a source of unease.

Protector

Defensive responsibility directs attention towards approaches, cover and the weakest point in a formation. A Protector prepares for the moment another warrior must rely on them.

Data-Hunter

Signals and inconsistencies offer a trail through confusion. Deciding which fragment matters can be harder than collecting a thousand fragments at once.

Infiltrator

Sicarian traditions favour disruption and sudden proximity. Altered senses read spaces differently, giving familiar corridors an unsettling character.

Ruststalker

The close-combat specialist turns movement into a precise threat. Consider what routines restore calm after the violence has ended.

11.8 Skitarii Veteran

A machine-disciplined marksman, cybernetic hunter, rad-soldier, or Mechanicus shock trooper.

Allowed Species: Skitarii only.

Hit Die: d10.

Primary Abilities: Dexterity, Intelligence.

Saving Throws: Dexterity, Intelligence.

Armour: Light, medium, flak, carapace.

Weapons: Pistols, basic firearms, advanced firearms, shock weapons, rad weapons, Mechanicus weapons, grenades.

Level	Features
1	Machine Focus, Targeting Protocol
2	Augmetic Reflexes
3	Combat Protocol
4	Ability Score Improvement / Talent
5	Extra Attack
6	Doctrinal Subroutine
7	Protocol Feature
8	Ability Score Improvement / Talent
9	Blessed Autosenses
10	Omnissian Execution
11	Calculated Volley
12	Ability Score Improvement / Talent
13	Redundant Systems
14	Protocol Feature
15	Will of the Omnissiah
16	Ability Score Improvement / Talent
17	Perfect Targeting Logic
18	Protocol Feature
19	Ability Score Improvement / Talent
20	Living Instrument of the Omnissiah

11.8.1 Machine Focus

You do not suffer disadvantage on Perception checks in darkness if you have an auspex, visor, or

integrated optics. You gain proficiency in Investigation or Technology.

11.8.2 Targeting Protocol

As a bonus action, mark one enemy within 90 ft. Until the end of your turn, your next weapon attack

against it gains +1d4 to hit. Uses: proficiency bonus per long rest.

11.8.3 Augmetic Reflexes

Add your Intelligence modifier to initiative rolls.

11.8.4 Combat Protocol

Protocol	Benefit
Ranger Protocol	If you do not move, your first ranged attack this turn deals +1d4 damage.
Vanguard Protocol	Once per turn, when you hit a creature within 30 ft, it has disadvantage on its next Constitution saving throw before your next turn.
Protector Protocol	When an ally within 30 ft is targeted by an attack, you may use your reaction before the roll is resolved to give that ally +2 AC against the attack if you can see the attacker.
Data-Hunter Protocol	Gain expertise in Investigation or Technology. Once per short rest, identify one weakness, resistance, or tactical feature of an enemy you can observe.
Infiltrator Protocol	Gain proficiency in Stealth. Once per short rest, as a bonus action, become hidden from creatures relying on standard vision or auspex until the end of your turn, provided you have cover or concealment.
Ruststalker Protocol	Gain proficiency with blades. Your melee attacks deal +1d6 damage against targets below half their hit points.

11.8.5 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.8.6 Doctrinal Subroutine

At the start of combat, choose Accuracy, Endurance, or Pursuit. Accuracy: +1 to your first attack roll.

Endurance: temporary HP equal to your proficiency bonus. Pursuit: +10 ft speed on your first turn.

11.8.7 Protocol Feature

Combat Protocol	Level 7 Feature
Ranger	Your Ranger Protocol damage becomes +1d6.
Vanguard	A creature affected by Vanguard Protocol also takes +1d4 rad or poison damage when you hit it.
Protector	If the protected attack misses, the ally gains temporary HP equal to your Intelligence modifier.
Data-Hunter	The next ally to damage the identified enemy adds +1d6 damage.
Infiltrator	You may move 10 ft as part of the bonus action used to activate Infiltrator Protocol.
Ruststalker	Your melee attacks ignore resistance from non-powered armour.

11.8.9 Blessed Autosenses

You cannot suffer disadvantage on Perception checks caused by darkness, smoke, fog, or visual

interference while your optics, auspex, or visor are functional.

11.8.10 Omnissian Execution

Once per short rest, when Targeting Protocol causes an attack to hit, add 2d8 damage. If the target is a

daemon, heretek, machine, vehicle, or heavily augmented creature, add 3d8 instead.

11.8.11 Calculated Volley

Once per turn, when you hit a target marked by Targeting Protocol, you may immediately mark a

second creature within 30 ft of the original target. This second mark lasts until the end of your next

turn.

11.8.13 Redundant Systems

When you fail a Constitution, Dexterity, or Intelligence saving throw, you may add 1d4 to the result. You

can use this after seeing the roll but before the GM declares the result. Uses: proficiency bonus per long

rest.

11.8.14 Protocol Feature

Combat Protocol	Feature
Ranger	Your first ranged hit each combat deals +2d6 damage if you did not move.
Vanguard	Creatures damaged by your rad or poison effects cannot regain hit points until your next turn.
Protector	When you use your reaction to protect an ally, reduce damage by your Intelligence modifier if the attack still hits.
Data-Hunter	Your identified target loses one resistance of the GM's choice against the next damage it takes.
Infiltrator	When hidden from auspex or standard vision, your next hit deals +1d8 damage.
Raststalker	Your melee critical hits disable reactions until the target's next turn.

11.8.15 Will of the Omnissiah

Once per long rest, enter a perfect doctrinal state for 1 minute. During this time, Targeting Protocol does

not expend uses, but you may only have one target marked at a time.

11.8.17 Perfect Targeting Logic

When you roll initiative, you may immediately use Targeting Protocol without expending a use.

If you hit that target before the end of your first turn, add your Intelligence modifier to the

damage.

11.8.18 Protocol Feature

Combat Protocol	Feature
Ranger	Your accurate weapons also ignore heavy cover once per round.
Vanguard	Your rad or poison effects impose disadvantage on the target's next Strength or Constitution save.
Protector	Your protection reaction may target two allies within 30 ft.
Data-Hunter	Your identified target grants +1 to allied attack rolls until your next turn.
Infiltrator	You may remain hidden after a miss.
Raststalker	Your melee hits against bloodied targets deal +1d8 damage.

11.8.20 Living Instrument of the Omnissiah

Once per long rest, for 1 minute, choose two Combat Protocols instead of one. You gain both

benefits, and your Doctrinal Subroutine choice applies at the start of each of your turns.

11.9 / CLASS LORE

Kin Armsman

The defence of a Hold is not an abstract duty to those who know its workshops, living chambers and old promises. Kin warriors carry the practical habits of their communities into battle, valuing dependable equipment and comrades who do their share. This class brings together different martial and industrial traditions; a League's Hearthguard and an Ironhead mining clan need not share the same upbringing. Establish who equipped your character and what service they expect in return. A well-kept tool, returned intact, can speak more loudly than a boast.

Hearthguard

Heavy exo-armour expresses the trust placed in an elite protector. The wearer carries responsibility for people and places too important to abandon lightly.

Ironhead

Mining experience teaches respect for weight, pressure and failing structures. Industrial strength becomes a battlefield asset, while the memories of a working community remain close.

Guild-Militant

Contracts and collective interests can require armed defence. A Guild-Militant knows that a dispute over cargo may threaten many livelihoods beyond the immediate fight.

11.9 Kin Armsman

A Squat/Kin line fighter, oath-sworn guard, void mercenary, hold defender, or Hearthkyn-style warrior.

Allowed Species: Squat/Kin only.

Hit Die: d10.

Primary Abilities: Constitution, Dexterity or Wisdom.

Saving Throws: Constitution, Wisdom.

Armour: Light, medium, Kin armour, void suits, exo-frame plate.

Weapons: Pistols, basic firearms, Kin weapons, axes, hammers, grenades.

Level	Features
1	Kin Training, Oath-Mark
2	Steady Advance
3	Hold Doctrine
4	Ability Score Improvement / Talent
5	Extra Attack
6	Grudge Settled
7	Doctrine Feature
8	Ability Score Improvement / Talent
9	Void-Hardened Line
10	Ancestral Wrath
11	Kinfire Drill
12	Ability Score Improvement / Talent
13	Iron Compact
14	Doctrine Feature
15	Holdfast Champion
16	Ability Score Improvement / Talent
17	Grudge-Bound Advance
18	Doctrine Feature
19	Ability Score Improvement / Talent
20	Ancestor-Core Champion

11.9.1 Kin Training

Gain proficiency in two skills from Athletics, Insight, Investigation, Perception, Survival, Technology,

and Persuasion. You also gain proficiency with Kin weapons and void suits.

11.9.2 Oath-Mark

As a bonus action, mark one creature you can see within 90 ft as the subject of your oath. Until the end

of your next turn, your first weapon hit against that creature deals bonus damage equal to your

proficiency bonus. Uses: proficiency bonus per long rest.

11.9.3 Steady Advance

Your speed is not reduced by difficult terrain caused by rubble, industrial clutter, loose rock, gantries,

mine workings, or shipboard debris. When you move no more than half your speed on your turn, you

gain +1 AC until the start of your next turn.

11.9.4 Hold Doctrine

Doctrine	Benefit
Hearthguard	While wearing medium or heavy Kin armour, reduce non-critical weapon damage by 1.
Ironhead	You gain advantage on checks to mine, breach, salvage, demolish, or repair machinery and structures.
Guild-Militant	When you hit a creature marked by Oath-Mark, one ally within 30 ft gains +1 to hit that creature before your next turn.

11.9.5 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.9.6 Grudge Settled

When a creature marked by Oath-Mark drops to 0 hit points, regain temporary HP equal to your level +

Constitution modifier.

11.9.7 Doctrine Feature

Hold Doctrine	Feature
Hearthguard	Your damage reduction becomes 2.
Ironhead	Your attacks against objects, vehicles, and machines deal +1d8 damage.
Guild-Militant	When an ally hits your Oath-Mark target, you may use your reaction to let that ally add +1d6 damage.

11.9.9 Void-Hardened Line

Allies within 5 ft of you have advantage on saving throws against being shoved, knocked prone, or

moved against their will while you are conscious.

11.9.10 Ancestral Wrath

Once per short rest, when you hit a creature marked by Oath-Mark, deal an additional 2d8 damage. If

that creature damaged you or an ally since your last turn, it also becomes Suppressed until the start of

your next turn.

11.9.11 Kinfire Drill

When you use Oath-Mark, you may choose one ally within 30 ft. That ally may make one weapon attack

against the marked target as a reaction.

11.9.13 Iron Compact

Once per long rest, when you or an ally within 10 ft would fail a saving throw, you may add your

Constitution modifier to the roll. If this turns the failure into a success, you cannot use Oath-Mark on

your next turn.

11.9.14 Doctrine Feature

Hold Doctrine	Feature
Hearthguard	While you are below half hit points, your armour damage reduction increases by 1.
Ironhead	Once per short rest, when you damage an object, vehicle, or machine, treat the hit as a critical hit.
Guild-Militant	When you mark a target with Oath-Mark, allies gain +1 to damage against it until your next turn.

11.9.15 Holdfast Champion

Once per long rest, plant your oath, banner, claim marker, or kin-token. For 1 minute, you and allies

within 15 ft cannot be moved against your will while conscious, and your first hit each round against an

oath-marked or grudge-marked enemy deals +1d10 damage.

11.9.17 Grudge-Bound Advance

When a creature marked by Oath-Mark damages you or an ally, your next hit against it before

the end of your next turn deals +1d8 damage and ignores light cover.

11.9.18 Doctrine Feature

Hold Doctrine	Feature
Hearthguard	Your armour damage reduction applies to critical hits, but only for 1 damage.
Ironhead	Your attacks against machines, vehicles, and structures ignore resistance once per turn.
Guild-Militant	When an ally hits your Oath-Mark target, they may move 5 ft without provoking opportunity attacks.

11.9.20 Ancestor-Core Champion

Once per long rest, for 1 minute, your Oath-Mark does not expend uses. The first time each

round that an oath-marked enemy damages an ally, you may make one weapon attack against

that enemy as a reaction if it is within range.

11.10 / CLASS LORE

Hernkyn Prospector

Hernkyn range beyond familiar settlements to scout, explore and assess what a hostile world may hold. Expedition life rewards preparation and the ability to distinguish an opportunity from a trap. A promising seam matters little if nobody survives the return journey. Longcoats, survey tools and carefully selected weapons carry the marks of weather and repeated repair. In a mixed warband, a Prospector brings an eye for routes, resources and practical limits. Decide what discovery would make them risk a comfortable contract, and what responsibility would make them turn back.

Outrider

The first sight of danger often belongs to someone far ahead of support. An Outrider balances curiosity with the obligation to bring news home.

Claim-Staker

Careful examination turns an unfamiliar place into useful knowledge. A claim marker can represent weeks of work and a promise to people waiting elsewhere.

Trail Gunner

The expedition needs someone watching the approach while others inspect the ground. A Trail Gunner values dependable sightlines and the discipline to remain ready.

11.10 Hernkyn Prospector

A Squat/Kin scout, outrider, claim-staker, surveyor, sniper, and forward operator. This class suits Kin who operate beyond the hold, locate resources, mark targets, and survive hostile worlds.

Allowed Species: Squat/Kin only.

Hit Die: d8.

Primary Abilities: Dexterity, Wisdom or Intelligence.

Saving Throws: Dexterity, Wisdom.

Armour: Light, medium, Kin armour, prospector rigs.

Weapons: Pistols, basic firearms, Kin weapons, knives, hammers, and mining tools.

Level	Features
1	Prospector Training, Claim Sight
2	Surveyor's Step
3	Expedition Role
4	Ability Score Improvement / Talent
5	Extra Attack
6	Mark the Seam
7	Expedition Feature
8	Ability Score Improvement / Talent
9	Outrider's Escape
10	Perfect Claim
11	Deep Scan
12	Ability Score Improvement / Talent
13	No Stone Unturned
14	Expedition Feature
15	Master Prospector
16	Ability Score Improvement / Talent
17	Legendary Claim-Staker
18	Expedition Feature
19	Ability Score Improvement / Talent
20	Claim the Horizon

11.10.1 Prospector Training

Gain proficiency in Survival and one of Investigation, Perception, Stealth, Technology, or Vehicles. You also gain proficiency with prospector rigs and Kin ranged weapons.

11.10.2 Claim Sight

As a bonus action, mark one creature, object, route, or terrain feature within 120 ft that you can see.

Until the end of your next turn, you or one ally gains +1d4 to the next check or attack involving that

mark. Uses: proficiency bonus per long rest.

11.10.3 Surveyor's Step

You ignore difficult terrain caused by rubble, loose rock, mine workings, industrial debris, ash wastes, or unstable ground. You have advantage on checks to avoid natural hazards, cave-ins, weak floors, and environmental collapse.

11.10.4 Expedition Role

Role	Benefit
Outrider	Your speed increases by 5 ft. When you Dash, opportunity attacks against you have disadvantage.
Claim-Staker	You gain expertise in Investigation or Survival. You can identify valuable materials, salvage, ore, or structural weaknesses.
Trail Gunner	Your first ranged hit on each of your turns deals +1d4 damage while no hostile creature is adjacent to you.

11.10.5 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.10.6 Mark the Seam

When you hit a creature, object, or vehicle with a ranged weapon attack, the next attack against that target before your next turn ignores light cover.

11.10.7 Expedition Feature

Expedition Role	Feature
Outrider	When you move at least 15 ft, your next attack this turn deals +1d6 damage.
Claim-Staker	Your Claim Sight die becomes +1d6 for ability checks.
Trail Gunner	Your Trail Gunner damage becomes +1d6.

11.10.9 Outrider's Escape

Once per short rest, when you are hit by an attack, reduce the damage by 1d8 + your Dexterity modifier and move 10 ft without provoking opportunity attacks.

11.10.10 Perfect Claim

Once per short rest, when you use Claim Sight on a creature, your next hit against it becomes a critical hit on a roll of 19-20.

11.10.11 Deep Scan

As an action, study a creature, machine, vehicle, structure, or battlefield feature within 120 ft. Learn one resistance, weakness, hidden danger, structural flaw, route, or tactical fact, as appropriate.

11.10.13 No Stone Unturned

When you make an Investigation, Perception, Survival, or Technology check, treat a d20 roll of 7 or lower as an 8. This does not apply during direct psychic interference or Warp distortion.

11.10.14 Expedition Feature

Expedition Role	Feature
Outrider	Once per short rest, take the Dash or Disengage action as a free action on your turn.
Claim-Staker	Allies within 30 ft add +1 to checks involving your Claim Sight target.
Trail Gunner	When you score a critical hit with a ranged attack, the target is Suppressed until your next turn.

11.10.15 Master Prospector

Once per long rest, declare a battlefield claim. Choose one 30-ft area you can see. For 1 minute, you and

allies ignore difficult terrain in that area, gain +1 to attacks against enemies in it, and have advantage on

checks to interact with machinery, cover, doors, terrain, salvage, or objectives inside it.

11.10.17 Legendary Claim-Staker

When you use Claim Sight, choose two allies instead of one. Both may benefit from the mark

before the end of your next turn.

11.10.18 Expedition Feature

Expedition Role	Feature
Outrider	After you use Outrider's Escape, your next attack before your next turn has advantage.
Claim-Staker	Deep Scan reveals two useful facts instead of one.
Trail Gunner	Your Trail Gunner damage becomes +1d8, and that hit ignores light cover.

11.10.20 Claim the Horizon

Once per long rest, for 1 minute, whenever you or an ally benefits from Claim Sight, the

benefiting character may also move 10 ft without provoking opportunity attacks or ignore

heavy cover on one attack.

11.11 / CLASS LORE

Aeldari Outcast

Leaving the ordered Paths of a craftworld offers freedom without removing danger. Rangers and Corsairs encounter unfamiliar societies, distant ruins and temptations that disciplined life once held at a distance. Some retain close loyalties to home; others have reasons to avoid its judgement. An Outcast's long experience does not guarantee that they understand a human companion's short, urgent life. Give your character a reason to stay when departure would be easy. The Shadow Guide is this handbook's role for a wanderer whose stealth and knowledge help others pass through peril.

Ranger

Concealment and patient observation shape a Ranger’s habits. News carried back to a craftworld may prove as valuable as the shot taken from a hidden position.

Corsair

A life among raiders and travellers rewards daring, skill and negotiated loyalty. Consider the crew, captain or private oath your character still measures themselves against.

Shadow Guide

Finding a way through danger means noticing what others miss. A guide’s reputation rests on companions arriving safely, even when the route cannot be fully explained.

11.11 Aeldari Outcast

An Aeldari ranger, exile, corsair-adjacent wanderer, pathless scout, or alien marksman pursuing a hidden agenda.

Allowed Species: Aeldari only.

Hit Die: d8.

Primary Abilities: Dexterity, Wisdom.

Saving Throws: Dexterity, Wisdom.

Armour: Aeldari mesh, ranger weave, light armour.

Weapons: Aeldari weapons, pistols, blades, sniper weapons.

Level	Features
1	Ranger Training, Shuriken Grace
2	Ghostwalk
3	Outcast Path
4	Ability Score Improvement / Talent
5	Extra Attack
6	Unseen Shot
7	Path Feature
8	Ability Score Improvement / Talent
9	Webway Instinct
10	Death from Elsewhere
11	Perfect Motion
12	Ability Score Improvement / Talent
13	Vanish Beyond Sight
14	Path Feature
15	Mythic Outcast
16	Ability Score Improvement / Talent
17	Pathless Perfection
18	Path Feature
19	Ability Score Improvement / Talent
20	Legend of the Wandering Path

11.11.1 Ranger Training

Gain proficiency in Stealth and Perception. You also gain proficiency with Aeldari weapons and ranger weave.

11.11.2 Shuriken Grace

Once per turn, when you hit with a shuriken, ranger, or Aeldari blade weapon after moving at least 10 ft, add +1d6 damage.

11.11.3 Ghostwalk

You may Dash, Disengage, or Hide as a bonus action if you are wearing light or Aeldari armour.

11.11.4 Outcast Path

Path	Benefit
Ranger	If you do not move before attacking with a ranger long rifle, your first ranged attack this turn gains +2 to hit.
Corsair	You gain proficiency with pistols and blades. After making a weapon attack, move 5 ft without provoking opportunity attacks.
Shadow Guide	Gain expertise in Stealth or Survival. You have advantage on checks to navigate ruins, wilderness, alien structures, and webway-adjacent places.

11.11.5 Extra Attack

At level 5, you can attack twice when you take the Attack action.

11.11.6 Unseen Shot

Once per short rest, when you hit a creature while hidden or heavily obscured, add 2d6 damage.

11.11.7 Path Feature

Outcast Path	Feature
Ranger	Your attacks with Accurate Aeldari weapons ignore light cover.
Corsair	Your Shuriken Grace damage applies to pistol attacks.
Shadow Guide	Allies within 10 ft of you ignore non-magical difficult terrain while travelling carefully.

11.11.9 Webway Instinct

You have advantage on saving throws against being surprised, lost, restrained by terrain, or trapped by mundane mechanisms.

11.11.10 Death from Elsewhere

Once per short rest, when you hit a creature that cannot see you, turn the hit into a critical hit.

11.11.11 Perfect Motion

When you move at least 20 ft on your turn, opportunity attacks against you have disadvantage, and your next weapon hit before the end of the turn deals +1d6 damage.

11.11.13 Vanish Beyond Sight

Once per long rest, as a bonus action, become invisible until the start of your next turn or until you make an attack. This is a psychic-adjacent Aeldari trick, not a normal Imperial stealth field.

11.11.14 Path Feature

Outcast Path	Feature
Ranger	Your Death from Elsewhere feature recharges when you roll initiative if you have no uses remaining.
Corsair	After scoring a critical hit, you may make one pistol or blade attack as a bonus action.
Shadow Guide	Once per short rest, you and up to two allies within 30 ft may move 10 ft without provoking opportunity attacks.

11.11.15 Mythic Outcast

Once per long rest, for 1 minute, you gain +10 ft speed, advantage on Stealth checks, and your first

weapon hit each turn deals +1d10 damage if you moved before attacking.

11.11.17 Pathless Perfection

Once per round, when you move at least 10 ft before attacking, you may add +1d4 to either the

attack roll or the damage roll after seeing the d20.

11.11.18 Path Feature

Outcast Path	Feature
Ranger	Your attacks from hiding score a critical hit on 19-20.
Corsair	After you move 5 ft from your Corsair feature, your next attack before your next turn gains +1d6 damage.
Shadow Guide	Allies moved by your Path Feature may also ignore difficult terrain until your next turn.

11.11.20 Legend of the Wandering Path

Once per long rest, for 1 minute, you may use Ghostwalk without a bonus action on each of your

turns. During this time, your first hit each turn against a creature that cannot see you becomes

a critical hit on a roll of 19-20.

11.12 / CLASS LORE

Aeldari Warlock

Warlocks walk the Path of the Seer after earlier experience on the Path of the Warrior. That martial history helps shape psychic gifts suited to battle, channelled through discipline, runes and ritual equipment. Their power carries the weight of a people for whom the fate of a soul remains an immediate concern. Among outsiders, a Warlock may struggle to explain why a seemingly small loss matters so deeply. The paths below are this conversion's specialisations. Decide which memory of war your character cannot set aside, and whom they now hope to keep from sharing it.

Seer of Battle

Possibilities gather around the next movement or decision. The Seer searches for a useful intervention without mistaking a glimpse of the future for complete understanding.

Storm Warlock

Destructive force demands a disciplined mind. A Storm Warlock may appear still and controlled even while lightning answers the motion of a hand.

Spirit Guardian

Protection extends beyond the immediate body. A Spirit Guardian attends to fear, resolve and the spiritual cost of battle, keeping watch over companions and the memory of the dead.

11.12 Aeldari Warlock

An Aeldari battle-seer, a former Seer who has walked the Path of the Warrior, or rune-armoured psyker operating under a hidden command. This is not a normal Imperial psyker and should be used carefully.

Allowed Species: Aeldari only.

Hit Die: d6.

Primary Abilities: Wisdom or Intelligence, Dexterity.

Saving Throws: Wisdom, Intelligence.

Armour: Aeldari mesh, rune armour.

Weapons: Aeldari weapons, witchblades, singing spears, pistols.

Special: Uses Runes of Battle and Warp Pressure. Aeldari Warlocks do not learn Malefic powers.

Level	Features
1	Runes of Battle, Witchblade Training
2	Rune Ward
3	Warlock Path
4	Ability Score Improvement / Talent
5	Empowered Rune
6	Battle-Seer

16	7	8	2
17	8	8	2
18	8	8	3
19	8	9	3
20	9	9	3

11.12.1 Runes of Battle

You learn psychic powers from the Universal, Divination, Telekinesis, and Warlock power lists. You may learn Pyromancy only if the GM allows a destructive battle-seer interpretation. You cannot learn Malefic powers.

The Aeldari Warlock level table lists your Minor, Standard, and Major powers known. You learn powers from your allowed lists as you gain levels.

11.12.2 Witchblade Training

You may use your psychic ability modifier for attack and damage rolls with witchblades and singing spears.

11.12.3 Rune Ward

When you or an ally within 30 ft takes damage, use your reaction to reduce the damage by 1d8 + your psychic ability modifier. This increases Warp Pressure by 1.

11.12.4 Warlock Path

Path	Benefit
Seer of Battle	Once per short rest, add or subtract 1d4 from a d20 roll made by a creature you can see.
Storm Warlock	When you deal force, lightning, fire, or radiant damage with a psychic power, add +1 damage per die.
Spirit Guardian	Allies within 10 ft of you gain advantage on saving throws against fear while you are conscious.

11.12.5 Empowered Rune

At level 5, once per short rest, cast one Warlock, Divination, or Telekinesis power as Empowered without paying the additional Empowered Warp Pressure cost.

11.12.6 Battle-Seer

When you cast a psychic power from Divination, Telekinesis, or the Warlock list, you may move 5 ft before or after the power without provoking opportunity attacks.

11.12.7 Path Feature

Warlock Path	Feature
Seer of Battle	Your d4 becomes a d6 for your Warlock Path feature.
Storm Warlock	Once per turn, when a psychic power damages a creature, push it 5 ft.

Warlock Path	Feature
Spirit Guardian	When you reduce damage with Rune Ward, the target also gains temporary HP equal to your proficiency bonus.

11.12.9 Ghosthelm Discipline

When Perils trigger, reduce the psychic damage you take from the Perils result by your proficiency

bonus. Once per long rest, you may reroll the Perils severity roll, but must use the new result.

11.12.10 War-Rune Mastery

Once per short rest, when you cast a Minor or Standard power from the Warlock, Divination, or Telekinesis lists, you may target one additional creature within 10 ft of the original target. The second target takes half damage; if the power has no damage, the secondary effect lasts no longer than until the start of your next turn unless the GM rules the effect cannot sensibly be split.

11.12.11 Major Rune Access

You may learn one Major Power from the Universal, Divination, Telekinesis, or Warlock lists. You

cannot learn Malefic Major Powers.

11.12.13 Fate Splitter

Once per long rest, when a creature you can see within 60 ft makes an attack roll, saving throw, or

ability check, roll 1d6 and either add or subtract it from the result.

11.12.14 Path Feature

Warlock Path	Feature
Seer of Battle	Once per short rest, give one ally advantage on an attack, save, or check as a reaction.
Storm Warlock	Your first damaging psychic power each combat deals +1d8 damage.
Spirit Guardian	Allies protected by your Rune Ward also gain advantage on the next fear or psychic saving throw they make before your next turn.

11.12.15 Storm of Runes

Once per long rest, for 1 minute, your first psychic power each turn costs 1 less Warp Pressure, minimum

1. If Perils triggers during this minute, add +2 to the severity roll after all reductions.

11.12.17 Spirit-Rune Focus

Choose one Warlock, Divination, or Telekinesis power you know. Once per short rest, you may

cast it with its Warp Pressure cost reduced by 1, minimum 1.

11.12.18 Path Feature

Warlock Path	Feature
Seer of Battle	Your reaction advantage may be used after the d20 is rolled but before the result is declared.
Storm Warlock	Your Storm Warlock push increases to 10 ft.
Spirit Guardian	When Rune Ward protects an ally, one hostile creature within 30 ft has disadvantage on its next psychic saving throw.

11.12.20 Farseer’s Echo

Once per long rest, for 1 minute, whenever you cast a Warlock, Divination, or Telekinesis power,

choose one ally within 30 ft. That ally may move 5 ft or add +1d4 to their next attack roll, saving

throw, or ability check before your next turn.

SECTION 12

Talents

The instructor asks you to repeat the movement. You are tired, the floor is cold, and the correction seems too small to matter. Across the hall, an older soldier practises the same motion without being asked.

Much later, under very different lighting, your hand finds the right place before thought catches up. Skill is often remembered that way: a quiet hour returning when there are no quiet hours left. What looks effortless to a stranger may be the work of years.

12 Talents

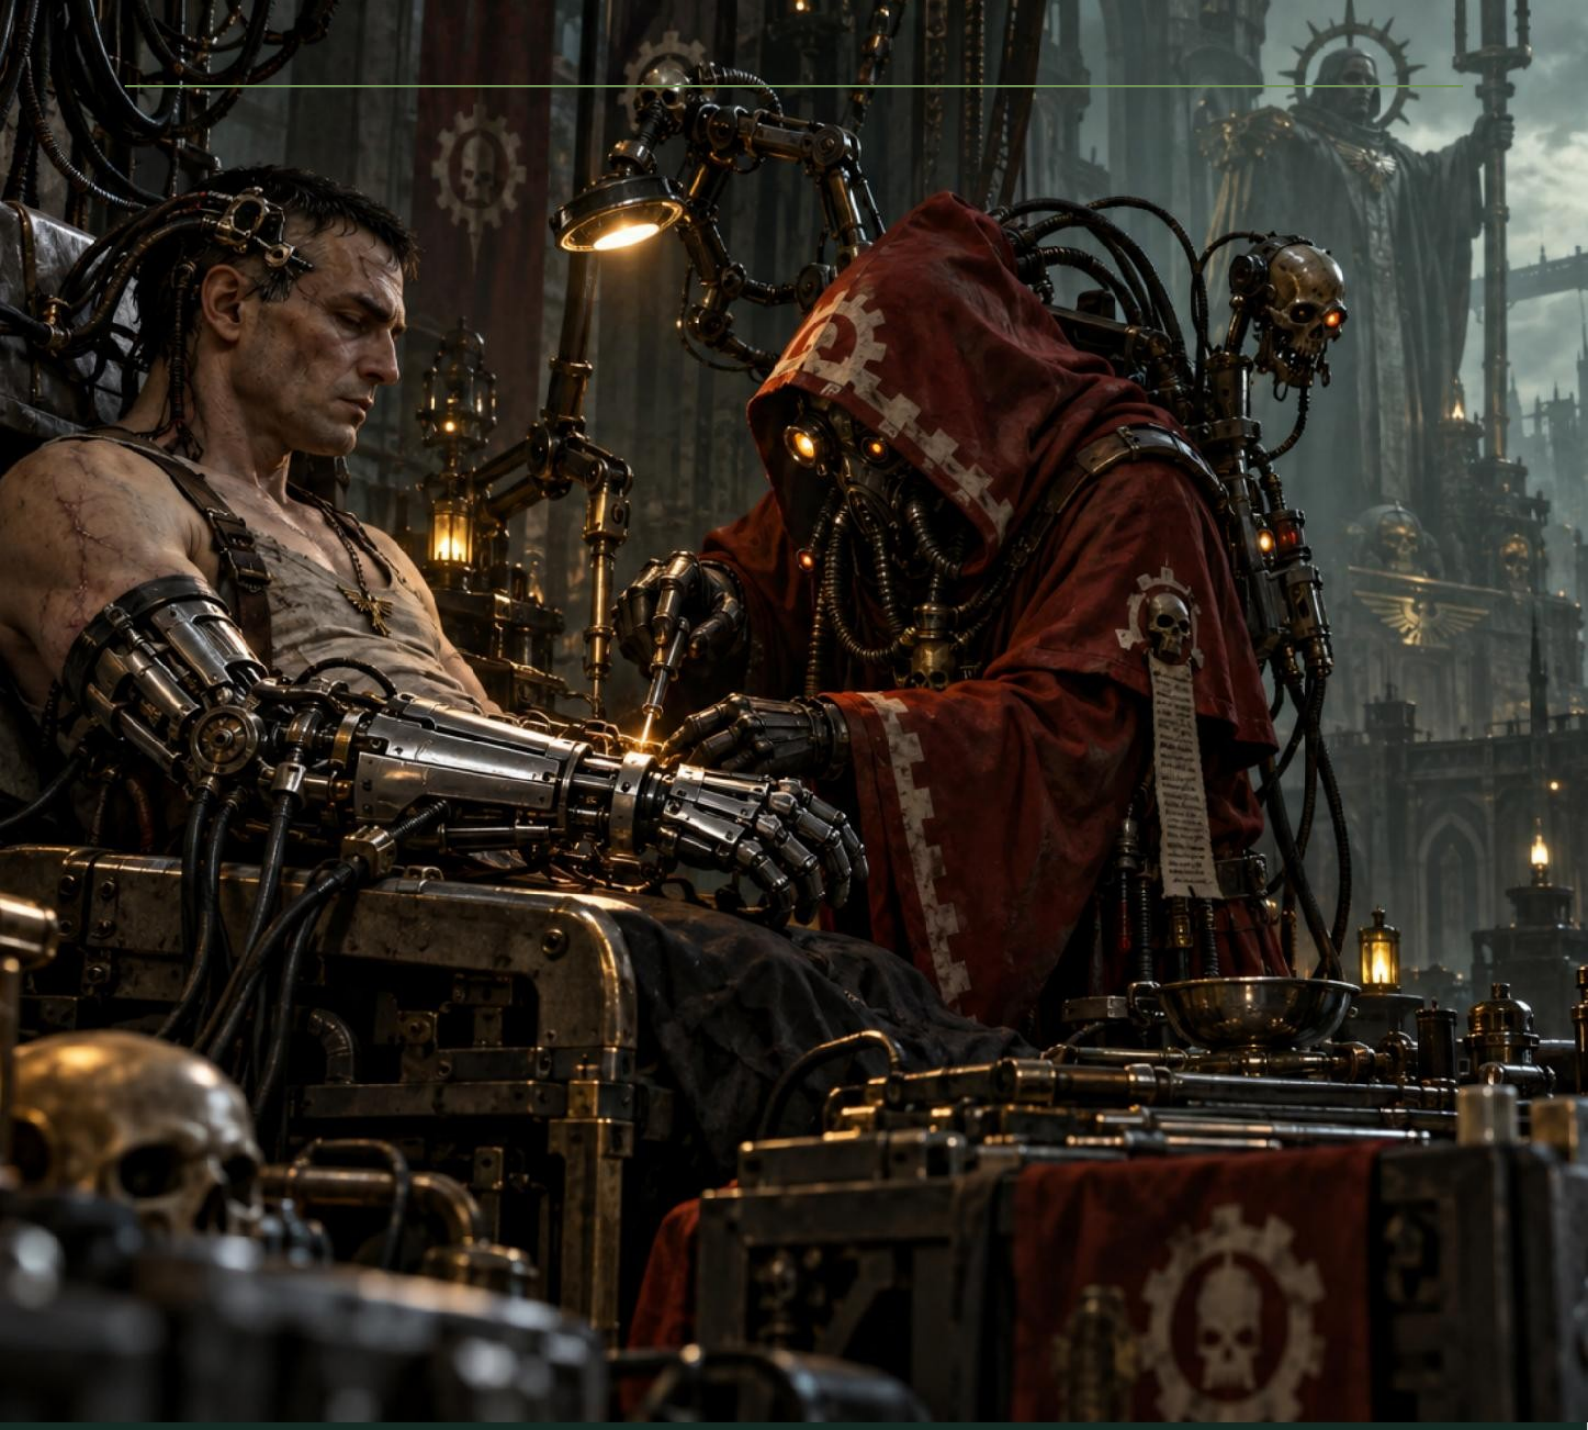
At level 4, a character may take a Talent instead of an Ability Score Improvement.

12.1 General Talents

Talent	Benefit
Rapid Reload	Reload basic weapons as a bonus action instead of an action.
Hip Fire	After moving at least 10 ft, make one pistol attack as a bonus action.
Close-Quarters Killer	You do not suffer disadvantage when making ranged attacks within 5 ft.
Heavy Weapon Training	You ignore the movement penalty from Heavy weapons.
Iron Discipline	Advantage on saving throws against fear and Suppression.
Combat Medic	As an action, restore 1d6 + proficiency bonus HP to an adjacent creature. Uses equal to your proficiency bonus per long rest.
Grenadier	Grenade save DCs increase by +1. You can throw grenades 20 ft farther.
Brawler	Your unarmed strikes deal 1d6 damage, or 1d8 if both hands are free.
Cybernetic Implant	Gain one minor augmetic upgrade.
Point Blank Execution	Once per short rest, when you hit a target within 5 ft with a pistol or shotgun, add 1d6 damage.
Suppressive Discipline	When you force a Suppression save, increase the DC by 1.
Field Armourer	During a short rest, repair one damaged weapon or restore one use of a shield, field, or armour feature at the GM's discretion.
Bayonet Fighter	When wielding a basic firearm in two hands, you may make a 1d6 piercing melee attack with it.
Breacher	You have advantage on checks to force doors, smash barricades, and breach weak bulkheads. Your first attack against an object deals +1d8 damage.
Crisis Runner	When you Dash, difficult terrain caused by rubble, crowds, gantries, wreckage, or industrial clutter costs no extra movement.
Dead Calm	Once per short rest, ignore disadvantage on one ranged attack caused by Suppression, fear, smoke, darkness, or battlefield chaos.
Tactical Reposition	When you take the Disengage action, one ally within 5 ft may move 5 ft without provoking opportunity attacks.
Weapon Specialist	Choose one weapon group: pistols, basic firearms, sniper weapons, shotguns, chain weapons, shock weapons, plasma, melta, or heavy weapons. Gain +1 damage with that group.
Armour Familiarity	While wearing armour you are proficient with, reduce incoming damage from non-critical weapon attacks by 1.
Relic-Bearer	You carry a minor relic, oath-token, saint bone, engraved casing, or machine charm. Once per long rest, add 1d4 to a saving throw after seeing the roll.

12.2 Species-Restricted Talents

Talent	Requirement	Benefit
Ogryn Wall	Ogryn	Allies behind you gain light cover while you are not incapacitated.
Bigger Gun	Ogryn	You can wield one Heavy weapon without disadvantage from moving.
Loyal as Stone	Ogryn	When an ally within 5 ft fails a death save, you may use your reaction to let them reroll it.
Bone 'ead Implant	Ogryn	Increase Intelligence by 1, maximum 12. You gain proficiency in Wisdom saves or one skill.
Too Angry to Notice	Ogryn	Once per short rest, reduce psychic, poison, or necrotic damage by 1d12 + Constitution modifier.
Ratling Vanish	Ratling	When you take damage, use your reaction to move 10 ft without provoking opportunity attacks.
Impossible Shot	Ratling	Once per short rest, ignore cover on one ranged attack.
Pocket Marksman	Ratling	When prone or behind cover, your first ranged attack each turn deals +1 damage.
Scavver's Luck	Ratling	Once per long rest, declare that you packed a small mundane item worth 25 throne gelt or less.
Cook's Morale	Ratling	During a short rest, cook or brew something edible. Up to five allies regain +1 extra hit point per Hit Die spent.
Machine Precision	Skitarii	Once per short rest, add your Intelligence modifier to a weapon damage roll.
Sacred Augmetics	Skitarii	When you regain hit points during a short rest, regain additional HP equal to your proficiency bonus.
Rad-Hardened	Skitarii	Resistance to poison or radiation damage. Advantage on saves against radiation, toxins, and disease.
Noospheric Burst	Skitarii	Once per short rest, as a bonus action, choose one ally within 60 ft. Their next attack gains +1d4 to hit.
Cold Logic	Skitarii	Once per long rest, treat a failed Wisdom saving throw against fear, charm, or psychic manipulation as a success.
Witch-Sight	Human Psyker	You can sense active psychic effects, daemonic influence, and Warp residue within 30 ft.
Imperial Flexibility	Human	Gain proficiency in one skill, tool, or weapon group.
Last Order Standing	Human	Once per long rest, when an ally within 30 ft drops to 0 hit points, you gain temporary HP equal to your level + proficiency bonus.
Sanctioning Scars	Human Psyker	When you trigger Perils, reduce the psychic damage you take from that Peril's result by your proficiency bonus.
Hive-Blooded	Human or Ratling	You have advantage on checks to navigate hive districts, underhive markets, vents, hab-blocks, sump routes, and gang territory.
Ancestor's Grudge	Squat/Kin	Once per short rest, when a creature damages you, mark it. Your next hit against it deals +1d6 damage.
Hold-Born Engineer	Squat/Kin	Gain proficiency in Technology or an engineering tool. You have advantage on checks to repair, breach, mine, or salvage machinery.
Void Stock	Squat/Kin	Advantage on saves against vacuum exposure, suffocation, toxic atmosphere, and exhaustion from poor conditions.
Iron Stance	Squat/Kin	If you move no more than half your speed on your turn, you gain +1 AC until your next turn.
Kin Weapon Master	Squat/Kin	Gain +1 damage with Kin weapons.
Aeldari Grace	Aeldari	Your speed increases by 5 ft while wearing light or Aeldari armour.
Path Discipline	Aeldari	Once per long rest, reroll a failed Wisdom or Dexterity saving throw.
Ranger's Cloak	Aeldari Outcast	You may hide when lightly obscured by ruins, foliage, smoke, shadow, or battlefield debris.
Witchblade Adept	Aeldari Warlock	Add +1 damage with witchblades and singing spears; these weapons count as psychic for overcoming resistance.
Alien Reflexes	Aeldari	Once per short rest, when an enemy misses you with an attack, move 5 ft without provoking opportunity attacks.



SECTION 13

Augmetic Upgrades

The new hand lies open on a clean cloth. Its fingers are still until the adept touches a contact and asks you to imagine closing them. Somewhere beneath the bench, a machine answers with a soft, regular hum.

The first movement is unfamiliar. So is the weight, the sound against the chair and the absence of an old ache. Others will see machinery. You will learn the daily work of making it yours: maintenance, adjustment and the patient recovery of ordinary gestures.

13 Augmetic Upgrades

Augmetic upgrades list typical Availability because installation requires both the device and appropriate surgical or technical support. Standard medical replacement can restore lost function without automatically granting one of these upgrade benefits.

Upgrade	Effect	Availability
Optical Implant	Gain darkvision 60 ft, or add +1d4 to a Perception check once per short rest.	Controlled
Bionic Arm	Gain +1 to Athletics checks and melee damage rolls using that arm.	Scarce
Bionic Legs	Gain +5 ft movement speed and advantage on saves against being knocked prone.	Scarce
Subdermal Plating	Gain +1 AC while not wearing heavy armour.	Rare
Respirator Implant	Advantage on saves against gas, smoke, poison, and airborne disease.	Controlled
Data-Jack	Advantage on checks to interface with cogitators, terminals, locks, and security systems.	Controlled
Vox Implant	Communicate silently with allies within 120 ft who have compatible vox systems.	Controlled
Pain Editor	Once per long rest, when reduced below half HP, gain temporary HP equal to level + Constitution modifier.	Rare
Recoil Bracing	Ignore disadvantage from firing a Heavy weapon after moving once per short rest.	Scarce
Targeting Lens	Once per short rest, add +1d4 to a ranged attack roll after seeing the d20 roll.	Scarce
Mag-Lock Palm	You cannot be disarmed of one held weapon unless incapacitated, restrained, or unconscious.	Controlled
Skeletal Reinforcement	Gain advantage on saves against being shoved, knocked prone, or crushed.	Scarce
Dermal Insulation	Resistance to environmental cold and heat. Advantage on saves against exposure.	Controlled
Chem Injector	As a bonus action once per long rest, gain temporary HP equal to 1d6 + Constitution modifier.	Scarce
Internal Chrono	You always know mission time, elapsed time, and basic direction underground or aboard ships unless affected by Warp distortion.	Controlled
Mechadendrite, Utility	You can manipulate unattended Tiny objects, hold a tool, or perform basic maintenance within 5 ft. It cannot attack.	Controlled
Mechadendrite, Medicae	Gain proficiency in Medicine. Once per long rest, stabilise a creature and restore 1 HP as an action.	Scarce
Mechadendrite, Combat	Once per short rest, make a 1d4 bludgeoning or piercing attack as a bonus action.	Scarce
Cranial Cogitator	Gain proficiency in Investigation or Technology. Once per long rest, reroll a failed Intelligence check.	Scarce
Augmetic Heart	Advantage on saves against exhaustion from forced marches, blood loss, poison, or shock.	Rare
Black-Iron Jaw	Advantage on Intimidation checks when visible. Disadvantage on Persuasion checks in refined Imperial society.	Controlled
Vocal Coder	You can mimic machine tones, vox distortion, and binharic fragments. Gain advantage on checks to communicate with Mechanicus systems if proficient in Technology.	Controlled

SECTION 14

Psychic Powers

The candle bends away from a draught nobody feels. Across the chamber, the psyker closes their eyes and begins the breathing pattern again. A loose fragment of stone rises, trembling, from the floor.

For a moment, intention and reality draw dangerously close. The watchers cannot see the effort required to keep that moment small. When the stone settles, a companion offers water. Nobody asks for another demonstration. There will be time enough for power when necessity leaves no gentler choice.

14 Psychic Powers

“If the voice answers before you ask, end the communion.” — Warning copied into a sanctioned psyker’s journal

A psychic attack uses the psychic attack modifier printed in this chapter. A psychic saving throw uses the psychic save DC. Psychic powers are not spells for rules that specifically refer to spellcasting unless a Dark Imperium feature explicitly says otherwise.

Only Psykers and characters with the Touched by the Warp trait can use psychic powers.

14.1 Psychic Save DC

8 + proficiency bonus + Intelligence or Wisdom modifier

14.2 Psychic Attack Modifier

Proficiency bonus + Intelligence or Wisdom modifier

14.3 Known Powers

Known power progression is now merged into the Psyker and Aeldari Warlock class level tables in sections 11.3 and 11.12. Use those tables for Minor, Standard, and Major powers known. Characters with Touched by the Warp still know one Minor Universal power only, unless a class feature, relic, corruption event, or GM reward says otherwise.

14.4 Psychic Power Cost and Empowered Powers

Revised cost table

Each psychic power increases Warp Pressure. Empowering a power now concretely changes the power and increases risk.

Power Type	Warp Pressure Cost
Minor Power	+1 Warp Pressure
Standard Power	+2 Warp Pressure
Major Power	+3 Warp Pressure
Empowered Power	+1 additional Warp Pressure, plus one Empowered effect below
Empowered Option	**Effect**
Overcharged Damage	If the power deals damage, add one additional damage die of the same type.
Brutal Manifestation	If the power requires a saving throw, increase the Psychic Save DC by +1 for that casting.
Extended Reach	Increase the range by 30 ft, or increase a cone/area radius by 5 ft.
Sustained Focus	If the power grants temporary hit points, healing, protection, or a bonus, increase the value by your proficiency bonus.
Split Manifestation	If the power targets one creature and does not already affect multiple targets, target one additional creature within 10 ft of the original target. The second target takes half damage or receives half the non-damage effect, GM adjudication.
Discipline Mastery	If the power belongs to your chosen discipline, you may reroll one damage die or healing die from the power.

Empowered restriction

A power can only be Empowered once per casting. Empowering a power always increases Warp Pressure before the Perils roll is made. Minor powers can be empowered, but doing so is reckless and should feel dangerous at low levels.

14.5 Minor Psychic Powers

Power	Tag	Rule
Warp Spark	Universal	Action. Range 60 ft. Psychic attack. On hit, 1d8 force damage.
Kinetic Push	Telekinesis, Universal	Action. Range 30 ft. Strength save. Failure: pushed 10 ft and takes 1d6 force damage.
Mind Lumen	Divination, Universal	Bonus Action. Self. 10 minutes. See psychic traces, Warp residue, emotional impressions, and unnatural disturbances within 30 ft.
Static Veil	Telekinesis, Universal	Reaction. Trigger: targeted by a ranged attack. Add +2 AC against that attack.
Flesh Knit	Biomancy	Action. Touch. A creature regains 1d6 + psychic ability modifier HP.
Pain Spike	Biomancy	Action. Range 60 ft. Constitution save. Failure: 1d8 psychic damage, and the target cannot take reactions.
Ember Flicker	Pyromancy	Bonus Action. Range 30 ft. Ignite or extinguish a small flame; one creature takes 1 fire damage if holding a flammable object.

Power	Tag	Rule
Ashen Brand	Pyromancy	Action. Range: 60 ft. Psychic attack. On hit, 1d8 fire/radiant damage, and the target sheds dim light until your next turn.
Danger Sense	Divination	Reaction. When you roll initiative, add 1d4 to your initiative roll.
Echo Read	Divination	Action. Touch an object or corpse. Learn one recent strong emotion, danger, or image attached to it.
Whisper from Below	Malefic	Bonus Action. Range 30 ft. One creature makes a Wisdom save. Failure: disadvantage on the next Wisdom saving throw before your next turn.
Warp Bite	Malefic	Action. Range 60 ft. Psychic attack. On hit, 1d10 psychic damage. If you roll a natural 1, immediately add +1 Warp Pressure.
Null Glare	Null	Action. Range 30 ft. One creature makes a Charisma save. Failure: it has disadvantage on the next psychic attack roll it makes, or the next saving throw it forces, before your next turn.
Blank Sense	Null	Bonus Action. Self. 10 minutes. Sense active psychic effects, daemonic influence, blanks, and Warp residue within 30 ft.

14.6 Standard Psychic Powers

Power	Tag	Rule
Focused Rupture	Universal	Action. Range 90 ft. Intelligence save. Failure: 3d8 force damage; success: half. If this kills the target, reduce Warp Pressure by 1.
Assail	Telekinesis, Universal	Action. Range 60 ft. Choose up to three creatures. Psychic attack against each target. Hit: 1d6 force damage.
Psychic Shield	Telekinesis, Universal	Action. Range 30 ft. One creature gains temporary HP equal to 1d8 + psychic ability modifier + proficiency bonus and advantage on fear saves while they remain.
Soulfire	Pyromancy, Universal	Action. Range 60 ft. Dexterity save. Failure: 2d6 fire/radiant damage and burns for 1d6 at the start of the next turn; success: half and no burn.
Dominate Nerve	Biomancy, Universal	Action. Range 60 ft. Wisdom save. Failure: no reactions and disadvantage on next attack roll.
Warp Step	Universal	Bonus Action. Teleport 30 ft to a visible unoccupied space. Immediately roll for Perils even if Warp Pressure would not normally trigger it.
Blood Surge	Biomancy	Bonus Action. Range 30 ft. One ally gains +10 ft speed and advantage on Strength checks for 1 minute.
Toxic Bloom	Biomancy	Action. 10-ft radius within 60 ft. Constitution save. Failure: 2d8 poison/necrotic damage and poisoned until next turn; success: half and no poison.
Kinetic Bulwark	Telekinesis	Reaction. When an ally within 30 ft is hit, reduce damage by 2d8 + psychic ability modifier.
Crush Grip	Telekinesis	Action. Range 60 ft. Strength save. Failure: 2d8 force damage, and speed becomes 0 until the end of the next turn.
Fate's Nudge	Divination	Reaction. Add or subtract 1d4 from a d20 roll made by a creature you can see within 60 ft.
Prescient Aim	Divination	Bonus Action. Range 60 ft. One ally gains advantage on their next ranged attack before your next turn.
Cleansing Wave	Pyromancy	Action. 15-ft cone. Dexterity save. Failure: 3d6 fire/radiant damage; success: half. Daemons and corrupted creatures take +1d6.
Burning Halo	Pyromancy	Bonus Action. Self. 1 minute. Creatures that hit you with melee attacks take fire damage equal to your proficiency bonus.
Terror Echo	Malefic	Action. Range 60 ft. Wisdom save. Failure: frightened until the end of the next turn and takes 2d6 psychic damage.
Baleful Rupture	Malefic	Action. Range 90 ft. Intelligence save. Failure: 4d8 psychic damage; success: half. Add +1 extra Warp Pressure after resolving.
Null Field	Null	Action. Self, 10-ft aura until the start of your next turn. Allies in the aura have advantage on saving throws against psychic powers. Hostile psykers inside the aura increase Warp Pressure by +1 when using a power.
Silence the Witch	Null	Reaction. When a creature within 60 ft uses a psychic power, force it to make a Charisma save. On a failure, it adds +1d4 to any Perils severity roll caused by that power.

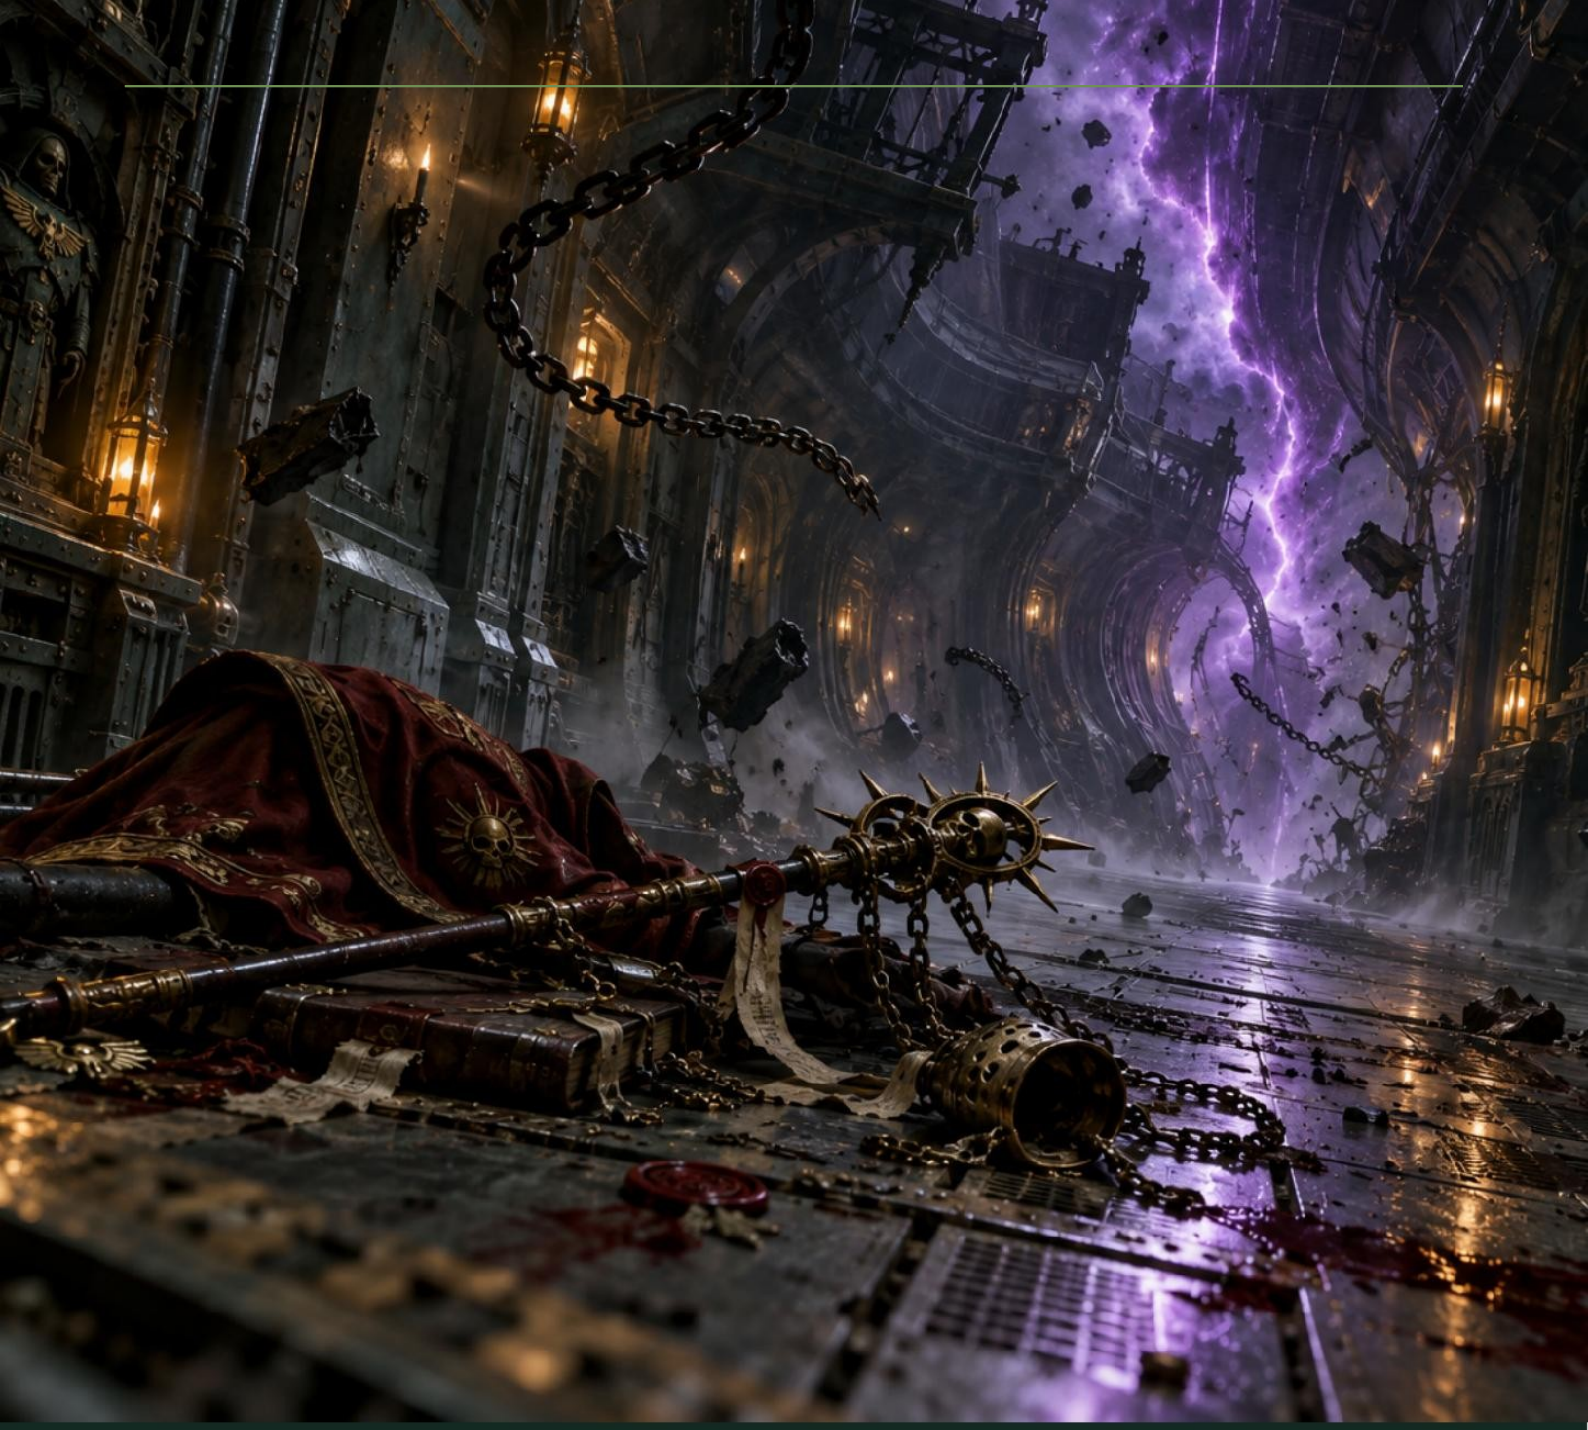
14.7 Major Psychic Powers

Power	Tag	Rule
Telekinetic Crush	Telekinesis	Action. Range 60 ft. Strength save. Failure: 4d8 force damage and restrained until the end of the next turn; success: half and not restrained.
Inferno Bloom	Pyromancy	Action. Point within 90 ft. 15-ft radius Dexterity save. Failure: 5d6 fire/radiant damage; success:s half.
Prescient Execution	Divination	Bonus Action. Range 30 ft. Concentration up to 1 minute. Once per turn, add 1d4 to an attack roll, saving throw, or ability check by yourself or an ally within range.
Biomantic Surge	Biomancy	Action. Touch. A creature regains 4d8 + your psychic ability modifier HP and gains advantage on Strength and Constitution saves for 1 minute.
Flesh Reforged	Biomancy	Action. Range 30 ft. One creature regains 3d8 HP and ends one poisoned, diseased, bleeding, or crippled condition at the GM's discretion.
Hemorrhage	Biomancy	Action. Range 60 ft. Constitution save. Failure: 5d8 necrotic damage, and the target has disadvantage on Constitution saves until next turn; success: half.
Force Dome	Telekinesis	Action. 10-ft radius centred on a point within 60 ft. Allies inside gain +3 AC against ranged attacks until the start of your next turn.
Foresight Cascade	Divination	Action. Range 60 ft. Up to three allies may immediately move 10 ft without provoking opportunity attacks and add 1d4 to their next d20 roll.
Soulstorm	Pyromancy	Action. 20-ft radius within 90 ft. Dexterity save. Failure: 4d6 fire/radiant damage and burning ground for 1 minute; success:s half.
Malefic Door	Malefic	Action. Range 60 ft. Open a screaming tear. One creature makes a Wisdom save. Failure: 6d8 psychic damage and frightened for 1 minute; repeat save at the end of each turn. Immediately add +2 extra Warp Pressure after resolving.
Possession Spike	Malefic	Action. Range 30 ft. Charisma save. Failure: target is incapacitated until the end of the next turn and takes 4d8 psychic damage. If this triggers Perils, roll Perils severity with advantage and use the higher result.
Pariah Zone	Null	Action. 15-ft radius centred on you for 1 minute, concentration. Psychic powers cast inside the area cost +1 Warp Pressure, and allies inside the area have advantage on saving throws against psychic powers.

14.8 Warlock Rune Powers

Warlock Rune Powers are discipline-locked to Aeldari Warlocks unless the GM allows a rare relic, spirit-stone, or farseer intervention.

Power	Level	Tag	Rule
Conceal	Minor	Warlock, Divination	Bonus Action. Range 30 ft. One creature gains +1 AC against ranged attacks until your next turn if it has moved or is in cover.
Reveal	Minor	Warlock, Divination	Bonus Action. Range 60 ft. One hidden or obscured creature makes a Wisdom save. On failure, it cannot benefit from invisibility or being hidden until your next turn.
Protect	Standard	Warlock, Telekinesis	Action. Range 30 ft. One ally gains +2 AC until the start of your next turn.
Jinx	Standard	Warlock, Divination	Action. Range 60 ft. Wisdom save. On failure, the target suffers -2 AC until the start of your next turn.
Quicken	Standard	Warlock, Biomancy	Bonus Action. Range 30 ft. One ally gains +10 ft speed and may move through allied spaces until your next turn.
Restrain Fate	Standard	Warlock, Divination	Reaction. When a creature within 60 ft makes an attack roll, subtract 1d4 from the roll.
Destructor Rune	Major	Warlock, Pyromancy	Action. 15-ft cone. Dexterity save. Failure: 5d6 fire/radiant damage; success: half. Corrupted creatures take +1d6.
Fortune Thread	Major	Warlock, Divination	Bonus Action. Range 30 ft. For 1 minute, once per round, the target may reroll one attack roll, saving throw, or ability check. Concentration.



SECTION 15

Perils of the Warp

The echo returns before the word is spoken. Every lumen in the corridor dims, and the metal beneath your boots seems to flex like something breathing. The warning bell remains perfectly silent.

Something has noticed the opening. You cannot tell whether the shape in the glass is outside it or reflected from behind you. A companion grips your sleeve and speaks your name with deliberate care. For now, that familiar voice is the surest thing in the room.

15 Perils of the Warp

Psychic power is not normal spellcasting. It is dangerous, unstable, and tempting.

15.1 Warp Pressure

A Psyker has a score called Warp Pressure.

Warp Pressure starts at 0.

Whenever you use a psychic power, increase your Warp Pressure by that power's cost.

After resolving the power, roll a d20. If the result is equal to or lower than your current Warp Pressure,

Perils of the Warp triggers.

Example:

- Your Warp Pressure is 5.
- You cast Focused Rupture.
- Focused Rupture adds +2 Warp Pressure.
- Your Warp Pressure is now 7.
- You roll a d20.
- On a 1- 7, Perils trigger.

15.2 Reducing Warp Pressure

Method	Effect
Short rest	Reduce Warp Pressure to 0.
Long rest	Reduce Warp Pressure to 0.
Vent as an action	Make a DC 12 Wisdom save. On success, reduce Warp Pressure by 1d4 + proficiency bonus. On failure, reduce it by 1 and take 1d6 psychic damage.
Kill with Focused Rupture	Reduce Warp Pressure by 1.
Stabilising Focus	Reduce Warp Pressure by 1 once per short rest.

15.3 Perils Severity

When Perils trigger, roll:

1d20 + current Warp Pressure

Then consult the table.

Result	Peril
2-6	Warp Static
7-10	Bleeding Eyes
11-14	Soul Echo
15-18	Warp Scream
19-22	Possession Pressure
23-26	Uncontrolled Manifestation
27-30	Reality Tear
31+	Catastrophic Perils

15.4 Perils Effects

15.4.1 Warp Static

You take 1d6 psychic damage and cannot take reactions until your next turn.

15.4.2 Bleeding Eyes

You take 2d6 psychic damage and are blinded until the end of your next turn.

15.4.3 Soul Echo

Every creature within 10 ft of you, including you, takes 2d6 psychic damage.

15.4.4 Warp Scream

Creatures of your choice within 30 ft must make a Wisdom saving throw. On a failure, they become

frightened until the end of their next turn.

You are not automatically exempt from this effect.

15.4.5 Possession Pressure

You are incapacitated until the end of your next turn as something presses against your mind.

15.4.6 Uncontrolled Manifestation

The GM chooses a random psychic power you know. It immediately targets a random valid creature or

location.

15.4.7 Reality Tear

A 10-ft radius area within 30 ft becomes warped terrain for 1 minute.

A creature that enters the area for the first time on a turn or starts its turn there takes 2d6 force

damage.

15.4.8 Catastrophic Perils

You drop to 0 hit points. Every creature within 30 ft takes 4d6 psychic damage.

A hostile Warp entity, hallucination, corruption event, daemon sign, or possession threat enters the

scene.

After resolving Catastrophic Perils, the character gains 1 Corruption.

15.5 After Perils

After resolving Perils, reduce your Warp Pressure by half, rounded down.

15.6 Aeldari Warlock Perils

Aeldari Warlocks use the standard Perils rules unless the GM chooses to use this specialised table. These results should feel like rune backlash, spirit-stone shrieking, fate distortion, or webway trauma rather than crude daemonic possession.

Severity	Aeldari Peril	Result
2-6	Rune Static	You take 1d6 psychic damage and cannot use Rune Ward until the start of your next turn.
7-10	Ghosthelm Pain	You take 2d6 psychic damage and have disadvantage on your next psychic attack roll or psychic saving throw before the end of your next turn.
11-14	Ancestral Echo	Every creature within 10 ft hears dead voices through your mind. Each creature, including you, takes 1d6 psychic damage and cannot take reactions until its next turn.
15-18	Fate Snarl	Until the end of your next turn, the first d20 roll made by you or an ally within 30 ft is reduced by 1d4.
19-22	Spirit-Stone Cry	You are incapacitated until the end of your next turn. One ally within 30 ft takes 1d6 psychic damage unless they succeed on a Wisdom save against your Psychic Save DC.
23-26	Rune Miscast	The GM chooses a Warlock, Divination, or Telekinesis power you know. It immediately targets a random valid creature or location.
27-30	Webway Shear	A 10-ft radius area within 30 ft becomes distorted terrain for 1 minute. A creature entering it for the first time on a turn or starting there takes 2d6 force damage.
31+	Doom of the Seer	You drop to 0 hit points. Every creature within 30 ft takes 4d6 psychic damage. You gain 1 Corruption or a GM-approved Doom Mark tied to Aeldari fate, spirit-stones, or daemonic pursuit.

15.7 Malefic-Touched Perils

When Perils is triggered by a Malefic power, the GM may use this table or add +2 to the normal Perils severity roll. These results should feel predatory, corrupting, and narratively dangerous.

Severity	Malefic Peril	Result
2-6	Malignant Static	You take 1d6 psychic damage and have disadvantage on your next saving throw against fear, charm, or corruption.
7-10	Blooded Eyes	You take 2d6 psychic damage and a nearby Warp entity, cult icon, or daemon-touched creature becomes aware of your presence.
11-14	Predatory Echo	Every creature within 10 ft, including you, takes 2d6 psychic damage. The GM may describe a hostile voice, omen, or watching presence.
15-18	Daemon Scream	Creatures of your choice within 30 ft must make a Wisdom save or become frightened until the end of their next turn. After Perils is reduced, your Warp Pressure increases by 1.
19-22	Possession Pressure	You are incapacitated until the end of your next turn. Make a Charisma save against your Psychic Save DC; on a failure, gain 1 Corruption.
23-26	Unbidden Manifestation	The GM chooses a random Malefic power you know. If you know no valid Malefic power, Terror Echo manifests instead. The target is random.
27-30	Reality Wound	A 10-ft radius area within 30 ft becomes corrupted terrain for 1 minute. Creatures entering or starting there take 2d6 psychic damage. Daemons and corrupted creatures have advantage on their next attack made from inside it.
31+	Catastrophic Breach	You drop to 0 hit points. Every creature within 30 ft takes 4d6 psychic damage. A hostile Warp entity, possession threat, or daemon sign enters the scene, and you gain 2 Corruption instead of 1.

SECTION 16

Corruption

The object is wrapped exactly as you left it. That should be reassuring. Instead, you find yourself remembering a detail from a dream you had before the expedition ever began.

Danger does not always announce itself with violence. It can arrive as a private exception, an answer too welcome to question, or the conviction that nobody else would understand. Somewhere along that road, a companion may notice a change. Decide whether you would still allow them to speak.

16 Corruption

Corruption represents lasting spiritual, psychic or bodily contamination. It is optional, but strongly recommended in campaigns where the Warp, forbidden relics or daemonic influence are major themes. Corruption is not a surprise character-removal mechanic: severe consequences should be visible before they become irreversible.

16.1 Gaining Corruption

- Catastrophic Perils or direct possession pressure.
- Bargaining with a Warp entity.
- Using a forbidden relic whose rules state that it corrupts the bearer.
- Deliberately channelling unstable or Malefic power beyond safe limits.
- Prolonged exposure to a major daemonic ritual or Warp breach.
- Failing a clearly announced corruption save at a major narrative threshold.

16.2 Corruption Track

Corruption	Effect
0	Uncorrupted. No effect.
1	Omen. Nightmares, whispers, marks or momentary sensory distortions.
2	Tainted. The signs become repeatable; appropriate psychic or religious investigation can detect them.
3	Scarred. Choose or gain a minor corruption scar. It should create a narrow complication, not disable the character.
4	Marked. Warp entities and sensitive psykers may notice you. Forbidden artefacts react more strongly to your presence.
5	Critical. You are a major liability to the warband. The GM must make the danger and possible remedies explicit.
6	Crisis. The character faces possession, mutation, damnation, martyrdom or transformation. This is a story decision involving the player and GM, not automatic immediate NPC conversion.

16.3 Corruption Scars

At Corruption 3 or when a rule specifically causes a scar, choose a fitting consequence with the GM: visible mutation, recurring hallucination, warp-sensitive wound, compulsive ritual, psychic echo, social stigma or another narrow effect. A scar should produce decisions and roleplay without making a character mechanically unusable.

16.4 Reducing Corruption

Corruption is deliberately difficult to remove. Major purification, exorcism, sacrifice, a factional favour, destruction of the source or a dedicated redemption mission may reduce Corruption by 1. Ordinary rests and medicine do not remove it.

SECTION 17

Starting Equipment

Everything you are taking fits across one narrow bunk. The pack has a new buckle and an old stain. A ration tin rolls against the canteen while you check the list for the third time.

There is room for one small thing that nobody issued: a photograph, a carving, a scrap of cloth. You put it where your hand can find it in darkness. The rest of the kit may keep you alive. This is the thing that reminds you why returning matters.

17 Starting Equipment

17.1 Class Equipment Packages

Starting equipment is treated as issued, inherited, sanctioned, or otherwise legitimately acquired during character creation. Its normal Availability matters only when replacing, upgrading, or acquiring additional copies during play.

Class	Starting Equipment
Veteran	Lasgun or autogun; laspistol; combat blade; flak armour; 2 frag grenades; medkit or auspex.
Zealot	Chainsword or heavy axe; laspistol or autopistol; flak armour; symbol of faith; 1 firebomb; 1 frag grenade.
Psyker	Force sword or force staff; laspistol; heavy clothing or light armour; sanctioning brands/restraints; psychic focus; 2 Minor and 2 Standard Psychic Powers.
Ogryn Skullbreaker	Ripper gun or Ogryn club; Ogryn plate; 1 frag bomb; rations; lucky charm; optional slab shield.
Arbites Enforcer	Combat shotgun; shock maul; riot shield; carapace or riot armour; manacles; 1 stun grenade; 1 smoke grenade.
Hive Scum	Autopistol or stub pistol; knife; shotgun or autogun; heavy clothing or flak armour; 1 frag grenade; black-market contact.
Ratling Sharpshooter	Long-las or lasgun; stub pistol or laspistol; knife; heavy clothing or flak armour; camo cloak; cook's utensils or thieves' tools.
Skitarii Veteran	Galvanic rifle, radium carbine, or lasgun; laspistol; taser goad or combat blade; flak or carapace armour; auspex; data-jack or maintenance tools; 2 frag grenades.
Kin Armsman	Autoch-pattern bolter or ion blaster; bolt revolver or autoch-pattern pistol; Kin mesh or Hearthkyn plate; Kin power axe or concussion hammer; 2 frag grenades; oath-token.
Hernkyn Prospector	Autoch-pattern pistol or bolt revolver; ion blaster or magna-rail rifle with GM approval; prospector rig; knife or EtaCarn mining tool; survey auspex; climbing kit; claim marker.
Aeldari Outcast	Shuriken catapult or ranger long rifle; shuriken pistol; monomolecular blade; Aeldari mesh or ranger weave; spirit-token; camo cloak.
Aeldari Warlock	Witchblade or singing spear; shuriken pistol; rune armour; psychic focus/rune stones; 2 Minor and 2 Standard powers; spirit charm.

17.2 Mission Items and Supplies

These items give warbands practical tools without turning equipment into a full shopping simulator. Their listed Availability is the normal starting point; provenance, local supply and legality can still change how they are obtained.

Item	Use	Rule	Availability
Med-Stim	Bonus action	A creature you touch regains 1d6 + proficiency bonus HP; a creature can benefit from only one Med-Stim per short rest.	Issued
Med-Pack	Action	DC 12 Medicine on a creature within 5 ft. Success: regain 2d6 + proficiency bonus HP, or stabilise and restore to 1 HP. Consumed.	Issued
Field Dressing	Action	Stabilise a dying creature. With a successful DC 10 Medicine check, the target may immediately spend one Hit Die.	Issued
Ammo Pack	Action or downtime	When ammunition is being tracked, or a mission effect has exhausted a routine reload supply, restore one Reload cycle for a pistol, basic or heavy weapon. In standard play, ordinary spare ammunition is otherwise abstracted.	Issued
Specialist Ammo Pack	Action or downtime	Restore one expended Reload cycle for plasma, melta, bolt, needle, Kin, Aeldari or other advanced ammunition when that ammunition is limited. The pack must match the weapon or ammunition type.	Controlled
Grenade Bandolier	Passive	Carry up to four grenades ready for quick use; drawing one does not require an item interaction once per turn.	Issued
Weapon Maintenance Kit	Short rest	DC 12 Technology or appropriate tool check to repair one jammed, damaged, overheated or fouled weapon.	Issued
Auspex Battery	Action	Restore one expended use of an auspex/scanner or power it for one scene.	Issued
Rebreather Filter	Passive	For one mission scene, advantage on saves against gas, smoke, airborne toxins or foul atmosphere.	Issued
Void Patch Kit	Action	Seal a breached suit, cracked visor, pressure leak or small hull gap; usually DC 10 Technology or Survival under pressure.	Controlled
Stimm Slug	Bonus action	For 1 minute, gain +10 ft speed and temporary HP equal to your proficiency bonus; then make a DC 12 Constitution saving throw or gain one level of exhaustion.	Controlled
Purity Seal Charm	Reaction	Once, when you fail a save against fear, corruption or psychic horror, add 1d4 to the roll; consumed or ritually spent.	Controlled

SECTION 18

Requisition and Equipment Access

The quartermaster reads the order, then reads it again. Beyond the grille, a sealed case sits within easy reach. Between that case and your hands lie a missing signature, an old shortage and somebody else's claim.

Equipment travels through institutions as well as corridors. A trusted name may open a store; a careless promise may close it for months. The mission begins long before departure, in conversations where people decide what they can spare—and whether they believe you will bring it back.

18 Requisition and Equipment Access

Military, restricted and exceptional equipment is not treated as an ordinary shop catalogue. Requisition represents supply, authority, contacts, black markets, faction politics and whether the request is credible in the current situation. The GM controls what sources are available; this chapter tells players how the request is resolved.

18.1 Availability

Availability	Base DC	Typical Examples
Issued	8	Routine class gear, common ammunition and ordinary tools.
Controlled	11	Grenades, specialist ammunition, carapace components and surveillance gear.
Scarce	14	Plasma fuel, advanced auspexes, quality bionics and specialist transport.
Rare	17	Power weapons, refractor fields, advanced implants and sealed archives.
Exceptional	20	Master-crafted wargear, conversion fields, elite vehicles and major relic access.
Near-Unique	24	Named archeotech, irreplaceable prototypes and singular institutional assets.
Unique	No ordinary test	Requires a mission, inheritance, political intervention or equivalent story event.

18.2 Requisition Test

When the GM calls for a Requisition test, roll: d20 + proficiency bonus + relevant ability modifier + any Standing or circumstance modifier supplied by the GM. Success grants access according to the stated terms; it does not automatically mean permanent personal ownership.

Approach	Typical Skill
Formal Request	Persuasion
Locate Supply	Investigation
Mechanicus Petition	Technology
Religious Petition	Religion
Black Market	Deception or Investigation
Personal Leverage	Any appropriate skill approved by the GM

18.3 Requisition Outcomes

Result	Outcome
Failure by 5+	Refusal or a dangerous source; the attempt may create Heat, debt or misinformation.
Failure by 1-4	Available with a complication such as delay, substitute, debt, limited charges or damaged condition.
Success	Available as requested for the mission or agreed period.
Success by 5+	Improved condition, extra supplies, faster delivery or discreet paperwork.
Natural 20	No automatic miracle; add favourable provenance, a useful introduction or future access.

18.4 Xenos, Forbidden and Black-Market Gear

Availability and provenance are separate. A Rare Imperial power sword and a Rare Aeldari weapon may share the same acquisition difficulty but carry very different legal, technical and political consequences. Xenos or proscribed equipment may require a specific contact, training, modification or narrative permission even when a Requisition test succeeds.

18.5 Provenance and Faction Access

Availability answers how difficult an item is to obtain. Provenance answers who made it, who claims it, who can maintain it and what happens if you are caught carrying it. A successful Requisition test never erases provenance.

Provenance	Normal Access	Typical Complication
Imperial General	Militarum, Arbites, Inquisition, sanctioned institutions and ordinary Imperial markets.	Rank, paperwork, mission need, local shortages or questions about ownership.
Mechanicus	Forge worlds, tech-priests, Skitarii supply and approved workshops.	Ritual restrictions, machine-cult authority, data access or maintenance dependency.
Kin	Kin holds, guilds, prospectors and trusted trade contacts.	Cultural ownership, ammunition compatibility and reluctance to arm outsiders.

Provenance	Normal Access	Typical Complication
Aeldari	Craftworld, ranger, corsair or outcast networks.	Imperial illegality, alien maintenance, hidden obligations and suspicion from both sides.
Proscribed / Heretical	No routine lawful source.	Confiscation, corruption, Heat, investigation, spiritual danger or outright execution if exposed.
Black Market	Brokers, smugglers, gangers, scavengers and corrupt officials.	Fraud, debt, damaged goods, traceable serials, betrayal or the wrong provenance.

Faction access is contextual rather than a second currency. A character normally treats equipment from their own institution or culture as plausible at its listed Availability. Gear from another provenance may require a contact, narrative permission, a +2 to +5 DC increase, or a different acquisition route altogether. Aeldari and Kin player characters do not automatically make their equipment legal inside the Imperium; they merely provide a believable route to obtaining and maintaining it.

18.6 Equipment by Character Tier

Tier does not hard-lock equipment. It describes what the campaign can usually support without exceptional story justification. A low-level character can carry a relic if the story gives them one; a high-level character can still be stuck with a battered lasgun after capture or disaster.

Tier	Levels	Normal Access	Typical Exceptional Reward
Tier 1	1-4	Issued and Controlled gear. Scarce items appear as specialist mission assets.	One Scarce item, unusual modification, or limited-use specialist ammunition.
Tier 2	5-10	Issued, Controlled and Scarce gear. Rare items become plausible rewards or difficult requisitions.	A Rare weapon, advanced augmetic, field or power weapon, or first master-crafted item.
Tier 3	11-16	Scarce gear is routine for established warbands; Rare equipment is attainable through strong faction access.	Exceptional armoury access, advanced master-crafted gear, archeotech fragments or major faction-specific wargear.
Tier 4	17-20	Rare equipment can be expected around elite operatives. Exceptional gear remains politically and narratively important.	Exceptional or Near-Unique relic access tied to major obligations, patrons or campaign events.

18.7 Weapon Modifications

Most non-relic weapons have one modification slot. A master-crafted weapon may have two. A weapon cannot take the same modification twice, and a modification must make physical and fictional sense for the weapon. The GM may rename an upgrade to match its culture or technology without changing the rule.

Modification	Availability	Effect
Bayonet / Breaching Lug	Issued	A suitable ranged weapon can be used as a 1d6 piercing melee weapon without drawing another weapon. It is not Finesse unless the base weapon is Light.
Extended Magazine / Charge Pack	Controlled	Increase the weapon's Reload value by 25%, rounded up. Does not apply to Reload 1 weapons or single-use launchers.
Reflex Sight	Controlled	Once per short rest, after you roll a ranged attack but before the result is declared, add +1d4 to the roll.
Camo Wrap / Low-Signature Furniture	Controlled	Advantage on one check per short rest to conceal, hide or disguise the weapon.
Recoil Compensation	Scarce	Once per short rest, ignore disadvantage or another penalty caused specifically by moving before firing a Heavy weapon.
Targeting Optic	Scarce	When you Aim and do not move before the attack, ignore Light Cover on one ranged attack.
Reinforced Action	Scarce	The first time each mission the weapon would become Damaged because of a malfunction, harsh environment or failed maintenance check, it remains Serviceable instead.
Sanctified Fittings	Rare	Once per turn when the weapon damages a daemon, Warp-Born creature or explicitly corrupted target, add +1 radiant damage per weapon damage die.
Archeotech Interface	Exceptional	Choose one compatible advanced modification that normally could not be fitted to this pattern. Installation requires exceptional facilities and GM approval.

18.8 Master-Crafted Wargear

Master-crafted gear is not an ordinary shopping upgrade. It is normally Rare or Exceptional, comes from a named maker or institution, and should matter enough that losing it hurts. A master-crafted item has one Masterwork Trait. Particularly important relic-grade items may have a second trait at the GM's discretion. Bonuses from duplicate Masterwork Traits never stack.

Masterwork Trait	Eligible Item	Effect
Perfect Balance	Melee or ranged weapon	Gain +1 to attack rolls made with the item.
Artificer Edge	Melee weapon	Once per turn when you roll weapon damage, reroll one damage die and use the new result.
Precision Barrel / Focusing Array	Ranged weapon	Increase normal range by 25%. This does not increase maximum range beyond double the new normal range.
Rapid Feed	Reload weapon	Increase Reload by 50%, rounded up. Does not stack with Extended Magazine.

Masterwork Trait	Eligible Item	Effect
Recoil Compensation	Heavy ranged weapon	Moving before firing no longer imposes a penalty from the Heavy property, though other Heavy restrictions still apply.
Compact Pattern	Pistol, basic firearm or compact melee weapon	Advantage on checks to conceal the item; it can be readied from concealment without an item interaction once per turn.
Artificer Armour	Armour	Increase the armour's AC by +1. A shield or field cannot gain this trait.
Responsive Plating	Armour	Once per short rest, reduce damage from one non-critical weapon hit by your proficiency bonus.
Sealed Systems	Armour	Gain advantage on saves against gas, smoke and airborne toxins. If the armour is already sealed, it also tolerates brief vacuum exposure without a separate suit breach test.

Bounded accuracy matters. The +1 attack or +1 AC traits above are intentionally powerful and should remain uncommon. They represent prized equipment, not a mandatory mathematical treadmill.

18.9 Specialist Ammunition and Charges

Specialist ammunition is normally issued or acquired by magazine, charge, belt or mission allotment. Unless a rule says otherwise, one specialist ammunition unit modifies one Reload cycle. A weapon can use only ammunition appropriate to its pattern.

Ammunition	Availability	Effect
Tracer / Target-Marking	Controlled	The first creature hit during the Reload cycle is easier to track; the next allied ranged attack against it before your next turn ignores Light Cover.
Manstopper	Controlled	Projectile weapons only. Once per turn, add +1 damage against a target wearing armour of AC 13 or lower before Dexterity.
Armour-Piercing	Scarce	Projectile or bolt weapons only. Once during the Reload cycle, one attack gains Armour-Breaking. Declare before the attack roll.
Incendiary	Scarce	Suitable projectile, bolt or flamer weapons. Once per turn on a hit, deal +1d4 fire damage. The ammunition is conspicuous and rarely appropriate for stealth.
Hot-Shot Charge Pack	Scarce	Las weapons only. Once per turn, add +1d4 radiant damage, but the weapon gains Overheat for that Reload cycle.
Sanctified Ammunition	Rare	On a hit against a daemon, Warp-Born creature or explicitly corrupted target, add +1d4 radiant damage.
Xenos / Exotic Magazine	Rare	Restores one Reload cycle for a matching xenos or otherwise exotic weapon. It does not grant a new property by itself.

18.10 Salvage and Captured Equipment

Characters can recover enemy equipment, but a battlefield is not a consequence-free catalogue. Salvage bypasses the question of whether the item physically exists; it does not bypass condition, ammunition, legality, compatibility, ownership or maintenance.

Step	Player Procedure
1. Secure	The item must actually be recovered from the scene. A retreat, collapsing site or hostile reinforcements can make this impossible.
2. Assess	Use Investigation, Technology or an appropriate tool proficiency when the item's condition, traps, corruption or unfamiliar technology is uncertain.
3. Restore	Damaged or Worn gear may require parts, a maintenance kit, workshop time or a project before it can be trusted.
4. Integrate	Unfamiliar, species-pattern, Mechanicus, xenos or proscribed gear may require training, an interface, ammunition or a specialist before use.
5. Explain	If authorities care about ownership or legality, the warband needs a believable provenance, permit, patron or very convincing lie.

Recovering an item therefore does not require a normal Requisition test, but keeping it may create an equivalent cost in repairs, contacts, Heat, favours or narrative risk. This is deliberate: loot should create choices rather than convert every battlefield into a shopping trip.

18.11 Item Condition and Repair

Use Item Condition when maintenance, salvage or scarcity matters. Most issued and newly requisitioned equipment begins Serviceable. Do not roll condition for every ordinary attack; condition changes when a rule, hazard, critical failure, neglect or narrative event specifically threatens the item.

Condition	Effect
Pristine	Exceptionally maintained. Ignore the first event each mission that would reduce the item's Condition.
Serviceable	Normal function with no penalty.

Condition	Effect
Worn	On a natural 1 during demanding use, the item becomes Damaged after resolving the action.
Damaged	One property or benefit chosen by the GM is unavailable until repaired. A natural 1 during demanding use can cause complete failure.
Ruined	The item cannot function until rebuilt or replaced with appropriate facilities and parts.

A field repair normally improves Damaged to Worn. Proper workshop repair can restore Serviceable. Returning an item to Pristine requires exceptional maintenance, master-crafting or replacement components.

18.12 Replacing Lost or Destroyed Equipment

Equipment Grade	Typical Replacement
Issued	If the character still has an appropriate patron or institution, ordinary class equipment and common ammunition are normally replaced between authorised missions without a roll.
Controlled	Usually replaced with a routine Requisition test, paperwork or a short downtime action.
Scarce	Requires a Requisition test and a plausible supply source. Replacement may be delayed, substituted or issued only for a mission.
Rare	Requires strong access, Standing, a specialist source or a specific reward. Loss should matter.
Exceptional	Normally a campaign objective, patron decision, inheritance, major favour or difficult project rather than a routine request.
Near-Unique / Unique	Cannot be assumed replaceable. Recovery, reconstruction or replacement should be a story in its own right.

18.13 Trading, Gifts and Ownership

Characters may trade ordinary civilian goods using local currency when the GM considers it reasonable. Military and restricted equipment remains governed by Availability and provenance even if someone has enough money to pay for it. A character may give equipment to an ally, but doing so does not grant proficiency, species compatibility, ammunition supply, legal authority or maintenance knowledge. Institutions may also treat issued wargear as property that must be returned.

18.14 Exotic, Relic and Unique Wargear

High-tier equipment is intended as mission rewards, faction gifts, discoveries and campaign objectives. These items use the existing Availability and provenance rules rather than a separate currency. Exotic gear can sometimes be requisitioned; relics, archeotech and Unique items should usually enter play because the warband earned, recovered, inherited or stole them.

18.14.1 Signature Wargear

Any Near-Unique or Unique item is Signature Wargear. A character may benefit from no more than three Signature items at the same time. Additional Signature items may be carried, stored or entrusted to allies, but provide no mechanical benefit until exchanged during a long rest or suitable downtime. Rare and Exceptional items do not count unless their entry specifically says otherwise.

Relic and archeotech effects do not stack with another copy of the same named item. Relic weapons and armour are already exceptional objects and cannot receive additional weapon or armour modifications unless their entry explicitly allows it. Masterwork Traits may be part of a relic profile, but are not added automatically.

Burden is part of the item. A Burden can represent maintenance, legal ownership, factional obligation, dangerous provenance, rare ammunition or unwanted attention. The GM should use a Burden to create decisions and consequences, not to remove a hard-won reward without warning.

18.14.2 Exotic Wargear

Exotic wargear is unusual but reproducible. It may appear through elite armouries, xenos contacts, Mechanicus vaults, black markets or specialist patrons.

Item	Availability	Effect
Inferno Pistol	Exceptional	2d10 fire; 20/60 ft; Light, Armour-Breaking, Reload 2. Aeldari-pattern cells and maintenance are normally required.
Grav-Pistol	Rare	1d10 force; 40/120 ft; Armour-Breaking, Reload 6. Once per turn against AC 17+, a vehicle or a structure, deal +1d6 force damage.

Item	Availability	Effect
Grav-Gun	Exceptional	2d8 force; 60/180 ft; Heavy, Armour-Breaking, Reload 6. On a hit against AC 17+, a vehicle or a Large or larger creature, it must pass a Strength saving throw or lose 10 ft Speed until your next turn.
Digital Weapon	Rare	Concealed accessory. Once per short rest, after you hit a creature within 10 ft, deal +1d6 radiant or fire damage. It is not found without a deliberate search or suitable auspex.
Null Rod	Exceptional	While held, gain advantage on saves against psychic and daemonic effects. Once per short rest, use your reaction to reduce psychic or force damage to you by 2d8; a Warp-using source also gains +1 Warp Pressure.
Rosarius	Exceptional	Force-field icon. Once per short rest, use your reaction to reduce damage to yourself by 2d8 + proficiency bonus. If this reduces the damage to 0, gain advantage on your next fear or Corruption save before the end of your next turn.
Displacer Field	Near-Unique	Once per short rest, when an attack hits you, use your reaction to teleport up to 10 ft to an unoccupied space you can see and halve the triggering damage. If no safe space exists, the reaction cannot be used.
Conversion Beamer	Exceptional	2d10 force; 120/360 ft; Heavy, Beam, Emplaced, Reload 2. If the primary target is at least 60 ft away, add +1d10 force damage.
Teleport Homer	Rare	Action to deploy. Once per long rest, a friendly teleport, drop or extraction that can lock onto the homer may arrive within 10 ft of it without scatter or positional error, subject to campaign access.
Stasis Grenade	Exceptional	Consumable. 10-ft radius; Constitution save. Failure: Restrained and Incapacitated until the start of the thrower's next turn. Success: Speed halved and no reactions for the same duration.

18.14.3 Archeotech

Archeotech represents technology whose manufacture is poorly understood, lost or institutionally restricted. Its Availability describes access, not the ability to mass-produce it.

Item	Availability	Effect
Volkite Serpenta	Exceptional	1d10 radiant/fire; 50/150 ft; Light, Reload 8. Once per turn when you hit a Bloodied target, deal +1d6 fire damage.
Volkite Charger	Near-Unique	2d8 radiant/fire; 80/240 ft; Burst, Reload 12. Once per turn, if the target has already taken damage this round, deal +1d8 fire damage.
Suspensor Harness	Exceptional	Choose one Heavy weapon you carry. You ignore its movement-based Heavy penalty. If it is Emplaced, you may fire it as though it were merely Heavy while the harness is functioning. Requires Strength 13+ or an appropriate interface.
Archeotech Logic Engine	Exceptional	Advantage on Technology checks to identify or operate ancient machinery. Once per short rest, after rolling an Intelligence or Technology check, add 1d8 before the result is declared.
Phase-Shunt Field	Near-Unique	Once per long rest when damage would reduce you to 0 HP but not kill you outright, remain at 1 HP and teleport up to 15 ft to a visible unoccupied space. The field becomes Damaged after use until properly repaired.
Medicae Crucible	Exceptional	Once per long rest as an action, a creature you touch regains 4d8 + proficiency bonus HP and ends Poisoned or one disease. It may suppress one lasting-injury penalty until its next long rest, but does not cure the injury.

18.14.4 Faction Relics

Faction relics are named or storied objects. Their provenance matters as much as their rules: carrying one can create authority, suspicion, obligations or enemies.

Relic	Availability	Effect
The Last Light - Imperial	Near-Unique	Lasgun: 1d10 radiant; 100/300 ft; Accurate, Armour-Breaking, Reload 30. Once per short rest on a hit, choose a second creature directly behind the target within 30 ft; if the original attack roll would hit it, it takes 1d10 radiant damage.
Bulwark of Saint Drusus - Imperial	Near-Unique	Refractor relic. Once per short rest, reaction to reduce damage to you by 2d8 + proficiency bonus; allies within 5 ft reduce the same instance of area damage by your proficiency bonus. Burden: Ecclesiarchal or Inquisitorial ownership is likely.
Martyr's Censer - Imperial	Exceptional	Once per long rest as an action, for 1 minute, allies within 15 ft have advantage on fear and Corruption saves. Daemons and explicitly corrupted creatures that start their turn in the aura take radiant damage equal to your proficiency bonus.
Arc of the Reductor - Mechanicus	Near-Unique	Arc rifle: 2d8 lightning; 80/240 ft; Shock, Armour-Breaking, Mechanicus, Reload 8. Once per short rest, a hit against a machine, vehicle or structure becomes a critical hit.
Omnissian Data-Relic - Mechanicus	Near-Unique	While interfaced, gain +1 to Technology checks and advantage to identify Mechanicus systems. Once per short rest, reroll a failed Technology check. Burden: the Cult Mechanicus regards the device as institutional property.
Big Lug's Door - Ogryn	Near-Unique	+2 AC; Ogryn only; counts as a Slab Shield. If you did not move this turn, one Small or Medium ally directly behind you has Full Cover. Once per short rest when a ranged attack misses you, move 5 ft toward the attacker without provoking opportunity attacks.

Relic	Availability	Effect
Grutt's Lucky Club - Ogryn	Exceptional	2d6 bludgeoning; Melee; Ogryn, Heavy, Brutal. Once per short rest when you miss with it, reroll the attack. If the reroll hits a Large or smaller target, it must pass a Strength save or be pushed 10 ft.
Ancestor-Wrought Rail Rifle - Kin	Near-Unique	2d10 force; 150/450 ft; Accurate, Heavy, Armour-Breaking, Reload 2. Once per short rest, one attack ignores Light and Heavy Cover and one source of resistance to its weapon damage.
Oathplate of the First Claim - Kin	Near-Unique	AC 17, max Dex +1; Kin only; no Speed penalty. Once per short rest, ignore one effect that would shove, knock you prone, or reduce your Speed. Allies within 5 ft gain +1 to saves against forced movement while you are conscious.
Ghosthelm of the Wandering Seer - Aeldari	Near-Unique	Aeldari Warlock or GM-approved Psyker. Once per long rest when Perils trigger, treat the severity result as Warp Static. After resolving it, reduce your Warp Pressure by your proficiency bonus, minimum 0.
Starfall Long Rifle - Aeldari	Near-Unique	1d10 piercing; 180/720 ft; Accurate, Silent, Monomolecular, Reload 6. If you are Hidden and did not move this turn, attacks with it score a critical hit on 19-20. Once per short rest, ignore Heavy Cover on one attack.

18.14.5 Unique Wargear

Unique items have no ordinary Requisition test. Each should be tied to a mission, inheritance, patron, theft, recovered vault, political bargain or equivalent campaign event. The examples below are templates for campaign-defining rewards rather than assumptions about what every high-level character owns.

Unique Item	Availability	Effect and Burden
Halo of Saint Varro	Unique	Once per long rest as a bonus action, for 1 minute, you and allies within 15 ft have advantage on fear and Corruption saves; you gain resistance to psychic and force damage. Burden: visible possession attracts Ecclesiarchal attention and expectations.
Heart-Key of the Red Vault	Unique	Mechanicus interface. Once per long rest, treat one Technology check to unlock, disable or command a machine, security system or vehicle of DC 20 or lower as a success. Against harder systems, make the check with advantage and add 1d10. Burden: multiple forge worlds claim it.
The First Oathstone	Unique	Kin relic. Once per long rest, when a creature harms you or an ally within 30 ft, name it oath-bound for 1 minute. Once each round when an ally hits that creature, that ally adds your proficiency bonus to the damage. Burden: abandoning the oath has serious cultural consequences.
The Veiled Eye	Unique	Aeldari spirit-lens. Once per long rest as a bonus action, for 1 minute, you can see Invisible and Hidden creatures within 60 ft, cannot be Surprised, and your ranged attacks ignore Light Cover. Burden: The item carries a psychic echo noticeable to Aeldari and Warp-sensitive beings.
The Door That Would Not Break	Unique	+2 AC; Ogryn only; counts as a Slab Shield and has no Speed penalty. If you do not move, up to two Small or Medium allies directly behind you have Full Cover. Once per long rest, when a weapon attack hits you, reduce that attack's damage to 0. Burden: it is enormous and impossible to conceal.
The Ghost's Coin	Unique	Black-market data-sigil. Once per long rest, produce a convincing identity, access token or ownership record appropriate to the current settlement or institution; for one scene, gain advantage on Deception and Investigation checks that rely on it. Burden: every use risks attracting whoever originally issued the stolen credentials.

18.14.6 Creating Additional Relics

When the GM creates another relic, start with an existing weapon, armour or item rather than inventing a new numerical scale. Add one memorable capability, one limited high-impact ability, or one rule-changing interaction. If an item simply grants a permanent +1 attack, +1 AC or a reroll, use the Master-Crafted rules instead. Relics should create choices, tactics or story consequences rather than mandatory arithmetic upgrades.

SECTION 19

Injuries, Recovery, and Augmetic Replacement

Morning reaches the field ward through a crack high in the wall. Someone has put a cup beside your bed, close enough for the hand that still obeys easily. Outside, a vehicle starts and stops.

Survival leaves work unfinished. There are dressings to change, movements to relearn and questions that companions do not know how to ask. Recovery belongs to the story too. For today, the medic wants you sitting upright. Tomorrow can make its own demands.

19 Injuries, Recovery, and Augmetic Replacement

Hit points represent immediate combat endurance. Lasting injuries are an optional campaign layer for wounds that remain important after hit points return. Use them only when the group wants that style of play.

19.1 When to Use a Lasting Injury

- A character survives catastrophic damage or a narrative injury that clearly exceeds normal hit-point loss.
- A character is reduced to 0 HP by a critical hit, and the GM has announced that the encounter can cause lasting injuries.
- A disease, toxin, environmental hazard or boss ability explicitly calls for a lasting injury check.
- The player chooses an injury as the consequence of surviving an otherwise fatal situation.

Do not impose permanent disfigurement, limb loss or involuntary cybernetics as a hidden consequence of one roll. Those outcomes should be discussed with the affected player.

19.2 Lasting Injury Table

d8	Injury	Until Treated
1	Concussion	Disadvantage on the first Intelligence or Wisdom test after each rest.
2	Damaged Arm	Cannot use Heavy or two-handed weapons; disadvantage on tasks requiring both hands.
3	Damaged Leg	Speed reduced by 10 ft; disadvantage on saves against being knocked prone.
4	Internal Trauma	Maximum HP reduced by your character level.
5	Eye Injury	Disadvantage on sight-based Perception and ranged attacks beyond normal range.
6	Respiratory Damage	Environmental smoke, gas and exertion cause Exposure one step faster when that system is in use.
7	Nerve Damage	Cannot take reactions during the first round of combat.
8	Severe Scarring	No universal combat penalty; choose one social context in which the scar changes reactions.

19.3 Medical Care

Care	Capabilities
Improvised	Stabilisation, basic wound care, common med-stims and splints; no major surgery.
Field Medicae	Treat combat wounds, infection, poison and uncomplicated surgery.
Hospital / Regimental	Major surgery, rehabilitation, organ support and standard bionic replacement.
Specialist	Advanced augmetics, rare disease treatment, psychic care or xenobiological expertise.
Exceptional	Archeotech intervention, elite Mechanicus reconstruction or unique institutional resources.

19.4 Augmetic Replacement

When an injury destroys or permanently impairs a body part, an appropriate augmetic can remove the injury penalty once installed and recovered from. Standard replacements restore

normal function. Advanced replacements may also grant an Augmetic Upgrade from Chapter 13, subject to Availability, facilities and GM approval.

An augmetic obtained as treatment does not automatically consume a Talent choice. If it grants a significant mechanical upgrade beyond restored function, use the normal Augmetic Upgrade rules or treat the extra capability as a campaign reward.

SECTION 20

Character Advancement

You fasten the same pack with a different economy of movement. The strap that once rubbed has been moved. A tool you never used is gone; something a companion taught you to carry has taken its place.

Experience accumulates in such decisions. Some lessons are welcome, others costly, and not all of them concern fighting. When a newer traveller asks why you check the seal twice, you pause before answering. There is a useful lesson here, if you can find the words for it.

20 Character Advancement

Milestone advancement is the default. The GM awards a level after a major mission, completed arc or several smaller operations when the warband has confronted stronger problems meaningfully and changed the campaign.

Tier	Suggested Pace
Tier 1: Levels 1-4	One level every 2-4 sessions.
Tier 2: Levels 5-10	One level every 3-5 sessions.
Tier 3: Levels 11-16	One level every 4-6 sessions.
Tier 4: Levels 17-20	Advance at major campaign turning points.

20.1 When You Gain a Level

1. Increase maximum HP using your class Hit Die.

2. Increase proficiency bonus if the new level crosses a proficiency threshold.

3. Gain the class features listed for the new level.

4. If the level grants an Ability Score Improvement / Talent, choose one of those options according to the class rules.

5. Update attack modifiers, saving throw DCs, class resources and any feature that scales with level or proficiency bonus.

20.2 Retraining

Between missions, the GM may allow a character to retrain one proficiency, Talent, psychic power or comparable choice when the fiction supports training, reconditioning, recovered memory, doctrinal change or a new mentor. Retraining is not intended to become free respec after every mission.

SECTION 21

Vehicles

The engine coughs beneath the depot vaults, then settles into a growl that shakes dust from the saints overhead. A mechanic presses a seal against the warm hull. Inside, someone tests the vox while the driver waits for the gate to rise.

Beyond the motor pool lie streets no patrol crosses on foot and roads swallowed by the wastes. Armour can carry you through the first ambush. The journey still belongs to those who choose the route, watch the flanks and refuse to leave a broken vehicle behind.

21 Vehicles

“Count the passengers before departure. Count them again before opening the doors.” — Convoy standing order

Vehicles carry a warband through hive arteries, ash wastes and contested ground. These rules cover ground vehicles, walkers and low-altitude skimmers at character-encounter scale. Aircraft, voidcraft and super-heavy war engines remain mission assets adjudicated by the GM.

21.1 Profiles and Crew

Read a profile: AC protects the hull; HP measures structural damage; DT is its Damage Threshold (21.5); Speed is tactical movement in feet per round. Handling modifies driving checks and vehicle Dexterity saves. Crew lists working stations; Passengers lists additional seats. Cargo is capacity after the listed occupants and their normal gear.

Vehicles proficiency adds your proficiency bonus to Dexterity (Vehicles) checks and can qualify you for mounted-weapon attacks. Add proficiency only once, even if another proficiency applies. Anyone may attempt ordinary driving. Unfamiliar alien controls require instruction or a compatible interface before use. Technology repairs vehicles; it does not replace Vehicles for driving.

Stations: D = driver, G = gunner, L = loader. One conscious driver at the controls is required to move. Other stations may remain empty but cannot act. A G operates one weapon at a time; an L may reload a mount. A one-crew vehicle lets its driver operate its listed weapon. A passenger must enter a crew station before using it.

Turns: each character keeps their own initiative, action, bonus action and reaction. The vehicle grants no extra turns. On their turn, a driver may spend their entire personal movement allowance to move the vehicle up to its Speed, without spending an action. The vehicle receives this movement only once per round, even if drivers swap. Riding does not spend a passenger’s movement.

Station changes: boarding a stationary vehicle, disembarking or changing to an accessible station costs 10 ft of personal movement. A driver who spent their movement cannot then disembark normally that turn. Small and Medium creatures use one seat. An Ogryn uses three passenger spaces and needs suitable access and reinforcement. Ordinary crew stations require the Ogryn accommodation upgrade; bikes and undersized chassis cannot take it.

21.2 Driving and Movement

Clear roads and ordinary turns need no roll. Follow a physically possible route: a vehicle cannot pass through walls or gaps narrower than its hull. Reversing costs double movement. Walkers turn in place; other vehicles need room to turn. Rubble, stairs and steep slopes are difficult terrain unless a trait says otherwise. Tactical Speed is not maximum road speed. For map space, use 10 × 10 ft for Large, 15 × 15 ft for Huge, and at least 20 × 20 ft for Gargantuan; the GM can use the actual hull outline when terrain demands it.

Difficulty	Example	DC
Routine	Clear road, ordinary turn, controlled stop	None
Demanding	Sharp turn, loose surface, narrow opening	10
Dangerous	Dense wreckage, unstable bridge, hard evasive turn	13
Extreme	Broken causeway jump or collapsing route	16
Exceptional	A barely possible stunt under severe pressure	20

Roll Dexterity (Vehicles) + Handling. Failure ends movement before the hazard; failure by 5 or more also causes a collision (21.4). The GM may state a different consequence before the roll. A natural 1 is not an automatic crash; a natural 20 cannot make an impossible stunt possible.

A skimmer operates within 10 ft of a supporting surface. It can cross terrain or calm water allowed by its profile but cannot climb above a wall to bypass a scene. When its drive fails, it settles onto the surface below; a fall into a chasm remains a fall. Falls deal 1d6 bludgeoning per 10 ft, maximum 20d6, ignoring DT; exposed occupants take their own falling damage, while enclosed occupants use the wreck rules if the hull reaches 0 HP.

Vehicle Combat

21.3 Actions and Attacks

Action	Effect
Drive Hard	Driver: move up to the vehicle's Speed again. Once per vehicle per round. Until the driver's next turn, attacks from it have disadvantage and targets have advantage on saves against its mounted area weapons.
Evasive Driving	Driver: declare before vehicle movement; cap that movement at half Speed. Until the driver's next turn, attacks against the hull have disadvantage and it has advantage on Dexterity saves. Attacks from it have disadvantage; targets have advantage on saves against its mounted area weapons. Cannot combine with Drive Hard.
Fire a Mount	At its station, make one mounted attack or use one mounted area weapon. Extra Attack does not add shots. Each mount can fire only once per round, including reactions.
Reload a Mount	At its station or loader position, reload one mount. Each mount can be reloaded only once per round.
Spot or Assist	Use Help to give one ally advantage on their next driving check or mounted attack before your next turn. A useful view, communication and plausible assistance are required.
Damage Control	At the affected system: action and DC 13 Intelligence (Technology) check to clear one weapon jam, engine stall or vehicle fire. Restores no HP.

One action cannot both drive and fire. A one-crew vehicle can move normally and fire using its driver's action, but cannot Drive Hard and fire that turn. Readying a mount uses Ready and a reaction; its once-per-round limit still applies. An explicitly granted additional action may fire a different mount that the operator can access.

Mounted attack = d20 + Dexterity modifier + proficiency if proficient in Vehicles or that weapon. Add Dexterity to damage once on a hit. Mounted save DC = 8 + Dexterity modifier + proficiency if trained. Area weapons add no ability modifier to damage. A mount removes normal Heavy and Emplaced movement restrictions; other properties still apply. Personal-weapon-only features do not automatically apply to mounts.

Turret mounts fire in any direction; forward mounts fire in a 90-degree arc centred on the hull's front. Terrain and the hull still block line of fire. Vehicle movement counts as occupant movement for Accurate and other "did not move" benefits. Personal weapons retain their normal rules, including Extra Attack; they do not use Fire a Mount.

Closed compartments provide Full Cover from outside attacks and effects that cannot pass through the hull. Open-topped vehicles and exposed riders provide Light Cover where the hull blocks the line of fire. Using a hatch or firing port exposes that occupant with Heavy Cover until their next turn. One occupant uses each firing port per round. Target a visible occupant using their own AC. Hull hits do not also hit the crew.

Area effects resolve separately against the hull and exposed occupants in the area. Full Cover protects enclosed occupants unless an effect penetrates it. Vehicle Strength saves use +2 for Large, +4 for Huge or +6 for Gargantuan; Constitution saves use +4. Dexterity saves use the driver's Dexterity (Vehicles) modifier + Handling. An uncontrolled or immobilised vehicle automatically fails Dexterity saves.

21.4 Collisions

Ram: the driver spends an action, moves at least 20 ft straight using available vehicle movement, and chooses a target in the path. It makes a Dexterity save against 8 + the driver's Dexterity modifier + Vehicles proficiency, if trained. Damage is 4d6 bludgeoning for a Large rammer, 6d6 for Huge or 8d6 for Gargantuan. A creature takes half on a successful save and moves to the nearest safe space. A vehicle that succeeds avoids the ram if it has a clear path; otherwise it fails. Fixed obstacles automatically fail.

On contact the rammer stops. A struck vehicle or solid obstacle deals half the rolled damage back to it. An accidental collision deals the full size-based damage to the moving vehicle and obstacle. Apply DT normally. A vehicle can ram once per round and cannot also Drive Hard. Hull damage harms occupants only if it causes a wreck.

Damage and Breakdowns

21.5 Hull Damage and Breakdowns

Damage Threshold: total all damage from one hit or effect after resistance, then compare it with DT. Below DT, the hull takes no damage. At least DT, apply the full total. DT is a threshold, not damage reduction. Do not combine separate attacks to overcome it.

Against a hull, Armour-Breaking also halves DT for that hit, rounded down. It does not reduce AC or bypass Full Cover. This extends the Chapter 7 property. Power Field and Monomolecular do not bypass DT unless explicitly stated. Personal weapons can harm hulls when they overcome DT.

Vehicles are objects. Hulls are immune to poison, disease, radiation, fear, Suppression and effects that target only creatures or minds. Psychic damage cannot harm a hull unless the power explicitly affects machinery or objects. Vehicles do not make death saves, recover through rests or benefit from creature-only healing. Drivers and exposed occupants suffer conditions normally; their personal resistances do not protect the hull.

Roll one breakdown when a critical hit damages the hull, or when it first reaches half maximum HP or less in an encounter. If it begins at half HP or less, roll on its first damaging hit instead. Maximum one breakdown roll per vehicle per round; simultaneous triggers give one roll. Critical hits otherwise double damage dice normally.

d6	Breakdown	Effect
1	Running gear	Speed is halved until repaired; minimum 5 ft unless already 0.
2	Steering	Disadvantage on driving checks and vehicle Dexterity saves until repaired.
3	Weapon jam	One random fitted mount cannot fire until Damage Control succeeds. With no mount, use result 2.
4	Hull breach	Lose Sealed. One random enclosed occupant position provides only Heavy Cover until repaired.
5	Engine stall	Speed becomes 0 and remaining movement is lost until Damage Control succeeds.
6	Vehicle fire	At the end of the driver’s turn, hull takes 2d6 fire damage ignoring DT. If uncontrolled, use the former driver’s initiative. Damage Control extinguishes it.

Breakdowns do not stack with themselves. A repeated active result instead deals 2d6 hull damage ignoring DT; this cannot trigger another breakdown. Field or workshop repair clears running-gear, steering or hull-breach damage (21.8). Damage Control clears only jams, stalls and fires.

At 0 HP the vehicle is Wrecked: stop movement and disable its mounts. Each occupant makes a DC 13 Dexterity save, taking 2d6 bludgeoning on failure or half on success. Conscious occupants may immediately leave into an unoccupied space within 5 ft without an action. Anyone remaining must later leave normally or be rescued. Wrecks do not automatically explode. Fire or hazardous cargo may create a separately signalled danger.

Uncontrolled movement: when a vehicle would next move without a conscious driver, it coasts straight up to 30 ft, limited by the distance it moved last round, then stops. Resolve obstacles as collisions. A new driver at the controls before then can prevent the coast. Swapping drivers never grants a second movement allowance in the round.

21.6 Boarding and Disembarking

Boarding in motion: from within 5 ft, spend an action and make DC 13 Athletics or Acrobatics to reach an exposed foothold. DC 16 if either vehicle used Drive Hard this round. Failure leaves you where you started; failure by 5 or more also puts you Prone in the nearest safe space and deals 2d6 bludgeoning. Closed or locked hatches must still be opened or breached. Moving inside then costs normal movement.

Jumping out of a moving vehicle uses the same action, check and failure damage. No check is needed if it has not moved since the start of its driver’s last turn. A passing hull may be targeted by an opportunity melee attack as if it were a creature; carried occupants do not provoke just because the vehicle moves. Normal creature-only grapples and shoves cannot move a vehicle.

Chases and Maintenance

21.7 Chases

Use chase bands when routes and obstacles matter more than squares. Choose pursuer and quarry, then set a starting band. Bands replace tactical movement between those vehicles: do not also add Speed or Drive Hard to the gap. Actions and damage still use normal rounds.

Band	Separation	Range
0 — Contact	Alongside or immediately behind	10 ft
1 — Close	A short stretch of road	60 ft
2 — Near	A clear firing lane	120 ft
3 — Far	Terrain or traffic intervenes	240 ft
4 — Distant	Almost lost from sight	480 ft
5 — Lost	Beyond immediate pursuit	Out of sight

At round's end, each driver who spent their action Pursuing rolls Dexterity (Vehicles) + Handling. The vehicle with the faster current Speed grants +2 in that contest; equal Speed grants neither side a bonus. A quarry win increases the gap one band; a pursuer win decreases it one. A margin of 5 or more changes it two bands. Ties leave it unchanged. Clamp gaps between 0 and 5.

Pursuing uses the driver's action instead of firing, ramming, Drive Hard or Evasive Driving. If only one driver Pursues, that driver wins by one band without a contest; if neither does, the gap stays unchanged. A stopped quarry is caught; a stopped pursuer loses. At band 5 the quarry escapes after staying there through the next contest; the pursuer can still close on that contest but cannot attack an unseen target.

The GM may introduce one route hazard per vehicle per round, with a DC 10, 13 or 16 driving check. Failure gives disadvantage on that round's chase contest; failure by 5 also causes a collision. Announce consequences first. A navigator may Help with either a hazard or contest, not both. Other crew can attack, reload or repair using the band's range. There is no extra firing penalty just for Pursuing.

At Contact, use an action to ram or board instead of another action. With several vehicles, roll once per driver and reuse the base roll in each contest, applying the faster-vehicle +2 separately. Example: a Taurox pursues a hauler at Near. Final totals of 18 and 14 favour the Taurox by 4, closing to Close. An attack earlier that round still used Near's 120-ft distance.

21.8 Repairs and Resupply

Work	Requirements	Result
Damage Control	Action; DC 13 Technology	Clear one jam, stall or fire; no HP or parts.
Field repair	10 minutes, tools, one repair kit; DC 13 Technology	Restore 2d6 + Intelligence HP (minimum 1), OR clear one persistent breakdown. One attempt per vehicle between long rests. Failure spends the kit. Cannot repair a wreck.
Workshop repair	One hour, workshop, one kit or equivalent parts	Restore one quarter maximum HP, rounded up, and clear one breakdown. Repeat with more time and parts; no check for routine work.
Rebuild a wreck	Eight hours, workshop, major replacement parts; DC 15 Technology	Restore one quarter maximum HP and clear all breakdowns. One attempt per day. Failure spends time but does not destroy the parts.

Repair kits are Scarce; each supplies one repair. Major parts use the vehicle's Availability. Alien systems require compatible parts and expertise. One helper may provide Help on a repair check. Do not also apply Chapter 18's item-condition penalties to the same vehicle damage.

Fuel, power and ordinary ammunition suffice for the agreed mission unless the GM states limits before departure. Requisition supplies through Chapter 18. Personal Ammo Packs do not refill vehicle magazines unless compatible. Battle cannon shells are always tracked: eight per supplied vehicle, including a loaded shell.

Vehicle Access and Upgrades

21.9 Requisition and Modifications

Use Chapter 18's Availability and provenance rules. Success normally grants a mission loan or support, not personal ownership. Agree the chassis, listed weapons, supplies, crew arrangements, route and recovery conditions. Vehicles are not class starting equipment unless explicitly granted by the GM.

Civilian transport fits early missions; armed scouts and carriers require credible faction support. Tanks and alien grav-tanks are substantial assets, even for experienced warbands. Low-level crews can be assigned one, but need a reason it cannot solve every obstacle. Captured vehicles still require access, supplies, maintenance and a safe destination; possessing one does not make its use lawful or consequence-free.

Each vehicle has two modification slots. Fit one upgrade per slot and never duplicate it. Fitting or replacing one takes four hours in a suitable workshop with tools. Undamaged upgrades can be recovered. Built-in traits use no slots. Personal armour or weapon upgrades do not apply to hulls or mounts unless explicitly permitted.

Upgrade	Availability	Effect
Reinforced plating	Rare	Add 20 maximum and current HP when fitted. Speed −10 ft, minimum 10 ft. Removal removes 20 current HP, minimum 1. No AC or DT increase.
Smoke launchers	Controlled	Two uses per mission. Driver or gunner action creates stationary smoke in a 20-ft radius centred on the vehicle until the start of that operator's next turn. Attacks through it have disadvantage; no protection against area effects.
Auspex survey suite	Scarce	A crew member scanning as an action gains advantage on one Perception or Survival check for routes, obstacles or ambushes within 300 ft. Does not see through solid barriers.
Recovery winch	Controlled	At rest, an operator's action pulls an unsecured or willing object up to cargo capacity by 10 ft. With a sound anchor, ten minutes frees the vehicle from ordinary mud or a shallow ditch.
All-terrain running gear	Scarce	Wheeled or tracked chassis ignores difficult terrain from mud, loose rubble and shallow debris; not walls, deep water or impassable slopes.
Sealed compartment	Rare	Enclosed chassis gains Sealed and one hour of internal air. Cannot fit to exposed bikes or open-topped vehicles.
Ogryn accommodation	Controlled	Convert one suitable crew station for an Ogryn OR reinforce suitable passenger space so an Ogryn uses two spaces instead of three. Choose one version; no duplicates. Chassis must have enough physical room.
Spare-parts locker	Scarce	Includes two repair kits. Once per mission reroll one failed field-repair check, using the new result. Expended kits need replacement; locker remains reusable.

Weapon swaps need GM approval, the new weapon's Availability, a compatible mount and four workshop hours. A swap replaces a mount's weapon; it does not add a weapon or crew station. An integral bike or walker weapon cannot be removed and wielded as an ordinary personal firearm.

Travel times follow the route and the vehicle's fictional capabilities, not a conversion of tactical Speed into miles per hour. A compact chase, a breakdown and a choice of route are usually more useful than tracking fuel for every mile.

Vehicle Profiles

21.10 Civilian and Imperial Scouts

These are complete starting profiles for Dark Imperium. Weapons are defined in 21.11. Enclosed, Exposed and Open-topped use the protection in 21.3. Sealed excludes normal airborne contaminants while closed and provides one hour of internal air; it does not grant voidworthiness or protect a breached hull. Capacities and statistics are conversion values for these representative loadouts.

Civilian Autocar

Large wheeled vehicle

AC 12 | HP 35 | DT 0 | Speed 60 ft | Handling +1
Crew 1 D | Passengers 3 | Cargo 250 kg | Controlled

Weapons: none. Enclosed. A hive taxi, route-car or staff car. No firing ports; occupants must open a window or hatch to attack. Suits maintained roads and broad service tunnels.

Cargo Hauler

Huge wheeled vehicle

AC 12 | HP 70 | DT 5 | Speed 40 ft | Handling −1
Crew 1 D | Passengers 2 | Cargo 3 tonnes | Controlled

Weapons: none. Enclosed cab; open cargo bed. Six additional passengers may ride exposed in the bed, replacing 1 tonne of cargo. This does not provide reinforced Ogryn accommodation.

Hive Outrider Bike

Large wheeled vehicle

AC 13 | HP 30 | DT 0 | Speed 80 ft | Handling +2
Crew 1 D | Passengers 1 | Cargo 50 kg | Controlled

Weapons: none. Exposed. Driver needs one free hand for the controls and can use a one-handed personal weapon normally. Passenger can use personal weapons. Neither position accommodates an Ogryn.

Armoured Utility Truck

Huge wheeled vehicle

AC 15 | HP 90 | DT 5 | Speed 50 ft | Handling 0
Crew 1 D, 1 G | Passengers 8 | Cargo 1 tonne | Scarce

Weapons: turret heavy stubber (G). Enclosed; two firing ports. Reinforced bay accommodates Ogryns at three spaces each. Use for prison vans, militia carriers and hardened convoy trucks.

Scout Sentinel

Large walker

AC 15 | HP 65 | DT 5 | Speed 40 ft | Handling +1
Crew 1 D | Passengers 0 | Cargo 100 kg | Rare

Weapons: forward multi-laser (D). Exposed cockpit. Turns in place; ignores difficult terrain from rubble, shallow mud and stairs wide enough for its feet. No wall-climbing or Ogryn accommodation.

Taurox

Huge tracked carrier

AC 16 | HP 95 | DT 10 | Speed 60 ft | Handling 0
Crew 1 D, 1 G | Passengers 10 | Cargo 500 kg | Rare

Weapons: turret autocannon with Twin-Linked (G). Enclosed; two firing ports. Ignores difficult terrain from rubble and shallow mud. Ogryns use three passenger spaces; normal crew stations are human-sized.

Armoured and Xenos Vehicles

Crew assignments govern weapon use. A gunner controlling two mounts still has only their normal action. Availability does not remove faction restrictions, interface requirements or supply needs. Low skimmers remain within the surface limits in 21.2.

Chimera

Huge tracked carrier

AC 17 | **HP 120** | **DT 10** | **Speed 40 ft** | **Handling −1**
Crew 1 D, 2 G | **Passengers 12** | **Cargo 500 kg** | **Rare**

Weapons: turret multi-laser (one G); forward heavy bolter (other G). Enclosed; two firing ports; Sealed. Amphibious in calm water at half Speed. Ogryns use three passenger spaces.

Leman Russ Battle Tank

Huge tracked tank

AC 19 | **HP 160** | **DT 15** | **Speed 30 ft** | **Handling −2**
Crew 1 D, 2 G, 1 L | **Passengers 0** | **Cargo 200 kg** | **Exceptional**

Weapons: turret battle cannon (one G); forward heavy bolter (other G). Enclosed; Sealed; no firing ports. Loader reloads either mount. No sponsons in this loadout. Unsuitable for weak bridges and hab corridors.

Sagitaur

Large wheeled Kin vehicle

AC 17 | HP 90 | DT 10 | Speed 60 ft | Handling +1
Crew 1 D, 1 G | Passengers 6 | Cargo 300 kg | Exceptional

Weapons: forward bolt cannon and turret HYLas rotary cannon (same G; choose one per action). Enclosed; Sealed; no firing ports. Ignores rubble and shallow mud. Kin-sized spaces need refitting for other species; no Ogryn accommodation.

Hernkyn Pioneer Bike

Large Kin skimmer

AC 15 | HP 45 | DT 5 | Speed 80 ft | Handling +2
Crew 1 D | Passengers 0 | Cargo 100 kg | Rare

Weapons: forward magna-coil autocannon (D). Exposed. Low skimmer: ignores ground-level difficult terrain and crosses calm water while its grav drive works. Kin controls need familiarisation or refitting for others; no Ogryn accommodation.

Aeldari Vyper

Large Aeldari skimmer

AC 16 | HP 60 | DT 5 | Speed 90 ft | Handling +2
Crew 1 D, 1 G | Passengers 0 | Cargo 50 kg | Exceptional

Weapons: turret scatter laser (G); forward twin shuriken catapults (D). Exposed; low skimmer. Ignores ground-level difficult terrain and crosses calm water. Requires Aeldari operator or compatible interface; no Ogryn accommodation.

Falcon Grav-tank

Huge Aeldari skimmer

AC 18 | HP 125 | DT 10 | Speed 70 ft | Handling +1
Crew 1 D, 1 G | Passengers 6 | Cargo 200 kg | Exceptional

Weapons: turret pulse laser and shuriken cannon (same G; choose one per action); forward twin shuriken catapults (D). Enclosed; Sealed; no firing ports. Low skimmer. Aeldari controls; no Ogryn accommodation. Ignores ground-level difficult terrain and crosses calm water.

Mounted Weapons

21.11 Weapon Profiles

All these mounts count as Heavy and Emplaced, resolved using 21.3. The heavy stubber, heavy bolter and multi-laser retain Chapter 8 damage, range and other properties. Range is in feet; two numbers mean normal/maximum range. A single area range is the furthest point the gunner may choose.

Weapon	Damage	Range	Properties	Availability
Heavy stubber	1d12 piercing	120/360	Burst, Suppression; Reload 40	Controlled
Heavy bolter	1d12 piercing + 1d6 thunder	100/300	Burst, Brutal, Suppression; Reload 30	Scarce
Multi-laser	2d8 radiant	120/360	Burst; Reload 40	Scarce
Autocannon	2d10 piercing	160/480	Armour-Breaking; Reload 10	Rare
Lascannon	4d10 radiant	200/600	Armour-Breaking; Reload 5	Rare
Battle cannon	3d10 piercing + 3d10 thunder	240	15-ft radius; Armour-Breaking; Reload 1	Exceptional
Bolt cannon	3d8 piercing	120/360	Burst, Brutal; Reload 12	Rare
HYLas rotary cannon	3d8 radiant	120/360	Burst; Reload 20	Rare
Magna-coil autocannon	3d10 piercing	160/480	Armour-Breaking; Reload 8	Rare
Scatter laser	3d8 radiant	160/480	Burst; Reload 24	Rare
Shuriken cannon	2d10 slashing	120/360	Burst, Monomolecular; Reload 18	Rare
Twin shuriken catapults	1d8 slashing	60/180	Burst, Monomolecular, Twin-Linked; Reload 24	Scarce
Pulse laser	4d10 radiant	200/600	Armour-Breaking; Reload 6	Exceptional

Battle cannon: choose a visible point within 240 ft. Creatures and vehicles within 15 ft make Dexterity saves against the gunner’s mounted save DC, taking full damage on failure or half on success. Full Cover blocks the blast. Apply Armour-Breaking and DT after the save. No attack roll, critical hit or Dexterity damage modifier applies. Spend one shell; reloading loads one from the eight-shell mission supply.

Burst uses the Chapter 7 −2 attack penalty and extra damage die. It expends three shots instead of one and requires at least three remaining. For mixed dice, an extra Burst or Brutal die is the first damage die listed. Area weapons cannot use Burst. A Suppression mount may require one creature it hits to make a Wisdom save against the mounted save DC; failure applies Suppressed as in 6.3. Hulls are immune.

Reload X is the current magazine’s remaining firing uses; Burst consumes three. An action by the gunner or loader fills it to X from compatible stores. Ordinary spare magazines are abstracted unless scarcity was declared; battle cannon shells are always counted. This list does not grant additional mounts.

Loadout options: with GM approval, replace a Sentinel multi-laser with a lascannon or a Vyper scatter laser with a shuriken cannon. Retain stations and firing limits. A pulse laser needs a suitable heavy Aeldari chassis and is not a normal Vyper upgrade.

Damage example: a heavy bolter hits a Chimera (DT 10) for 8 piercing + 5 thunder. The combined 13 meets DT, so apply all 13 HP damage. A separate 9-damage hit does nothing. Armour-Breaking instead compares damage with DT 5. Passengers are not automatically damaged.

SECTION 22

Quick Reference

The briefing is over. Across the table, the markers remain where the last speaker placed them: the approach, the obstacle, the way back. Someone folds the map along creases made by many earlier hands.

When events become confused, return to what you know. Check the immediate danger, remember the people beside you and ask the question that makes the next decision clearer. Even in a galaxy this vast, a little shared understanding can keep a small group moving.

22 Quick Reference

Rule	Reference
Attack roll	d20 + proficiency bonus (if proficient) + relevant ability modifier.
Ability/skill check	d20 + relevant ability modifier + proficiency bonus if proficient in the applicable skill or tool.
Saving throw	d20 + relevant ability modifier + proficiency bonus if proficient in that saving throw.
Weapon save DC	8 + proficiency bonus + ability modifier used for the weapon.
Psychic save DC	8 + proficiency bonus + Intelligence or Wisdom modifier.
Psychic attack	d20 + proficiency bonus + Intelligence or Wisdom modifier.
Grenade save DC	8 + proficiency bonus + Dexterity modifier unless a feature says otherwise.
Initiative	d20 + Dexterity modifier unless a feature says otherwise.
Proficiency bonus	Levels 1-4: +2; 5-8: +3; 9-12: +4; 13-16: +5; 17-20: +6.

22.1 Turn Reference

On Your Turn	Reference
Movement	Move up to your Speed. You may split movement before and after your action if the movement is otherwise legal.
Action	Usually Attack, Dash, Disengage, Dodge, Help, Hide, Ready, Reload, Use Mission Gear, grapple, shove or another action granted by a rule.
Bonus Action	You have one only when a feature, Talent, item or other rule grants a use for it.
Reaction	One between the start of your turn and the start of your next turn. Opportunity attacks and many class features use it.
Object Interaction	One simple interaction such as opening an unlocked door, drawing a readily accessible item or pressing a control, when the GM considers it reasonable.

22.2 Combat and Positioning

Rule	Reference
Normal/maximum range	At or within normal range: no penalty. Beyond normal and up to maximum: disadvantage. Beyond maximum: cannot attack.
Close-quarters shooting	Ranged attacks while a hostile creature is within 5 ft have disadvantage unless the weapon or feature ignores it.
Opportunity attack	Reaction; one melee attack when a visible hostile creature leaves your reach using its own movement. Disengage prevents it.
Grapple	Replace one attack; Strength (Athletics) contested by target's Athletics or Acrobatics. Success: target grappled.
Shove	Replace one attack; same contest as grapple. Success: push 5 ft or knock Prone.
Light / Heavy / Full Cover	+2 AC / +5 AC / cannot be directly targeted through the obstruction.
Suppressed	Disadvantage on ranged attacks; cannot willingly move closer to source; no reactions.
Critical hit	Natural 20 unless a rule expands the range; roll attack damage dice twice and add modifiers once.
Reload X	The weapon can normally make X attacks before an action is required to reload.
Two-weapon fighting	After attacking with a one-handed Light melee weapon, bonus action attack with a different Light melee weapon; no positive ability modifier to bonus damage unless a feature says otherwise.

22.3 Conditions and States

Condition / State	Quick Effect
Blinded	Cannot see; own attacks have disadvantage; attacks against you have advantage.
Bloodied	At or below half maximum HP; no effect by itself.
Frightened	While the source is visible: disadvantage on attacks/checks; cannot willingly move closer.
Grappled	Speed 0.
Hidden	Unseen and unheard by that creature; attacks from hiding normally have advantage and reveal you after resolving.
Incapacitated	No actions, bonus actions or reactions.
Invisible	Normally, advantage on your attacks and disadvantage on attacks against you.
Poisoned	Disadvantage on attacks and ability checks.
Prone	Crawl or spend half Speed to stand; your own attacks have disadvantage; attacks within 5 ft have advantage, farther away have disadvantage.
Restrained	Speed 0; your own attacks have disadvantage; attacks against you have advantage; disadvantage on Dexterity saves.
Stunned	Incapacitated; cannot move; fail Strength/Dexterity saves; attacks against you have advantage.
Suppressed	Disadvantage on ranged attacks; cannot move closer to source; no reactions.
Unconscious	Incapacitated, Prone, unaware; fail Strength/Dexterity saves; attacks against you have advantage; hits within 5 ft are critical.

22.4 Weapon Property Quick Reference

Property	Reminder
Accurate	If you do not move this turn, +1 to hit.
Armour-Breaking	Ignores half cover from armour or vehicle plating at GM discretion.
Blast	Explosive/impact burst; nearby creatures or objects may also be affected.
Brutal	On a critical hit, roll one extra weapon damage die.
Burst	-2 to hit; on a hit, add one extra weapon damage die; uses extra ammunition.
Close-Quarters	No disadvantage for firing within 5 ft of an enemy.

Property	Reminder
Heavy	Strength 15 or training; moving before firing may impose disadvantage.
Overheat	Natural 1: wielder takes damage and weapon cannot fire again until the end of next turn.
Reload X	Must reload after X shots or uses.
Shock	Target makes a Constitution save or loses reactions until its next turn.
Spray	Uses an area saving throw instead of a normal attack roll.
Suppression	Can force Suppression saves.

22.5 Recovery and Medical

Rule / Item	Reference
Short rest	At least 1 hour. Spend Hit Dice to heal; recover short-rest features; Warp Pressure becomes 0.
Long rest	At least 8 hours. Restore all HP; recover long-rest features; regain up to half total Hit Dice; Warp Pressure becomes 0.
Death saves	At 0 HP: 10+ success, 9 or lower failure; 3 successes stabilise, 3 failures kill; natural 20 restores 1 HP, natural 1 causes two failures.
Stabilise	Action within reach; DC 10 Medicine. Success: target is stable.
Med-Stim	Bonus action; touched creature regains 1d6 + proficiency bonus HP; one benefit per short rest.
Med-Pack	Action; DC 12 Medicine check within 5 ft. Success: 2d6 + proficiency bonus HP, or stabilise and restore target to 1 HP. Consumed.
Field Dressing	Action; stabilise a dying creature. DC 10 Medicine lets the target immediately spend one Hit Die.
Exhaustion	Six cumulative levels: checks -> Speed -> attacks/saves -> max HP -> Speed 0 -> death. See 6.14.

22.6 Psychic and Warp

Rule	Reference
Minor power	+1 Warp Pressure.
Standard power	+2 Warp Pressure.
Major power	+3 Warp Pressure.
Empowered power	+1 additional Warp Pressure and choose one allowed Empowered effect from Chapter 14.
Perils check	After resolving a psychic power, roll d20. If the result is equal to or lower than current Warp Pressure, Perils trigger.
Perils severity	When Perils trigger, roll 1d20 + current Warp Pressure and consult Chapter 15.
Vent	Action; DC 12 Wisdom save. Success: reduce Warp Pressure by 1d4 + proficiency. Failure: reduce by 1 and take 1d6 psychic damage.
Short/long rest	Reduce Warp Pressure to 0.
Corruption	Track separately from HP and Warp Pressure. Ordinary rests do not remove Corruption.

22.7 Equipment and Requisition

Rule	Reference
Issued / Controlled / Scarce	Base Requisition DC 8 / 11 / 14.
Rare / Exceptional / Near-Unique	Base Requisition DC 17 / 20 / 24.
Unique	No ordinary Requisition test; requires a mission, inheritance, political intervention or equivalent story event.
Requisition test	d20 + proficiency bonus + relevant ability modifier + GM-supplied Standing or circumstance modifier.
Standard ammunition	Normally abstracted. Reload X tracks the current magazine/cell, not total mission ammunition.
Specialist ammunition	May require a matching Specialist Ammo Pack when supply is limited.
Item Condition	Pristine -> Serviceable -> Worn -> Damaged -> Ruined. Use only when a rule, hazard, neglect or narrative event threatens the item.
Signature Wargear	Near-Unique and Unique items are Signature Wargear. Benefit from no more than three at once; exchange active items during a long rest or suitable downtime.

22.8 Core Player Checklist

- Know your Armour Class, Speed, maximum HP and proficiency bonus.
- Record your weapon attack bonuses, Reload values and important weapon properties.
- Mark uses of short-rest, long-rest and proficiency-bonus-limited features.
- If you are psychic, track Warp Pressure openly.
- Keep mission gear, grenades and limited specialist ammunition visible on the character sheet.
- Record Corruption and any lasting injuries separately from ordinary hit-point loss.

22.9 Vehicle Quick Reference

Use Chapter 21 for the full procedures, breakdown table, vehicle profiles and mounted weapons.

Rule	Reference
Normal driving	Spend the driver's personal movement allowance; move up to vehicle Speed once per round. No action.
Drive Hard / Evade	Driver action. Drive Hard adds Speed; Evade caps movement at half Speed and protects the hull. Both penalise attacks from the vehicle.
Fire a Mount	One attack or area use per action; each mount once per round. Extra Attack adds no mounted shots.
Mounted attack / DC	Attack: d20 + Dexterity + proficiency if trained. Save DC: 8 + Dexterity + proficiency if trained. Add Dexterity only to attack-roll damage.
Damage Threshold	Whole hit after resistance: below DT = no damage; at least DT = full damage. Armour-Breaking halves DT, rounded down.
Breakdown	Damaging critical hit or first half-HP trigger of encounter. Maximum one roll per vehicle per round.
Wrecked at 0 HP	Stop, mounts fail. Occupants: DC 13 Dexterity save; 2d6 bludgeoning, half on success. Conscious occupants may exit immediately.
Damage Control	Action; DC 13 Technology: clear one jam, stall or fire. No HP recovery.
Field repair	10 minutes, tools, kit, DC 13 Technology. Restore 2d6 + Intelligence HP (minimum 1) OR clear one persistent breakdown. One attempt between long rests.
Chase contest	Pursuing uses driver action. Opposed Dexterity (Vehicles) + Handling; faster current Speed adds +2. Winner changes gap 1 band; margin 5+ changes 2.
Passenger protection	Closed hull: Full Cover. Exposed: situational Light Cover. Firing port: Heavy Cover until occupant's next turn.

Crew round checklist

- Choose each crew member's station before the encounter.
- **Driver:** move once, then choose an action. Announce Drive Hard or Evasive Driving penalties.
- **Gunners:** check firing arc, line of sight, range, magazine and the mount's firing limit.
- Resolve damage against DT, then any eligible breakdown or wreck.
- In a chase, resolve route hazards and the pursuit contest at round's end.
